EARLY HISTORY OF NEW-YORK CITY.

It was formerly the custom of the Atlantic tribes of North American Indians to resort to the sea coast during the summer months, where they spent their time in the peaceful employments of hunting and fishing; leaving the sterner occupations of war for the secret ambushes of the interior forests. They generally selected for their summer residences some place easy of access, and immediately contiguous to their sporting grounds. The island of New-York, or as it was called by the natives, Manhattan, was a favourite resort of the Hudson river tribes. Abundant evidence of this fact is found in the history of its first discovery, and the indestructible relics that every where abound, buried in the ground. Excavations in the primitive soil often expose large quantities of shells, the remnants of their "clam bakes;" and various specimens of arrow-heads, stone-axes and chisels, are found in the upper parts of the island.

From their temporary villages they went forth in search of game, and long before the white man came, the expansive bay that now reflects the sails of an hundred nations, was dotted by the humble canoes of a race, whose very name has long been lost to history. The ground that now sustains half a million of inhabitants, then hid in its forest shades the dusky forms of a few hundred wild men; and the waters that are now but the threshold of the commerce of the world, were then timidly navigated by the birchen canoe of a race who never ventured beyond the protection of its inland bounds. On the 2d of September, 1609, a beautiful autumn day, the adventurous bark of Henry Hudson made its appearance in the lower harbour. The Indians, whose fishing canoes were scattered about in every direction, attacked one of his boats which was sent out to fish, and killed its commander. They buried him

on an island, which was named after him, Colman's Island, now degenerated into Coney Island.

After this, these Indians became more friendly, and came on board, where they exchanged tobacco and Indian corn for trinkets. Hudson passed up with his vessel, (the Half Moon,) as far as the present site of Albany, and then returned to Manhattan; and after sometimes trading with the natives, and sometimes killing them, he went back to Europe again. His mutinous men forced him to go to England instead of Holland, from whence he came. The British government, which had formerly driven him from their service, now detained him, and in a subsequent voyage to North America, he was set adrift by his crew in an open boat, with his young son and seven others, without compass or food, and never heard of after. This was brought about through the treacherous agency of one of his men, whom he had formerly befriended, under circumstances that claimed lasting gratitude. Hudson was a bold and skilful navigator, and had formerly distinguished himself in his attempts to discover a North West passage to the East Indies.

The Dutch, finding that they could get furs of the North American Indians, sent out another ship to New-York, to trade with them; and in 1614, the Dutch government encouraged a company of merchants, and licensed them as the "West India Company." Soon after this the company sent out two ships, one of which was accidentally burned, but was replaced by another, which was built by her commander on the East river. After sailing along the coast to Martha's Vineyard, they returned to the Hudson river, and proceeded up to Castle Island, near Albany, where they commenced a settlement. For many years after this first settlement, Albany was the remotest point of interior civilization. In 1615, a fort was built on Manhattan Island; a few huts were soon added, to accommodate the settlers who traded with the Indians. This fort was just in the rear of the present site of Trinity Church, on the immediate bank of the river—the tide then came up to where the western wall of the churchyard

now stands. In 1751, some workmen digging in the bank, back of the church, discovered a stone wall, which occasioned great wonder at first, but was soon ascertained to be the remnants of the long forgotten fort. In 1621, the Dutch government gave the New Netherlands to their West India Company. The territory so denominated extended from Delaware river to Cape Cod. In 1623, they built a new fort, which stood on the ground now occupied by the Bowling Green, then a high mound of earth, overlooking an extensive ledge of rocks, the site of the present Battery.

There is every indication to evince the fact, that New-York was in primitive days the "city of hills"—such verdant hills, of successive undulation, as the general state of the whole country part of the island now presents. "The hills were sometimes precipitous, as from Beekman's and Peck's Hills, in the neighbourhood of Pearl, Beekman and Ferry streets, and from the Middle Dutch Church, in Nassau-street, down to Maiden lane; and sometimes gradually sloping, as on either hills along the line of the water, coursing along the region of Maiden lane. Between many of the hills flowed in several invasions of water: such as "*the canal*," so called to gratify Dutch recollections, which was an inroad of river water up Broad-street. Up Maiden lane flowed another inroad. A little beyond Peck's Slip existed a low water-course, which in high water ran quite up in union with the Collect, (Kolck,) and thence joining with Lispenard's swamp on North river side, produced a union of waters quite across the former city; thus converting it occasionally into an island, which is shown by the present lowness of the line of Pearl-street as it traverses Chatham-street. Boats were used occasionally to carry the foot passengers from either side of the high rising ground ranging on both sides of Pearl-street."

Part of the people who came out in the Tea Company's ships settled, in 1625, on an island, at what is now called the Wallabout, a word importing the waloon bend. About this time we find in the public records, that "Paulus Hook

was sold by Gov. Keift to Abraham Isaacs Plank, for 450 guilders. For scandalizing the governor, one Hendrick Janeson, in 1638, was sentenced to stand at the fort door, at the ringing of the bell, and ask the governor's pardon.

On the 6th of August, 1638, two persons were appointed to inspect "tobacco cultivated here for exportation;" and on the 19th of the same month it was ordered, that in consideration of "the high character it had obtained in foreign countries," any adulteration should be punished with a heavy penalty. In 1641, a cattle fair was established, to be held annually on the 15th of October.

The lands on "York Island," without the bounds of the town walls, along Wall-street, were either used for public grazing grounds for the town cows, sheep or swine, or else for the governor's farms, under the names of Bouwerys. The Bouwery or farm sold to Governor Stuyvesant in 1631, now so valuable as building lots in the hands of his descendants, was originally purchased by him for 6,400 guilders (£1,066;) and having besides the land, "a dwelling-house, barn, reek-lands, six cows, two horses and two young negroes."

On another farm the company erected a *wind molen* (wind-mill) for the use of the town. Its site was near the "Broadway," between the present Liberty and Courtlandt streets. The first having decayed, it was ordered, in 1662, that there be another on the same ground "outside of the city land-port (gate) on the company's farm."

In 1663, all the carmen of the city, to the number of twenty, ordered to be enrolled, and to draw for 6*d*. an ordinary load, and to remove weekly from the city the dirt of the streets at 3*d*. a load.

In 1675, the rates of tavern fare were thus ordered: For lodging 3*d*.; for meals 8*d*.; brandy per gill 6*d*.; and cider per quart 4*d*. In 1676, all the inhabitants living in the street called the Here Graft, (now Broad-street,) were required "to fill up the graft, ditch or common shore, and level the same." In this same year is given the names of all the

then property holders, amounting to only 300 names, and "assessed at $1\frac{1}{2}$ dollars a pound, on £99,695."

Luke Lancton, in 1683, was made "collector of customs at the custom house near the bridge, and none shall unload but at the bridge." The house called "Stuyvesant Huys," at the northwest corner of present Front and Moore streets, was then called the "custom house."

In 1683, it was ordered that "no youthes, maydes or other persons may meete together on the Lord's day, for sport or play, under fine of 1s." "No more than four Indian or negro slaves may assemble together." In 1683, the vessels and boats of the port were enrolled as follows:—3 barques, 3 brigantines, 26 sloops and 46 open boats. The old Dutch records show that all the rear of the town was divided into farms called "Bouwerys," from whence we have Bowery now. In 1687, sixteen acres of the Basse Bowery was granted to Arien Cornelisson, for the consideration of one fat capon a year. In 1695, the celebrated Capt. Kidd came to New-York to see his wife. He soon after this commenced his piracies, and continued them till 1699, when he visited Long Island sound, and made several deposits of money on the shores. One of these deposits was discovered a few years since by some labourers, while digging on the shores of the East river. Kidd was decoyed to Boston, where he was arrested, sent to England, and hung in 1701.

In 1698, the Council agreed to build the "new City-Hall," by the head of Broad-street, for £3,000; the same afterwards the Congress Hall, on the corner of Wall-street.

In 1699, they sold the old City-Hall to John Rodman for £920, reserving only "the bell, the king's arms, and iron works, (fettters, &c.,) belonging to the prison," and granting leave also to allow the "cage, pillory and stocks *before the same*, to be removed within one year; and the prisoners in said jail within the said City Hall, to remain one month."

"The Indians, in the year 1746, came to the city of New-York in a body, say several hundreds, to hold a

conference or treaty with the governor. They were Oneidas and Mohawks; coming from Albany, crowding the North river with their canoes; bringing with them their squaws and papouses; they encamped on the site now Hudson's Square, before St. John's church, then a low sand beach."

In 1756, the *first* stage started between Philadelphia and New-York, three days through.

In 1765, a second stage, announced to travel between New-York and Philadelphia, to go through in three days, being a covered Jersey wagon, at 2*d.* a mile.

In 1766, another stage, called "the Flying Machine," to go through in two days, "in good wagons, and seats on springs," at 3*d.* a mile, or 20*s.* through.

These extracts are principally drawn from Watson's Annals of New-York. The public records, always accessible at the City Record office, are very numerous, and will well reward the curious for their perusal.

The Middle Dutch Church, Nassau-street, was used as a "prison for 3,000 Americans." The pews were taken out and used for fuel. Afterwards the church was used as a riding school by the British cavalry. The North Dutch Church, in William-street, was also used as a prison-house, and at one time held 2,000 prisoners; all the Presbyterian churches were used for military purposes, but the Methodists' houses were spared on account of their adherence to Wesley, who was known to be a loyalist.

It is estimated that 11,000 Americans were interred from the British prisons at the Wallabout, near the present Navy Yard. In cutting down the hill for the Navy Yard, there were taken up as many as thirteen large boxes of human bones: which, being borne on trucks under mourning palls, were carried in procession to Jackson-street, on Brooklyn height, and interred in a charnel house constructed for the occasion beneath three drooping willows.

Two of the burnt hulks of the prison ships still remain sunken near the Navy Yard; one in the dock, and one, the Good Hope, near Pinder's Island.

In 1785-6, Alderman William Bayard sold his farm of fifty acres, situated on the west side of Broadway, where St. Paul's Church now stands. He divided it into lots of twenty-five by one hundred feet, and sold them at twenty-five dollars each.

The old fort at the Bowling Green was taken down in 1788, and the grounds around levelled, to the extent of the present Battery. It was then designed to build a house there for Gen. Washington, but the plan was defeated by the removal of Congress to Philadelphia. The house was afterwards built and occupied by the English Gov., Clinton, and still remains under the name of the Clinton House. The great fires which occurred in 1776 and 1778, are still remembered with lively interest. They occurred while the British held possession of the city. The fire in 1776 commenced in Whitehall slip, late at night, and consumed all the buildings west of Broadway and south of Barclay-street. Trinity Church was burnt at this time; four hundred and ninety-three houses were destroyed. The fire in 1778 occurred on Cruger's wharf, and burnt about fifty houses. The buildings destroyed on both of these occasions were of an inferior order, and built of wood.

The celebrated Negro Plot, in 1741, occurred when there were about ten thousand inhabitants in the city, of which one sixth part were negro slaves. After the lapse of a century, we look back with astonishment on the panic occasioned by these conspiracies, and the rancorous hatred that prevailed against the Roman Catholics. There was doubtless a plot; but its extent could never have been so great as the terror of the times depicted. The only testimony taken was the mutual criminations and confessions of the abettors; and by this means every negro in the city, and some of the white inhabitants, became objects of suspicion. The first suspicion of a plot was caused by frequent alarms of fire, and robberies committed on the premises of one of the citizens. The first fire destroyed the Governor's house and the old church, both of which were within the walls of the fort. A few days after this, another fire occurred under very mysterious circumstances,

and subsequently, in the space of three weeks, eight more fires served to spread great consternation among the people. Many negroes were executed, and the investigations were long and intricate.

While the trials were going on, and the execution of several negroes taking place, proclamations were made offering pardons to the free who should make discovery of the plot, or accuse others; and pardon and liberty to the slaves who should do the same; and rewards in money to both. The consequence was, that the negroes who were in jail, accused themselves and others, hoping to save their own lives and obtain the promised boons. What one poor wretch invented, was heard and repeated by another; and by degrees the story assumed the shape of a regular plot. In the course of the evidence it appears that the city was destined to be fired, and the inhabitants massacred, on coming out of the English Church in Broadway. St. Patrick's night was selected for the catastrophe, and many Irish Catholics lately arrived enlisted in the gang of murderers. The negroes were led by one Hughson, at whose house they were entertained, and where they brought their stolen goods. An unfortunate man, named Ury, an English clergyman, who had been teaching school in the city, was tried and condemned on the most trivial testimony. He was hung amid the greatest excitement. There were thirteen blacks burned alive at the stake, at a place then out of town, but situated near the present intersection of Pearl and Chatham streets, where there was formerly a hollow place. Twenty were hung "on the island by the powder-house," where the Arsenal now is in Elm-street. Seventy were transported to foreign parts; Hughson, his wife, and Peggy Carey, a noted informer, were hung. Several of the negroes declared that they had accused themselves and others because they had been told *that* was the only way to save their lives.

WASHINGTON'S RETREAT FROM NEW-YORK.

AFTER taking possession of Long Island in 1776, General Howe began to unfold his plan of attacking New-York city, then in possession of the Americans. He intended to encompass the city on the land side, and to refrain from cannonade and bombardment, by which the city might be injured and rendered unfit for the accommodation of his troops during the winter. Such being clearly the aim of the British commander, the attention of Washington was drawn to the best mode of evacuating the city. As a preparatory step, he removed beyond King's bridge the stores and baggage least wanted. It was seriously contemplated in a council of officers at the time to destroy the city, but Washington's objections overruled the opinion of his counsellors. It was resolved so to dispose the troops, as to be prepared to resist any attack on the upper part of the island, and retreat with the remainder whenever it should become necessary. Nine thousand men were to be stationed at Mount Washington, King's bridge, and the smaller posts in the vicinity of these places, five thousand in the city, and the residue to occupy the intermediate space, ready to support either of these divisions. The sick, amounting to one quarter of the whole army, were to be removed to the Jersey side of the Hudson. While these arrangements were in progress, the enemy sent four ships up the East river, which came to anchor about a mile above the city. The next day six others followed. Parties of British troops landed on Buchanan's Island, and a cannonade was opened upon a battery at Haven's Hook. On the 15th of September, in the morning, three men-of-war ascended Hudson's river as high as Bloomingdale, with the view of dividing the attention of the Americans, by making a feint on that side. At the same time, Howe embarked a strong division of his army, under Gen. Clinton, consisting of British and Hessians, at the head of Newtown Bay on Long Island. About eleven o'clock, these troops having come into the East river, began to land at

Kip's Bay, under the fire of two forty gun ships and three frigates. Batteries had been erected there ; but the men were driven from them by the firing from the ships. Gen. Washington was now at Harlæm, whither he had gone the night before on account of the movements of the enemy at Montessor's Island ; and, hearing the sound of the guns, he hastened with all despatch to the place of landing. To his inexpressible chagrin he found the troops that had been posted on the lines, precipitately retreating without firing a shot, although not more than sixty or seventy of the enemy were in sight ; and also two brigades, which had been ordered to their support, flying in the greatest confusion, it spite of their officers. It is said, that no incident of the war caused Washington to be so much excited as he appeared on this occasion. His exertions to restrain the troops were fruitless. The troops, eight regiments in all, fled to the main body on Harlæm plains. The division in New-York, under the command of Gen. Putnam, retreated with difficulty, and with considerable loss. Fifteen men were killed, and three hundred taken prisoners. Nearly all the heavy cannon, and a considerable quantity of baggage, stores and provisions were left behind. The Americans were not pursued with much rigour in their retreat. Washington drew all his forces together within the lines on the heights of Harlæm, where they encamped the same night. Head quarters were fixed at Morris's house, a mile and a half south from Mount Washington, on which was situated the fort of that name. Howe encamped with his army near the American lines, his right resting on the East river, and his left on the Hudson, supported at each extreme by the ships in these rivers. The next morning, Col. Knowlton went out with a party of rangers, and advanced through the woods towards the enemy's lines. When he was discovered, Gen. Howe detached two battalions of light infantry and a regiment of Highlanders to meet and drive him back. On the appearance of these troops in the open grounds between the two camps, Washington rode to the outposts, that he might be at hand to make such arrangements as circumstances should require.

He had hardly reached the lines when he heard a firing, which proceeded from an encounter between Col. Knowlton and one of the British parties. The rangers returned and said that the body of the enemy, as they thought, amounted to three hundred men. Knowlton was immediately reinforced by three companies, and ordered to gain their rear, while their attention was diverted by making a disposition to attack them in front. The plan was successful. As the party approached in front, the enemy rushed down the hill, to take advantage of a fence and bushes, and commenced firing, but at too great a distance to be effectual. Meantime Knowlton attacked on the other side, and advanced with spirit. A sharp conflict ensued. Maj. Leitch, who led the attack, was carried off mortally wounded, and in a short time Col. Knowlton fell. The action was resolutely kept up by the remaining officers and men till detachments arrived to their support, and they charged the enemy with such firmness and intrepidity as to drive them from the wood to the plain, when Gen. Washington ordered a retreat, apprehending that a large force was on their way from the enemy's camp. The engagement continued four hours, although the sharp fighting was of short duration. Howe reported eight officers and seventy privates wounded, and fourteen men killed. The American loss was fifteen killed and forty-five wounded. The events of this day were important in giving spirit to the army. For more than three weeks Howe's army remained inactive, the American posts being too formidable to attack. On the 28th October the British army attacked the American lines, and after a sharp action drove them from their works, with a loss of twenty-five men. Gen. Howe subsequently withdrew his army to King's Bridge, and on the morning of November 16th attacked Fort Washington, after Col. Magow, its commander, had refused a summons to surrender. Gen. Knyphausen advanced with a body of Hessians to the north of the fort, and commenced the attack. Earl Percy, nearly at the same time, assailed the outer lines on the south. The lines, in every part, were defended with

great resolution and obstinacy ; but after a resistance of four hours the men were driven into the fort, and its commander compelled to surrender. The Americans lost fifty killed and two thousand eight hundred prisoners. This was a severe loss. The fort was defended contrary to the wishes of Washington. Washington soon after this abandoned the Hudson river, and retreated through New-Jersey to the Delaware river.

THE OLD JERSEY PRISON SHIP.

THIS was an old sixty-four gun ship, which through age had become unfit for further active service. She was stripped of every spar, and all her rigging. After a battle with the French fleet, her lion figure-head was taken away to repair another ship ; no appearance of ornament was left, and nothing remained but an old, unsightly, rotten hulk. Her dark and filthy external appearance perfectly corresponded with the death and despair that reigned within, and nothing could be more foreign from truth than to paint her with colours flying, or any circumstance or appendage to please the eye. She was moored about three quarters of a mile to the eastward of Brooklyn ferry, near a tide-mill, on the Long Island shore. The nearest distance to land was about twenty rods. And doubtless no other ship in the British navy ever proved the means of the destruction of so many human beings. It is computed that not less than eleven thousand American seamen perished in her.

We extract from a book published by Mr. Andros, an aged clergyman, an account of his sufferings on board of this ship :

“ On the commencement of the first evening we were driven down to darkness between decks, secured by iron gratings and an armed soldiery ; and now a scene of horror, which baffles all description, presented itself. On every side wretched, desponding shapes of men could be

seen. Around the well-room an armed guard were forcing up the prisoners to the winches, to clear the ship of water and prevent her sinking, and little else could be heard but a roar of mutual execrations, reproaches and insults.

"All the most deadly diseases were pressed into the service of the king of terrors, but his prime ministers were dysentery, small pox and yellow fever. There were two hospital ships near to the old Jersey, but these were soon so crowded with the sick that they could receive no more. The consequence was, that the diseased and the healthy were mingled together in the main ship. In a short time we had two hundred or more, sick and dying, lodged in the fore part of the lower gun deck, where all the prisoners were confined at night. Utter derangement was a common symptom of yellow fever; and, to increase the horror of the darkness that shrouded us, (for we were allowed no light betwixt decks,) the voice of warning would be heard, 'Take heed of yourselves; there is a mad-man stalking through the ship with a knife in his hand.' I sometimes found the man a corpse in the morning by whose side I laid myself down at night. While so many were sick with raging fever, there was a loud cry for water, but none could be had except on the upper deck, and but one allowed to ascend at a time. The suffering then, from the rage of thirst during the night, was very great. Nor was it at all times safe to attempt to go up. Provoked by the continual cry for leave to ascend, when there was already one on deck, the sentry would push them back with his bayonet. By one of these thrusts, which was more spiteful and violent than common, I had a narrow escape of my life. In the morning the hatchways were thrown open, and we were allowed to ascend, all at once, and remain on the upper deck during the day. But the first object that met our view in the morning was a most appalling spectacle—a boat loaded with dead bodies, conveying them to the Long Island shore, where they were very slightly covered with sand. I sometimes used to stand to count the number of times the shovel was filled with sand to cover a dead body; and certain I am that a

few high tides or torrents of rain must have disinterred them ; and had they not been removed, I should suppose the shore, even now, would be covered with huge piles of the bones of American seamen. There were, probably, four hundred on board who had never had the small pox—some, perhaps, might have been saved by inoculation. But humanity was wanting to try even this experiment. Let our disease be what it would, we were abandoned to our fate. Now and then an American physician was brought in as a captive, but if he could obtain his parole he left the ship, nor could we much blame him for this, for his own death was next to certain, and his success in saving others by medicine, in our situation, was small. No English physician, or any one from the city, ever, to my knowledge, came near us. The most healthy and vigorous were first seized with the fever, and died in a few hours.

“There is one palliating circumstance as to the inhumanity of the British, which ought to be mentioned. The prisoners were furnished with buckets and brushes to cleanse the ship, and with vinegar to sprinkle her inside ; but their indolence and despair were such that they would not use them, or but rarely ; and, indeed, at this time, the encouragement to do it was small, for the whole ship, from her keel to the taffrail, was equally infected, and contained pestilence sufficient to desolate a world ; disease and death were wrought into her very timbers. At the time I left, it is to be presumed, a more filthy, contagious and deadly abode for human beings never existed among a Christianized people.”

In addition to the testimony of Mr. Andros, we have that of an aged gentleman, who confirms the statement made in Andros's book. He says he was an officer on board of the United States frigate *Confederacy*, and was captured by two English frigates. Being at the time of capture sick, he was put on board one of the hulks in the Wallabout that served as an hospital ship for convalescents, but was, as soon as somewhat restored, transferred to the “Old Jersey,” to make room for others more helpless. Here he experienced all the sufferings, and witnessed the

horrors described by Andros, for five months. The confinement in so crowded a place, the pestilential air, the putrid and damaged food given to the prisoners, (procured by the commissaries for little or nothing, and charged to the English government at the prices of the best provisions,) soon produced a fever, under which this young man suffered, without medicine or attendance, until nature, too strong for even such enemies, restored him to a species of health, again to be prostrated by the same causes. He says he never saw given to the prisoners one ounce of wholesome food. The loathsome beef they prepared by pressing, and then threw it, with damaged bread, into the kettle, skimming off the previous tenants of this poisonous food as they rose to the top of the vessel.

And these commissaries became rich, and revelled in luxuries, hearing the groans of their victims daily, and seeing the bodies of those who were relieved from torture by death, carried by boat loads to be half-buried in the sands of the Wallabout. The testimony proving these atrocities cannot be doubted. Yet, in answer to the remonstrances of General Washington, Admiral Arbuthnot denied the charge altogether.

To save his life, the prisoner who gives this account accepted the offer of the purser to become his deputy, in which office he fared well and recovered his health. He witnessed a mode of cheating practised by the clerks and underlings, not less criminal than that of the commissaries of prisoners. Such of the captives as had money were liberated by bargain with these officials, and returned on the report as dead; and the deaths were so many, that this passed without inquiry.

A boat would be brought to the ship at night, and by a system of collusion, the person who had bought his liberty would be removed on some specious pretence. Faith was kept with them to encourage others in the same process.

The old prison ship was sunk after the Revolution, and now remains under water, off the present Navy Yard. But a few years since, part of her hull was seen above water at low tide.

YELLOW FEVER AND CHOLERA.

IN 1778, the yellow fever broke out in this city, and continued its ravages under more distressing circumstances than at any subsequent appearance of the disease. The first victim died on the 29th of July, in Front-street,—his disease assuming the most malignant form. It raged with great violence in New Slip, in Cliff-street, John-street and Rider-street, where not a family escaped its ravages. It was thought at the time that it had its origin in some unfinished docks, in which putrid matter existed. On the 12th, 13th and 14th of August, there were heavy showers of rain, which covered the streets knee deep, and filled many cellars. This, instead of abating the pestilence as was anticipated, seemed to increase it. From this time till the middle of September, the daily deaths fluctuated from 20 to 60. The fever entirely ceased about the 10th of November. The whole number of deaths was estimated at two thousand and eighty-six. More than one half of the population left the city soon after the first appearance of the disease. Most of the places of public business were removed far out of town, away from the infected districts.

In July, 1803, the yellow fever again made its appearance in New-York, and continued till the end of the following October. About six hundred deaths occurred at this time. The alarm of the people was very suddenly produced, and the suspension of business and the desertion of the city, far exceeded that of any former occasion.

In 1805, about four hundred people died from yellow fever; and in 1822, twelve hundred and thirty-six more fell victims to its ravages.

In July, 1832, the Asiatic Cholera made its appearance in New-York. It commenced July 2d, and continued till October 19th. During this time the average of deaths per day was about sixty. The whole number of deaths was four thousand three hundred and sixty.

General Description of New-York.

NEW-YORK CITY, from its wealth, population and commercial importance, has been justly called the Metropolis of the United States. It is the largest city in America—the second, in commercial importance on the globe, and is not exceeded in population by more than five cities in all Europe. With unequaled advantages as to central position, and long established commercial precedence, with one of the finest harbours in the world, and possessing great natural facilities of inland communication, it must ever maintain its position as the London of America. At its present rate of increase, its population, in fifty years, will exceed that of any city in the world. All history does not furnish another instance of such rapid growth.

The compact part of the city occupies the southern extremity of Manhattan, or New-York Island, at the confluence of the Hudson river with a strait called East river, which connects Long Island sound with the harbour of New-York. The chartered limits of the city embrace the whole island, which is of the same extent with the county. The island extends from the Battery, on the south point of the island, $13\frac{1}{2}$ miles to King's Bridge, in its north part; and has an average breadth of one mile and three fifths. The greatest breadth is on a line with 88th street, where it is $2\frac{1}{2}$ miles wide. The island contains 14,000 acres. It is separated from the main land, on the north, by Harlem river, a tide-water strait, which flows between the Hudson and East rivers. The Harlem river is crossed by three bridges, the Harlem rail-road, and the Croton aqueduct. The East river separates the city from Long Island on the east; on the south is the harbour, and on the west is the Hudson river, with the State of New-Jersey on the opposite shore.

The surface of the island was originally uneven and rough, as is now the case in the northern parts, with occasional low valleys and marshy swamps; but the hills in the southern part of the island have been levelled, and the swamps and marshes filled up. Many creeks and inlets on the margins of the rivers have also disappeared, and the large ledge of rocks that occupied the site of the present Battery has long since been buried by made ground. The water line has been materially altered from what it was. A large part of Water, Front and South streets, on the East river, and of Greenwich, Washington and West streets, on the Hudson river, occupy made ground.

The city extends over three miles on each river, and the compact part has a circumference of over nine miles. In latter times, care has been taken to lay out the streets straight, and of an ample width. This is particularly true of all the northern part of the city, which was laid out under the direction of Gouverneur Morris, De Witt Clinton and others, and surveyed by Mr. John Randall, jr. The survey was completed in 1821, after having occupied ten years. No city can exhibit a more beautiful plan than this portion of the city of New-York, which extends to 154th street, about ten miles north of the Battery.

The island is mostly composed of granite, which is generally buried from 10 to 15 feet under ground. The superincumbent earth is composed of drift sand and pebbles, with large quantities of oxide of iron, which gives it a red colour. The rocks crop out, and appear on the surface, in the upper parts of the island, to a considerable extent. The soil for the most part is fertile, but from the abundance of rocks, hard to cultivate. The island was originally covered with a very large growth of wood.

The harbour of New-York is safe and commodious, its circumference being about 25 miles. The largest vessels may come up to the wharves.

On the Bar at Sandy Hook, the depth of water at high tide is 27 feet; from thence to the city, the channel is from 35 to 50 feet. The inner harbour communicates with the outer, or Raritan Bay and the ocean, by the Narrows, a

NEW-YORK PACKET SHIP, OFF THE QUARANTINE.

passage between Staten Island and Long Island, and by a strait, called Staten Island sound, or the Kills, which empty into Raritan Bay, on the west. There are three islands in the harbour, namely : Bedlow's, Ellis's and Governor's, all strongly fortified, and owned by the United States government. United States criminals are hung on Bedlow's island. Governor's island, opposite the Battery, has three forts, and contains 70 acres. Castle William on the north-west side, is a large round structure, 200 feet in diameter, 60 feet high, and mounts three tiers of guns.

ENVIRONS OF NEW-YORK.

THE principal place in the neighbourhood of the city is Brooklyn. This city will be particularly described hereafter.

WILLIAMSBURG,

A recently built town, situated on the East river, northeast of Brooklyn, and opposite the northeast part of New-York, with which it has frequent communication, by means of several steam ferry-boats. Population in 1840, 5,034 ; in 1845, 11,338. Its chief buildings are, a town hall and seven churches, together with handsome private dwellings.

ASTORIA,

A flourishing village of Queen's county, six miles north-east from New-York. It has a population of about 750—with four churches, an academy, and an extensive botanic garden. It occupies a beautiful position on Long Island sound, near that remarkable whirlpool, called by the Dutch, *Helle Gat*, "*Hell Gate*." Astoria is one of the favourite summer residences of the New-Yorkers.

FLUSHING,

An incorporated town of Long Island, situated on Flushing Bay, an arm of Long Island sound. Population

about 2,000. This is the seat of several literary institutions, as St. Paul's College, St. Thomas's Hall, St. Ann's Hall, &c. The Linxan Botanic Garden is here. These, and other advantages, render Flushing one of the most attractive places of resort on the island. It is about ten miles distant from New-York.

JAMAICA,

A large and well built town of Queen's county, eleven miles from Brooklyn, with a population, according to the late census, of 1,650. Its chief buildings, besides those of the county, are five churches, one academy, eight hotels and taverns, and several manufactories of pianos and carriages. The Long Island Rail-Road Company have a large depôt and machine shop here. Constant communication with Brooklyn, Flushing, Hempstead, Rockaway, &c., is afforded by the rail-road or stages, which ply in all directions. *Jamaica Bay*, five miles south from the town, abounds in wild fowl, oysters, clams, &c.

ROCKAWAY BEACH,

A celebrated watering place, on the shore of the Atlantic Ocean, twenty-two miles southeast from New-York.

There are, in addition to the "Marine Pavilion" and "Rock Hall," both well kept, several private establishments; where, with less parade and show of style, the invalid may enjoy the refreshing sea air and bath in their utmost perfection, and at a moderate expense; while those who inhabit the former are expected, and expect to pay liberally for their extravagant accommodations.

FLATBUSH,

A neat village of King's county, four miles southeast from Brooklyn; containing 450 inhabitants. Near this village, in August, 1776, was fought the disastrous and memorable battle of Long Island, between the American and British forces.

CONEY ISLAND,

A bathing place of great resort, and forms a part of Gravesend township.

PORT HAMILTON.

This fortress, which, in connection with forts Lafayette and Tompkins, commands the Narrows, is situated on the western end of Long Island, and about 8 miles nearly due south from New-York. A small assemblage of houses has grown up around it, including one church and an extensive boarding house. It has recently become a place of fashionable resort, chiefly for the convenience of sea bathing.

NEW-BRIGHTON AND STATEN ISLAND,

A village of country seats, erected for the accommodation of some of the "best society" of New-York. It occupies the most northern point of Staten Island, at the entrance of the "Kills," which separate the island from the Jersey shore. The town plot, which for the most part is the result of expensive excavation, descends rapidly from the base of the adjoining hills, and the buildings range in a line with, and at nearly an equal distance from the margin of New-York bay. The situation is very fine, commanding a view of the bay, with its islets, the city, Long Island, &c. The houses, with their white fronts and massive columns, present a beautiful appearance from the water. There are two extensive hotels and several boarding houses. Population about 400. A short distance to the west stands the Sailors' Song Harbour, a sort of Greenwich Hospital or Asylum for superannuated mariners. It consists of a large building with wings, so arranged as to accommodate a large number of inmates. Two miles east of Brighton lie the *Quarantine Ground*, the *Marine Hospital*, and *Tompkinsville*. The latter is a large town, containing upwards of 1,400 inhabitants, three churches, several hotels, and beautifully situated on the high ground in the rear of fort Tompkins. Attached to the Quarantine establishment are, the Marine Hospital, for the reception of patients afflicted with contagious diseases; a Yellow Fever Hospital; a Small Pox Hospital; besides several other buildings for the Physician, Health Officers and others.

Steam-boats leave the lower part of the city every hour

during the day for New Brighton, the Quarantine Ground, and Tompkinsville.

JERSEY CITY,

On the west side of the Hudson, opposite New-York, situated on a point or cape, formerly called Paulus Hook. The city is regularly laid out, with the streets, which are generally wide, crossing each other at right angles. The public buildings are, four churches, a lyceum, academy, high school, a bank, a pottery, glass factory, and about 300 private dwellings. Population, 3,072. The New-Jersey Rail-Road Company have an extensive depôt here; and the Morris Canal, from Bordentown, intersects the Hudson in the lower part of the city.

HARSHMUS

Is a small village directly in the rear of Jersey City, containing 125 inhabitants.

HOBOKEN,

A new village of Hudson county, New-Jersey, containing about 200 inhabitants, an Episcopal church, and several public houses. Hoboken is much frequented by the citizens of New-York. The "Elysian Fields," so called, contain some beautiful walks. A fine view of the city may be had from the high grounds of Hoboken. Hoboken has recently acquired additional notoriety, as the scene of a most shocking tragedy, in which a young girl, Miss Rogers, was murdered by some unknown hand. The village of *West Hoboken*, situated on the summit of Bergen Hill, commands a fine view of the city and harbour.

WERHAWKEN,

A small settlement on the Jersey shore, consisting of some twenty or thirty buildings; beautifully situated, about two miles north of Hoboken, on an elevated bluff of the Hudson.

BLOOMINGDALE,

A remarkably neat village of New-York county, situated on the left bank of the Hudson, five miles above the City.

Hall. An Orphan's Asylum is established here. The village consists chiefly of country seats, and contains some 400 inhabitants. About two miles beyond Bloomingdale, on the same side of the river, is

MANHATTANVILLE,

Containing about 500 inhabitants, an Episcopal church, and some extensive factories. The New-York Lunatic Asylum occupies a commanding position in the southern part of the village.

HARLEM

Is situated two miles southeast of Manhattanville, on Harlem river, near its discharge into Long Island sound. It is a flourishing village, with a population of 1,500, four churches, and a superabundance of hotels, besides a commodious depôt, belonging to the New-York and Harlem Rail-Road Company, and several factories. The cars for Harlem start every hour from the depôt, northeast of the City-Hall.

NEWARK.

This is by far the largest, and as a manufacturing place, the most important town, or rather city, for it is organized as such, in the state of New-Jersey. Its population, according to the census of 1840, is 17,292, a large portion of which is engaged in the various manufactories, which abound here to an unusual extent. Newark was first settled in 1666, by people from New-England.

The Passaic, here a beautiful stream, flows along the eastern side of the town, and gradually curves towards the east, in its passage into Newark bay, three miles distant from the city. Its streets and avenues are wide, and shaded by an abundance of trees, which add greatly to the beauty of the city and the comfort of its citizens. The many manufacturing establishments in and about the place, give it an active and business-like appearance.

Besides the factories, most of which are on a large scale, there are several breweries, grist and saw mills, dyeing houses, and printing offices, each of which issues a newspaper, &c. There are schools innumerable, academies,

and several literary and scientific institutions. Of churches, the Episcopalians have two; the Presbyterians five; the Baptists two; the Dutch Reformed one; the Methodists three, and the Roman Catholics one. The other public buildings are the court house, county offices, three banks, and the immense depôt of the New-Jersey Rail-Road Company.

ELIZABETHTOWN,

A beautiful town, situated on Elizabeth creek, in Essex county, containing about five hundred buildings and 3,000 inhabitants. It is a borough town, and one of the oldest in the state, its site having been purchased from the Indians by a company from Long Island, as early as the year 1664.

There is in this town an unusual proportion of handsome dwellings and churches; which, with the wide and regular streets, impart an air of great neatness and beauty to the place, and render it a very desirable residence.

The Elizabethport and Somerville Rail-Road, as well as that from Jersey City to New-Brunswick, passes through the town. These, with turnpikes and several good common roads, afford extensive facilities for conveying to market the agricultural products and manufactures of the town and adjacent country.

RAHWAY,

A large and thriving town of Essex and Middlesex counties, formed by the union of several villages,—population is 2,533, originally from New-England. The Presbyterians, Methodists, Baptists and Friends, have places of worship here. Those of the Presbyterians and Episcopalians are beautiful structures. Among the liberal institutions of the place, which possesses many, there are a public library, an "Athenæan Academy," so called, a fine building, erected by a company expressly for the institution, which partakes, in some measure of the nature of a high school. Rahway is a large manufacturing place. Establishments on an extensive scale are in daily operation here. The manufactures consist of silk printing, carriages and carriage furniture, hats, shoes, clothing, clocks, earthenware and cotton goods.

NEW-BRUNSWICK.

This place is situated in the counties of Somerset and Middlesex, and is the seat of justice of the latter. It is an incorporated city, and next to Newark the largest town in the state. Its population is 6,693, and the number of buildings is about 1,200.

PASSAIC FALLS.

This is a beautiful sheet of water, which presents an unbroken fall of fifty feet. It is situated at the town of Paterson, on the Passaic river, whose banks here are nearly vertical. The water in its passage, through the lapse of ages, has worn a deep chasm into the solid rock, which is obviously retreating, as the abraded banks below testify. No spectacle can be more imposing than is presented by the falling water, as it glides gently over the brow of the precipice. The town of Paterson is admirably situated for manufacturing purposes at the falls, which afford a constant and abundant supply of water for the vast number of factories in operation in the town, which is now one of the most important manufacturing places in the United States. The number of buildings at present in Paterson and New Manchester, an adjoining village, is upwards of one thousand, and that of the inhabitants, 7,598. Here are Presbyterians, both of the old and new schools; Dutch Reformed, Roman Catholics, Episcopalians, Baptists, Methodists, Seceders, Lutherans, Friends, Universalists, Unitarians, &c. There are in the town a society for the promotion of literature and science, which has an excellent Library, a Mechanics' Institute, a Museum, a Circulating Library, a Public Library, and some other institutions of a similar description.

ELIZABETHPORT,

A very neat and flourishing village of New-Jersey, which has recently started into notice; being at the eastern terminus of the Elizabethport and Somerville Rail-Road, now in operation. Population about 600.

PERTH AMBOY,

A city and port of entry of Middlesex county, New-Jersey, at the confluence of Raritan river and Staten Island sound. Population 1,303. It derives its name in part from James, Earl of Perth, one of the original proprietors of the ground, which was laid off into town lots in 1683, and incorporated in 1784. A large portion of the buildings are elevated forty or fifty feet above the adjacent bay.

The Brighton House, a large hotel, erected here several years since, forms a striking object of attention. Like many other "experiments," the hotel failed to realize the expectations of its proprietors; and it is now occupied, during the summer months, by wealthy families from New-York.

FORT LEE.

This fort, which, with Fort Washington, on the opposite side of the river, was the scene of important military operations during the revolutionary war. A large body of American militia stationed here, in attempting to retreat, were overpowered by a vastly superior force, consisting chiefly of Hessians, when they were either slain or consigned to the prison ship, a fate more terrific than death itself. The site of Fort Lee is upwards of 300 feet above the water. A hotel at the landing is much frequented. A few miles below Fort Lee commence the Palisades, a lofty basaltic wall, which extends for twenty miles up the west bank of the Hudson. They are nearly vertical, and range from 200 to 500 feet in height.

SPUYTEN DUYVEL CREEK,

An inconsiderable opening on the east side of the Hudson, which, with Harlem river, separates the island of New-York from the main land of Westchester county.

KING'S BRIDGE,

A sort of rialto among the New-Yorkers, crosses the strait a short distance from the Hudson.

YONKERS,

A pleasant village of Westchester county, situated at

CITY HALL.

PAGE 17

the outlet of Saw-Mill Creek. It is built mostly on the river bank, which, being somewhat elevated, commands a fine view of the river and the Palisades opposite. Besides the two churches, an academy and several taverns and storehouses, there are upwards of 75 dwellings, and a population of about 500.

HASTINGS,

A small village and landing, of the same county, consisting of 15 or 20 buildings, of various sorts, including one hotel, a button factory, &c.

DOBE'S FERRY

Is a small settlement and public landing in Westchester county, with a ferry to the opposite side of the Hudson.

PIERMONT, FORMERLY TAPPAN SLOAT.

This village having been selected for the eastern terminus of the New-York and Erie Rail-Road, the secluded little Dutch settlement of the "Sloat" has received the classic *soubriquet* of "Piermont," and is now an important town of Rockland county. Such has been the effect of this movement, that its site is now covered by handsome public and private edifices, which form a striking contrast with the little Dutch houses of its primitive inhabitants.

There are in the town upwards of 150 buildings, including two or three churches, and a population of about 1,100. A pier about one mile in length, which forms the commencement of the rail-road just mentioned, extends over the flats to a commodious dock, near the channel of the river.

PUBLIC BUILDINGS.

CITY-HALL.

THE City-Hall is one of the most prominent buildings in New-York, standing near the centre of the Park, an area of about ten acres. From this situation it is seen in every direc-

tion to great advantage; a few years since it was regarded as the finest building in the city, and now, with its interesting furniture and associations, commands great attention. The front and ends are made of white marble, from Stockbridge, Mass., but the back is constructed of free-stone. At the time it was built marble was expensive, and it was determined to finish the back with cheaper stone. It was maintained that the population would never, to any extent, settle above Chambers-street, and therefore the rear of the hall would seldom be seen. The corner stone was laid on the 26th of September, 1803, during the prevalence of the yellow fever. It was finished in 1812, and the expense, exclusive of furniture, amounted to half a million of dollars.

The City-Hall is 216 feet long, 105 wide, and 51 high. It is two stories high above the basement, with a third or attic story in the centre building. From the centre rises a cupola of very beautiful proportions. In the upper part of the cupola a man is lodged, whose business it is to give alarm in case of fire, by ringing the big bell, which occupies a small cupola on the back part of the roof. This bell is rung in cases of fire, when it indicates, by the number of its strokes, the part of the city where the fire is located. Small apertures are cut in the sides of the cupola, of sufficient size to allow of the eyes extending over only so much of the city as is included in the fire districts to which they severally belong, and thus the location of the fire is instantly ascertained. The City-Hall bell weighs 6,910 lbs., and its tongue is over six feet long. It is probably the largest bell in America. There are four entrances to the building—one in front, one in the rear, and one in each end—the latter communicates with the basement apartments. The front entrance is on the first story, to which there is access by a flight of twelve marble steps, surmounted by a portico of sixteen columns. In the centre of the rear of the building there is a projecting pediment. The first story, including the portico, is of the Ionic style, the second of the Corinthian, the attic of the fancy, and the cupola of the composite. The rear of the building is by many considered to be more beautiful than the front. In the centre

THE TOWNS, OR HALLS OF JUSTICE,

Centre Street.

there is a double staircase, ascended by marble steps, at the top of which is a circular gallery, ornamented with ten marble columns, which support the ceiling. In the building there are twenty-eight offices and public rooms. The Governor's room is a long hall, running 52 feet from wing to wing; it is used as a reception hall by the Governor, Mayor, and other distinguished men. Its walls are hung with some of the finest pictures in America, consisting principally of portraits of great national characters. Among them are the Governors of New-York, Mayors of the city since the Revolution, some of the Dutch Governors, and the principal naval and military heroes of the late war. These were painted by Jarvis, Sully, Stewart, Inman, Page, and some other distinguished artists. The Common Council hall is a beautiful room, 42 feet long and 30 wide. It contains some fine portraits, and the chair which was occupied by Washington when President of the first Congress. The Assistant Aldermen's hall is spacious, elegantly furnished, and hung with valuable paintings. Access to these rooms and the roof, free of expense, may be had by any person, by inquiring at the keeper's room. The keeper has no right to ask for remuneration, as he receives a salary from the city to attend to this business. The City-Hall, with its many interesting relics and paintings, is much visited, and is well worthy the attention of the stranger and citizen.

HALL OF RECORDS.

This building, situated in the Park, east of the City-Hall, was formerly a city prison, when it presented a very gloomy and unsightly appearance, being built of coarse black stone. It has since been stuccoed in imitation of marble, and two lofty porticoes added, consisting of four marble Ionic columns at each end. Its name indicates its present use. It was used during the time of the prevalence of the cholera, in 1832, as a hospital.

HALLS OF JUSTICE.

This building occupies the space between Centre, Elm,

Leonard and Franklin-streets, the site of the old Collect, a filthy pond, which had its outlet through Canal-street. The Hall of Justice is a much admired specimen of modernized Egyptian architecture. It is built of light granite from Hallowell, Maine. It is 253 feet long, and 200 wide, and occupies the four sides of a hollow square, with a large centre building within the area. The front is approached by eight steps, leading to a portico of four massive Egyptian columns. The windows, which extend to the height of two stories, have massive iron grated frames, surmounted with cornices, ornamented with a winged globe and serpents. The two fronts on Leonard and Franklin-streets, have each two entrances, with two massive columns each. The gloomy aspect of this building, has won for it the general name of "The Tombs." It is occupied by the Court of Sessions, a police court, and some other court rooms, beside a male and female prison for city offenders, awaiting trial. State criminals are hung in the open court within the walls.

The house of detention is a distinct and isolated building, 142 feet in length, by 45 in width. It contains 148 cells. The lower cells are 6 feet 9 inches wide, 11 feet high, and 15 feet long, diminishing 18 inches in length in each story. They are provided with cast-iron water closets, hydrant, water cock ventilators, and are warmed by hot water pipes. Every part of the building is constructed in the most substantial manner, and with particular reference to the security of prisoners. The building was finished in 1838. The female department is entered from Leonard-street. It is superintended by a matron, who keeps it in the most perfect order and neatness. She is very attentive to visitors, who can always have gratuitous access, between 10 A. M. and 2 P. M. The male prison opens on Franklin-street. Persons can gain admittance here on application for a written permit, at the keeper's room, between 10 A. M. and 5 P. M.

CUSTOM HOUSE.

This building equals any in the world, both in the beauty

CUSTOM HOUSE, WALL STREET.

of its design and the durability of its construction. It is situated on the corner of Wall and Nassau streets, and occupies the ground where once stood the old Federal Hall, the scene of Washington's inauguration. The building is in the form of a parallelogram, 200 feet long by 90 wide, and about 80 feet in height. Brick, granite and marble were used in its construction; but its outside is entirely of marble from Massachusetts, except the steps. It is designed in imitation of the Parthenon at Athens, in the Doric order. At the southern end on Wall-street, is a portico of eight purely Doric columns, 5 feet 8 inches in diameter, and 32 feet high; and on the opposite end, on Pine-street, is a corresponding portico; on each side are 13 pilasters, in keeping with the front pillars. The front portico is ascended by 18 granite steps. The interior is divided into a grand rotunda and numerous spacious rooms for the accommodation of officers. The rotunda is a magnificent room, 60 feet in diameter; the dome supported by 16 Corinthian columns, 30 feet high. These columns are beautifully wrought,—the capitals being of most exquisite Italian workmanship. The largest blocks of marble used in the building weigh 33 tons. The ceilings of the apartments are arched, and richly ornamented with stucco. The roof is of marble; the slabs weigh over 300 pounds, and lap over each other eight inches, to allow of the expansive power and to keep out water. There is not a particle of wood in any part of the building, and it is probably the only structure in the world, that has been erected so nearly fire proof. The building was commenced in May, 1834, and finished in May, 1841. The cost, ground included, was \$1,195,000—building alone, \$950,000. The architect was John Frazee. The exquisite ornamental work was designed and executed by Horace Kneeland, since become famous as a sculptor. The number of officers employed in the Custom House is 354, of whom nearly 200 are inspectors. The Custom House may be visited by the stranger any time during the day, from 10 A. M. to 3 P. M. He will do well to enter at the side door in Nassau-street, and from thence ascend to the roof, inspecting the various rooms as he goes up.

The key of the roof scuttle may be had by inquiring at any of the offices on the upper floor. There is no objection to the stranger's visiting any part of the building. The roof commands a fine view of the harbour.

MERCHANT'S EXCHANGE.

The Merchant's Exchange is located between Wall-street, Exchange-Place, William and Hanover streets. It is built in the most substantial form, of blue Quincy granite, and is 200 feet long by 171 to 144 feet wide, 77 feet high to the top of the cornice, and 124 to the top of the dome. The front on Wall-street has a recessed portico of 18 massive Grecian Ionic columns, 38 feet high and 4 feet 4 inches in diameter, each formed from a solid block of stone, and weighing 45 tons. Besides numerous rooms for various purposes, the rotunda in the centre is 80 feet in diameter, with four recesses, making the length and breadth each 100 feet, the whole 80 feet high, surmounted with a dome, resting in part on eight Corinthian columns of Italian marble, 41 feet high, and lighted by a skylight 25 feet in diameter. The granite columns cost \$3,000 each. They are the largest whole columns in the world, with the exception of a church in St. Petersburg. The rotunda is 80 feet in diameter, and will hold 3,000 persons. The architect was Isaiah Rogers. The building cost a little more than a million of dollars. It belongs to a corporation,—and has been so far a losing investment, although its rooms command enormous rents. It contains a very extensive reading room for merchant subscribers, accessible only to the stranger by introduction from a member. The Chamber of Commerce holds its sessions here, and the Board of Brokers occupy the rotunda at certain hours of the day. The stranger may visit all parts of the building.

POST OFFICE.

The Post Office building, formerly the Middle Dutch Church, is situated in Nassau-street, between Cedar and Liberty streets. This building has stood over a hundred and fifty years—and nine generations have worshipped at its

MERCHANTS' EXCHANGE.

Wall Street.

altar. It is not generally known, that its steeple, and much of its interior wood work, was brought from Holland. During the Revolutionary war, most of the churches were used by the British, and many of them much injured, but this church suffered most, being used successively as a riding school, a prison and a hospital. In 1790, it was repaired and used for public worship again. The United States government have recently converted it into a Post Office, paying for its use the annual rent of five thousand dollars. It now presents the appearance of a Post Office in the heart of a grave yard; a circumstance quite characteristic of New-York enterprise. The numerous signs which appear on the building, point out the various points of communication with the interior. Its internal arrangements are very extensive and commodious. The Postmaster's room is so situated that he can see every thing going on in the building. Office hours from 8 A. M. to 7 P. M. On Sundays, from 9 to 10 A. M., and from 12½ to 1½ P. M. There are Penny Postmen attached to the office, who go their rounds twice a day, and deliver letters and papers to all who request them.

THE ROTUNDA.

This classical edifice, which (as the word imports) is of a circular form, both internally and externally, was erected in the summer of 1818, for the exhibition of large panoramic paintings. It fronts in Chambers-street, near the head of Cross-street, occupying ground belonging to the corporation, which was granted to the projector, Mr. John Vanderlyn, the celebrated artist, free of rent for ten years, on condition that the building should devolve to the city at the expiration of that time. It is constructed of brick, is fifty-three feet in diameter, and forty feet in height, surmounted with a pantheon-shaped dome and skylight, through which the interior is lighted.

It has a portico, supported by four columns, fronting on the Park, which gives it an imposing appearance. It was for some years occupied by the Marine Court, and subsequently by the City Post Office. It is now occupied by

the New-York Gallery of Paintings, who have its use from the corporation rent free.—*See Department of Fine Arts.*

NEW-YORK UNIVERSITY.

Situated between Washington Place and Waverly Place, fronts Washington Square towards the west, forming a noble ornament to the city, being built of Westchester marble, and exhibits a specimen of the English collegiate style of architecture.

The building is 180 feet long and 100 wide. It was founded in 1831.

In front this oblong is divided into five parts—a central building, with wings flanked by towers, one rising on each of the four corners of the edifice. This central building or chapel is superior to the rest in breadth, height and character, and is somewhat similar to that of King's College, Cambridge, England—a masterpiece of pointed architecture, and a model for succeeding ages. It is fifty-five feet broad and eighty-five feet deep, including the octangular turrets, one of which rises at each of the four corners. The two ends are gabled, and are, as well as the sides, crowned with an embattled parapet. The chapel receives its principal light from a window in the western end. This window is twenty-four feet wide and fifty high. It has eight lights and two embattled transoms. From the central building, or chapel, wings project right and left, and are four stories in height, flanked by towers, supported by angular buttresses of two stages, running above an embattled parapet, and are at the top themselves embattled. The windows in the wings have square heads, with two lights, a plain transom, and the upper division tre-foiled. The principal entrance is under the great western window, through a richly moulded and deeply recessed portal, flanked by buttresses of two stages, the upper stage set diagonally, and rising above an embattled parapet. The doors are of oak, richly paneled, and filled with tracery of open work, closely studded with bronze.

The school has a president and eleven professors. It has in its collegiate department 145 students, and a valu-

NEW-YORK UNIVERSITY,

Washington Square.

able library and philosophical apparatus. Connected with it is an extensive grammar school and a flourishing medical department, the whole of which contain 680 students. Commencement, third Monday in July.

The chapel is probably the most beautiful room of the kind in America. It is open to the public on Sundays for religious worship. The New-York Historical Society's rooms are in the building. The building is accessible to the visitor at all times.

Governing Faculty.

Theodore Frelinghuysen, L. L. D., Chancellor, and Professor of Moral Philosophy and Rhetoric.

Rev. Cyrus Mason, D. D., Professor of the Evidences of Revealed Religion, and Rector of the Grammar School.

Elias Loomis, Professor of Mathematics, Natural Philosophy and Astronomy.

Taylor Lewis, A. M., Professor of the Latin and Greek Languages and Literature.

E. A. Johnson, A. M., Professor of Latin Language and Literature.

Rev. C. S. Henry, D. D., Professor of Intellectual Philosophy, History and Belles Lettres.

John W. Draper, M. D., Professor of Chemistry and Natural History.

Professors, not of the Governing Faculty.

Samuel F. B. Morse, Professor of the Literature of the Arts of Design.

Rev. George Bush, Professor of Hebrew.

M. Giraud, Acting Professor of the French Language.

Julio Soler, Professor of the Spanish Language.

Felix Forresti, Professor of the Italian Language.

COLUMBIA COLLEGE.

Columbia College is situated at the foot of Park Place, near Broadway, with extensive grounds, beautifully ornamented with a large growth of forest trees. It was chartered by George II., in 1754, by the name of King's College, and confirmed, with the necessary alterations by the

Legislature of New-York, in 1787. It has a president and ten professors, 1,170 alumni, 100 students, and 14,000 volumes in its libraries. The building is 200 feet long and 50 feet wide, with two projecting wings, one at each end, in which are accommodations for the families of the professors. It contains a chapel, lecture rooms, hall, museum, and an extensive philosophical and chemical apparatus. The funds amount to about \$200,000, and the annual income to \$7,000 or \$8,000. There is a flourishing grammar school attached to the institution, over which a professor presides as rector.

By a statute of Columbia College, the Corporation of the City of New-York, the Trustees of the New-York Public School Society, the Trustees or Directors of the Clinton Hall Association, of the Mercantile Library Association, and of the Mechanic and Scientific Institutions, the General Society of Mechanics and Tradesmen, and such other societies as the Board of Trustees may from time to time designate, are each entitled to have always two students educated in the college, free of all charges of tuition. Every religious denomination in the city is also entitled to have one student, who may be designed for the ministry, educated free of all charges; and every school, from which there shall be admitted in any one year into the college four students, have the privilege of sending one scholar, to be educated gratuitously. Commencement, the day following the first Monday in October.

MASONIC HALL,

Late head quarters of the Whigs, is situated on the east side of Broadway, between Duane and Pearl streets, and is one of the finest buildings of the kind in the country. It was built in 1826, by the Masons, before their importance was diminished by opposition. It is in the Gothic style of architecture. It fronts fifty feet on Broadway, and extends back one hundred and twenty feet. The front is built of granite, seventy feet in height from the street to the battlements in the centre. The second story is a grand Gothic saloon, ninety feet in length, forty-seven feet in width, and twenty-five feet high, and is one of the most magnificent halls in the union. The floor is supported by elastic springs for dancing ; the ceiling is divided into basket or fan arches, with pendants of open work, and columns support the arches projecting from the walls. The blank windows in the room are filled with mirrors, which render the hall when lighted very brilliant. This hall is now used as a bowling saloon, and is a place of great resort.

COLOURED HOME,

For the aged and indigent, is located in Forty-second-street, corner of Fifth Avenue. *Officers* : Miss Mary Shotwell, 1st Directress ; Mrs. P. G. Arcularius, 2d Directress ; Mrs. W. W. Chester, Secretary ; Dr. J. D. Fitch, Treasurer.

RELIGIOUS INSTITUTIONS.

American Bible Society.—This Institution, which is located at 115 Nassau-street, was organized in 1816. Hon. John Cotton Smith, President. Its government is in the hands of a Board of thirty-six Lay-managers of various religious denominations. The Society has a house one hundred feet square, extending through from Nassau-street to Theatre alley, with a court in the centre. In this building are the offices of the Corresponding Secretary, the Financial Secretary and the General Agent.

Over one thousand Bibles are produced here every day, and 429,090 were printed in 1845, costing \$166,652. The Society sell their books at cost, and give away very many.

This institution is well worth visiting, as the printing arrangements are on a very large scale, and the whole art of book-making may be seen in one view.

Officers: President, Wm. P. Buell, M. D.; 1st Vice-President, A. Robertson Walsh; 2d do., G. Buck, jr.; 3d do., Henry Rowland; 4th do., G. A. Titus; 5th do., Thomas Bond, jr.; 6th do., George S. Conover. Corresponding Secretary, E. H. Blatchford; Recording Secretary, J. F. Williams; Treasurer, George H. Williams.

American and Foreign Bible Society, (Baptist,) 350 Broome-street.—S. H. Cone, President; Rufus Babcock and T. Wallace, Secretaries; William Colgate, Vice-President; I. M. Allen, General Agent.

New-York Bible Society, 91 Wall and 115 Nassau-street—John Slosson, President; E. H. Blatchford, T. Bond, Jr., Secretaries; G. H. Williams, Treasurer; L. P. Hubbard, Agent.

City Bible Society, (Baptist,) 350 Broome-street—W. H. Wyckoff, President; G. N. Bleecker and Lewis Colby, Secretaries; Samuel Raynor, Treasurer.

New-York Bible and Common Prayer Book Society, 20 John-street—Rev. B. T. Onderdonk, President; W. H. Bell, Secretary; T. C. Butler, Treasurer and Agent.

American Tract Society, 150 Nassau-street—T. Fre-

linghuysen, President; Wm. A. Hallock, O. Eastman and R. S. Cook, Secretaries; O. R. Kingsbury, Assistant Treasurer.

Protestant Episcopal Tract Society, 20 John-street—Rev. B. T. Onderdonk, President; Rev. E. N. Mead and D. H. Hoyt, Secretaries; T. C. Butler, Treasurer.

New-York City Tract Society, 150 Nassau-street— —, President; William Walker, Treasurer; A. R. Wetmore and Rev. Isaac Orchard, Secretaries.

American Sabbath Tract Society, 9 Spruce-street—L. Crandall, President; F. W. Stillman and P. Sullman, Secretaries; T. B. Stillman, Treasurer.

American Board of Commissioners for Foreign Missions, is situated near the Brick Church, corner of Spruce and Nassau streets. Theo. Frelinghuysen, President; W. J. Armstrong, Secretary.

American Home Missionary Society, 150 Nassau-street—Henry Dwight, President; Rev. Milton Badger and Rev. Charles Hall, Secretaries; Jasper Corning, Treasurer, and H. W. Ripley, Assistant.

Home Missionary Society, (Baptist,) 350 Broome-street—Friend Humphrey, President; B. M. Hill, David Bellamy, Secretaries; R. W. Marvin, Treasurer.

Missionary Society, (Methodist,) 200 Mulberry-street—Rev. J. Soule, President; Francis Hall, Secretary; G. Lane, Treasurer.

New-York and Brooklyn Foreign Missionary Society—Pelatiah Perit, President; Rev. W. Adams and A. Merwin, Secretaries; J. W. Tracy, Treasurer.

Presbyterian Board of Foreign Missions, 23 Centre-street—Samuel Miller, President; Walter Lowrie, Secretary; Daniel Wells, Treasurer.

Presbyterian Board of Domestic Missions, 23 Centre-

street—Ashbel Green, President ; W. A. McDowell, Secretary ; Thomas Hoge, Treasurer.

Protestant Episcopal General Missionary Foreign Committee, 281 Broadway—Rev. B. T. Onderdonk, President ; Rev. P. P. Irving, Secretary and General Agent ; Dr. J. Smyth Rogers, Treasurer.

Protestant Episcopal General Missionary Domestic Committee, 281 Broadway—Rev. B. T. Onderdonk, President ; Rev. N. S. Harris, Secretary and General Agent ; T. N. Stanford, Treasurer.

Protestant Episcopal City Missionary Society—Rev. B. T. Onderdonk, President ; W. Mulligan, Secretary ; Lewis Phillips, Treasurer.

Protestant Episcopal Diocesan Society for the Promotion of Religion and Learning—Rev. B. T. Onderdonk, President ; William H. Harrison, Secretary ; J. F. De Peyster, Treasurer.

Foreign Evangelical Society, 36 Park Row—A. B. Hasbrouck, President ; E. N. Santel, Gurdon Buck and Robert Baird, Secretaries ; William W. Chester, Treasurer.

American Protestant Society, 143 Nassau-street—Rev. Gardner Spring, President ; Rev. H. Norton and C. K. Moore, Secretaries ; Mortimer De Motte, Treasurer.

Central American Education Society, 36 Park Row—J. C. Hornblower, President ; Rev. Eliakim Phelps, Secretary ; W. A. Booth, Treasurer.

Presbyterian Board of Education, 23 Centre-street—Alexander Henry, President ; M. B. Hope, Secretary ; J. R. Mitchell, Treasurer.

American Anti-Slavery Society, 143 Nassau-street—William Lloyd Garrison, President ; Maria W. Chapman and Wendell Phillips, of Boston, Secretaries ; Francis Jackson, Treasurer.

Foreign and American Anti-Slavery Society, 122 Pearl-street—A. Tappan, President; L. Tappan, Secretary; William Shotwell, Treasurer.

New-York State Colonization Society—Office in the Brick Church Chapel. A. G. Phelps, President; Rev. G. Spring, Vice-President; Rev. D. L. Carroll, Secretary; Moses Allen, Treasurer.

American Society for Meliorating the Condition of the Jews, 23 Nassau-street—Rev. Phillip Milledoler, President; Rev. John Lillie, Secretary for Domestic Correspondence; Rev. John Proudfit, Secretary for Foreign Correspondence; A. M. Burrill, Recording Secretary; Thomas Bussing, Treasurer.

American Seaman's Friend Society, 91 Wall-street—Edward Richardson, President; John Spaulding and T. Hale, Secretaries; C. N. Talbot, Treasurer.

New-York Marine Bible Society, 91 Wall-street—Hugh Aikman, President; William Poole and L. P. Hubbard, Secretaries; William Woodhull, Treasurer.

American Sunday School Union, 152 Nassau-street—J. C. Meeks and R. B. Camfield, Agents.

New-York Sunday School Union, 152 Nassau-street—Isaac Ferrie, President; N. N. Halsted, Secretary; Jonathan Leavitt, Treasurer; J. C. Meeks, Agent.

Protestant Episcopal General Sunday School Union, 20 John-street—Rev. A. Ten Broeck, Secretary; T. W. Mitchell, Treasurer; Daniel Dana, jr., Agent.

New-York City Sunday School Society, (Methodist,) 200 Mulberry-street—S. A. Purdy, President; Wm. Truslow, J. F. Truslow and Walter Keeler, Secretaries; J. W. Ramsey, Treasurer.

Sunday School Union, (Methodist,) 200 Mulberry-street—Rev. J. Soule, President; Wm. Truslow, Rev. D. P. Kidder, Secretaries; Wm. Morgan, Treasurer.

American Temperance Union, 148 Nassau-street—R. Hide Walworth, President; Rev. John Marsh, Secretary and General Agent; Jasper Corning, Treasurer.

Female Moral Reform Society, 36 Park Row—Mrs. C. W. Hawkins, President; Mrs. S. R. Ingraham, Secretary; Mrs. Jane Beatty, Treasurer.

New-York Sacred Music Society—Established in 1823. *Officers*: L. B. Wyman, President; G. E. Vanderberg, W. A. Tyler, Vice-Presidents; H. R. Yenne, Secretary; J. P. Perkins, Treasurer; George Whitlock, Librarian; U. C. Hill, Conductor.

BENEVOLENT INSTITUTIONS.

NEW-YORK HOSPITAL.

This institution, located in Broadway, between Duane and Anthony streets, was founded in 1771, by the Earl of Dunmore, at that time Governor of the Colony. The institution has an annual revenue from various sources of about \$68,000, the larger portion of which is annually expended. There are three large hospital buildings, fitted up in excellent style, for the accommodation of patients. Patients can have the best of medical attendance, and the convenience of nursing and medicine for three dollars a week. Respectable persons without families will find this a very desirable asylum during sickness. Patients can have single rooms if they desire them. It is quite common for physicians, who know the advantages of this Hospital, to resort to it when sick themselves. In cases of sudden accidents, patients are received here, and their wants immediately attended to. Medical students are permitted to go the rounds with the attending surgeons for the annual fee of eight dollars. Annual lectures are given by all the attending physicians and surgeons. The buildings will accommodate over 300 patients. Application for admission must be made at the office within the Hospital. There are ten attending and consulting physicians and surgeons.

THE BLOOMINGDALE ASYLUM FOR THE INSANE,

Is a branch of the New-York Hospital, and, through a delegated Committee of six of their number, is under the general control of the Board of Governors of that institution. It is situated near the Bloomingdale road, seven miles from the City-Hall, upon an elevated and beautiful site, half a mile from the Hudson river. This situation, though perhaps not apparently so, is, after Fort Washington, the highest point of the island.

The approach to the Asylum from the southern entrance, by the stranger who associates the most sombre scenes with a lunatic hospital, is highly pleasing. The sudden opening of the view, the extent of the grounds, the various avenues gracefully winding through so large a lawn; the cedar hedges, the fir, and other ornamental trees, tastefully distributed or grouped, the variety of shrubbery and flowers; in fine, the assemblage of so many objects to please the eye, and relieve the melancholy mind from its sad musings, strike him as one of the most successful and useful instances of landscape gardening.

There is, indeed, no private residence or public establishment in the vicinity of the city, which for beauty of situation, or exercise of taste in the distribution of grounds, can compare with it.

The principal building, which is constructed of hewn stone, is two hundred and eleven feet long, sixty feet wide, and three stories in height, exclusive of basement and attic. There are two other buildings, each standing at right angles with the principal edifice. These are each three stories in height, sixty feet in length, and forty in width.

The modern greatly improved and humane system of treating the insane has been fully introduced into this institution. The patients have well furnished apartments, and eat at tables set in the usual manner in private families. They walk out, with attendants, and many of them ride, daily, in a carriage devoted to their use. They amuse themselves with ten-pins, quoits, bagatelle, chess, chequers

diseases. Henry Van Hovenburgh, Health Officer; Alexander F. Vache, Resident Physician; Stephen R. Harris, Health Commissioner and Treasurer.

Lying-in-Hospital—For destitute females, is situated at 85 Marion-street.

Marine Society—Capt. Chas. H. Marshall, President; William Thompson, J. J. Dickinson, Vice-Presidents; James Copland, Treasurer; Henry Russell, Secretary.

Mariners' Family Industrial Society.—The object of this Society is to furnish employment at a fair remuneration, for the female members of the families of seamen, and to relieve the wants of such families as are incapable of labour. A clothing store has been opened at 325 Pearl-street, where may be found an assortment of garments for seamen and others. *Officers*: Mrs. C. W. Hawkins, 1st Directress; Miss M. Vale, 2d do.; Mrs. T. O. Taylor, Treasurer; Mrs. C. Tracy, Secretary.

American Shipwreck Society, office, Hall of American Institute, west wing New City-Hall. James Depeyster Ogden, President.

The British Protective Emigrant Society, of New-York—Established for the purpose of preventing emigrants from being cheated and imposed upon, will furnish them, free of any charge, with every advice and information relative to routes, expenses of travelling, and all matters of importance to them, on applying at the office of the Society, 14 Pine-street, near the Custom-House. C. H. Webb, Superintendent; Geo. Wilkie, Active Agent.

Irish Emigrant Society, 6 Ann-street—T. W. Clerke, President; G. Dillon, Joa. Stuart, Vice-Presidents; James Reyburn, Treasurer; J. T. Doyle, M. J. O'Connor, Secretaries.

Welsh Benevolent Society of the City of New-York—Evan Griffith, President; Enoch Morgan, Treasurer; G. W. Griffith, Corresponding Secretary. The objects of

this Society are the advising and protecting Welsh emigrants from the frauds and knavery of emigrant swindlers, who abound in the city, and who are unrelenting in their exactions from the poor emigrants. This is a very active and useful society, and demands cordial support. Apply to the British Protective Emigrant Society, 14 Pine-street, for information.

NEW-YORK DISPENSARY,

Situated in White-street, corner of Centre-street, established in 1790, "for the purpose of relieving such sick, poor and indigent persons, as are unable to procure medical aid."

NORTHERN DISPENSARY,

Situated in Christopher-street, corner of Sixth-street, founded in 1829.

EASTERN DISPENSARY,

Situated in Ludlow-street, corner of Essex Market Place, founded in 1834.

NEW-YORK INSTITUTION FOR THE INSTRUCTION OF THE DEAF AND DUMB.

This institution commenced operations under its charter, by opening a school for the reception of pupils on the 12th day of May, 1818. Until the spring of 1829, the school was held in the building now called the New City-Hall. At that time the pupils were transferred to a large building erected for the purposes of the Institution, on Fiftieth-street and the Fourth Avenue, three and a half miles from the City-Hall. Communication between the Institution and the city is rendered very easy by the cars which pass on the Harlem Rail-Road, (Fourth Avenue,) every fifteen or twenty minutes in both directions.

The principal building occupied for the purposes of the Institution, is one hundred and ten feet by sixty, in the dimensions of its plan, and five stories in height, including the basement. It accommodates about 160 patients, and the teachers, the family of the Principal, and such other

ASYLUM FOR THE BLIND.

persons as are needed to assist in conducting the affairs of the establishment.

This Institution has been well sustained by appropriations made by the Legislature of the State, by the Corporations of the City, and by private munificence.

There are usually at the Asylum about 160 pupils, who are taught most of the useful branches of education, and some of them are instructed in trades, such as shoemaking, tailoring, cabinet making, bookbinding and gardening. At the date of the last report, (Dec. 1844,) the number of pupils was 168, (96 males and 72 females,) of whom 128 were supported by the State of New-York, 13 by the Corporation of the City, three by the State of New-Jersey, one by the County of St. Lawrence, 11 by their friends, and 12 by the Institution. The charge for a pupil is \$130 per year, including all expenses, except clothing and travelling expenses.

The Principal of the Institution is Mr. Harvey P. Peet, who is assisted by a number of competent professors and others. The government and management of the general concerns are vested in a Board of Directors; of the late Board, the President, Rev. Doctor Milnor, and one of the Vice-Presidents, Robert C. Cornell, Esq., are recently deceased.

Prosper M. Wetmore and Harvey P. Peet, *Vice-Pres'ts.*
Robert D. Weeks, *Treasurer.*

INSTITUTION FOR THE BLIND,

Is located on Ninth Avenue, near Thirty-third-street, where are 32 lots of land presented to the Institution by James Boorman, Esq. The Legislature, in 1839, appropriated \$15,000 towards the erection of the buildings, besides which, considerable donations have been made by individuals. The pupils are taught the usual branches of English education. There is a manufacturing department, where they learn basket making, weaving, band-box work, and other similar work. There are usually about 60 pupils at the Institution. *Officers:* A. G. Phelps, President; Isaac Wood, Vice-President; S. Brown, Treasurer, E. Jones,

Corresponding Secretary ; G. F. Allen, Recording Secretary ; J. W. G. Clements, Physician ; Isaac Wood and J. C. Bliss, Consulting Physicians ; J. Kearney Rodgers, Consulting Surgeon.

The building is built of granite, in the Gothic style, and is one of the most imposing structures in the city. Admission to see the pupils, twice a week, may be had, on application to any of the officers. It is much resorted to by those interested in such institutions. The engraving we give in another part of this book, presents a very accurate view of the building.

Asylum for Respectable Aged Indigent Females.—This institution is situated in 20th street, near the Second Avenue. Aged and indigent ladies find in this truly benevolent institution a grateful asylum for their declining years. We are glad to learn that its managers are getting great encouragement for its permanent success.

Magdalen Female Benevolent Asylum.—This institution is situated between Eighty-eighth and Eighty-ninth streets, west of the Harlem Rail-Road. *Officers:* Mrs. George Warner, 1st Directress ; Mrs. Thomas Hastings, 2d Directress ; Mrs. Dr. Pierson, Treasurer ; Mrs. S. Van Antwerp, Corresponding Secretary ; Mrs. J. Clibborn, Recording Secretary ; Rev. C. C. Darling, Chaplain. Can be visited any day.

New-York Orphan Asylum—Is situated at Bloomingdale, near Eightieth-street, about five miles from the City-Hall, and is a handsome building, 120 by 60 feet, connected with nine acres of ground. It is of stone, plastered in imitation of yellow marble. It overlooks the Hudson river, and is delightfully situated, being surrounded with trees and cultivated grounds. It was instituted in 1806. The present number of male and female orphans at the Asylum is about 200. Till quite recently the inmates of this asylum have been subject to a great deal of sickness, owing to its contiguity to the foul air generated in Potter's Field. The Potter's Field has been recently removed. The Asylum

ORPHAN ASYLUM.

can be visited at any time, and great numbers resort to it to see the pupils.

Leake and Watt's Orphan Asylum—Is situated near One Hundredth-street, between the Fourth and Fifth Avenues.

Protestant Half-Orphan Asylum—Male and Female, Sixth Avenue, between Tenth and Eleventh streets.

Roman Catholic Orphan Asylum—Is situated in Prince-street, corner of Mott-street, and is conducted by the Sisters of Charity. They have 250 orphans under their care.

Roman Catholic Half-Orphan Asylum—Eleventh-street, near Seventh Avenue.

Coloured Orphan Asylum.—This institution is situated in Twelfth-street, near the lower Reservoir, between Avenues Fifth and Sixth. It has a large and commodious building, and is in a flourishing condition.

Prison Association of New-York, corner of Pine and Nassau streets—Established for the amelioration of the condition of prisoners, the improvement of prison discipline, the government of prisons, and the encouragement of reformed convicts after their discharge, by assisting them in obtaining an honest livelihood.

A subscription of \$25 constitutes a member for life.

There is a female department, consisting of such as take an interest in the objects of the society. *Officers*: Hon. William T. McCoun, President; Isaac T. Hopper, General Agent.

New-York Vaccine Institute, 369 Broome and 20 Third-street—John C. Beales, President; James Weir, Recording Secretary.

New-England Society—M. H. Grinnell, President; T. Fessenden, Simeon Draper, jr., Vice-Presidents; A. G. Hazard, Treasurer; A. A. Weeks, Secretary.

Ancient Britons' Benefit Society—W. J. Ormson, President; David Roberts, Vice-President; Wm. Lewis, Secretary.

St. Andrew's Society—Richard Irvin, President; J. J. Palmer, Adam Norrie, Vice-Presidents; Andrew Mitchell, Treasurer; John Campbell, Secretary; J. T. Ferguson, Physician.

St. David's Benevolent Society of New-York and Brooklyn—David C. Colden, President; H. P. Edwards, M. Morgana, jr., Vice-President.

St. George's Society of New-York—W. D. Cuthbertson, President; Henry Jessop, Septimus Crookes, Vice-Presidents; Robert Bage, Treasurer; Henry Owen, James Sheward, Secretaries.

St. Nicholas' Society—J. R. Manly, President; Peter Schermerhorn, W. J. Van Wagenen, A. R. Lawrence, Ogden Hoffman, Vice-Presidents; F. De Peyster, Treasurer; S. G. Raymond, Secretary.

Hebrew Benevolent Society—M. M. Noah, President; S. Dreyfous, Vice-President; John Levy, Treasurer; Henry Goldsmith, Secretary.

Hibernian Universal Benevolent Society, 42 Prince-street—John Farrigan, President; Farrel Lunney, Vice-President; John Heaney, Treasurer; James McGuire, Corresponding Secretary; Francis O'Rielley, Recording Secretary.

LITERARY INSTITUTIONS.

NEW-YORK SOCIETY LIBRARY.

A conspicuous and beautiful edifice, of the ionic order, of brown freestone, fronting on Broadway and Leonard-street.

This institution is the most ancient in the city, and is co-eval in its origin with the English government of the colony, having been founded in the year 1700, under the administration of the Earl of Bellamont, then governor. The New-York Society Library, established in 1754, with the view of aiding and extending the objects of King's (now Columbia) College, founded at that time, was en-

NEW-YORK SOCIETY LIBRARY,

Corner of Broadway and Leonard Street.

grafted on the old City Library, a name, by which, in common parlance, it is still known. During the revolutionary war, the books being deposited in the old City-Hall in Broad-street, were scattered and lost. Tradition affirms that they were carried off by the British soldiers and bartered for grog. On the restoration of peace the Library was re-established, and continued for a long time to occupy a sphere of quiet and unobtrusive usefulness in a building of considerable architectural taste, for that period, erected by the society in Nassau-street, opposite to the Middle Dutch Church, now used as the Post Office.

In 1838 and '39 the society erected the present edifice in Broadway, at an expense, including the ground, of \$120,000. The building throughout is constructed in the most thorough manner, and its apartments are unsurpassed for architectural beauty by any in the United States.

The collection of books, selected with great care, consists of the most important works for general reading, and reference in every department of literature, science and the arts. Constant accessions are made; during the last year there have been added 2,000 volumes, many imported from London, Paris, &c., where the society has agents. The reading and news room is a large and airy apartment, open from 8 in the morning till 10 in the evening, and is provided with various newspapers and periodicals, affording a most agreeable resort to subscribers. Besides the library and reading room, one is appropriated to study and reference, and another to conversation.

The privileges of this noble institution may be secured for the moderate sum of \$25, with an annual payment of \$6, or \$100 without the annual payments, and the shares are transferable like other property. Members may introduce strangers to the use of the reading room, and reference to the books of the library. Persons not members may take out such books as are loaned, by leaving a deposit.

A lecture room, admirably adapted to scientific and other lectures, is, from the conspicuous and central position of the building, in considerable demand.

The objects of the institution are too obvious and im-

portant to require further explanation. No good citizen will be without the privileges of a public library. The stranger will find the Society Library well worthy of a visit, and an agreeable resort during his sojourn.

The annual income of the society is about \$9,000; one half of which is derived from the annual payments of the members, the other half from the rents of the building, sale of new shares, &c. About \$3,000 are appropriated annually to the purchase of books and periodicals, the balance to the extinguishment of debt, incidental expenses, &c.

MERCANTILE LIBRARY ASSOCIATION.

This society is located in the Clinton Hall building, in Beekman, corner of Nassau-street. It possesses a library, reading room, lecture room, cabinet of minerals, &c. It was originally established for the express benefit of clerks, but of late it has been thrown open to all who will pay for the privilege. The library, in which all the departments of science and general literature are well represented, contains at this time 23,000 volumes. It is peculiarly rich in periodical literature. Its collection in this department is probably superior to any other institution in this country. The reading room is supplied with a very extensive variety of foreign and American periodicals and newspapers. The number of members at the present time is 1,891. Clerks pay one dollar initiation fee, and two dollars a year thereafter, which entitles them to the use of the reading room and library. Merchants hold honorary membership, and pay five dollars a year. Other citizens have the privileges of the library and reading room for five dollars a year.

LYCEUM OF NATURAL HISTORY.

This is a flourishing and vigorous association of scientific men, for the promotion and study of natural history in all its branches; and for the furtherance of these purposes stated meetings are held for conversation and lectures. It was incorporated in 1818, and a room appropriated for their

CLINTON HALL.

meetings, by the city government, in the building in the rear of the City-Hall. It was afterwards removed to a building in Broadway, built for the purpose; but it has recently been removed again to a large and commodious hall in the second story of the University Medical School, (formerly Stuyvesant Institute.) The institution possesses a large library, and an extensive cabinet of minerals, shells, plants, and other specimens in natural history. Meetings are held every Monday evening throughout the year—free to strangers as well as members. The museum may be visited gratuitously by application at the building.

Officers: Joseph Delafield, President; Jno. A. Smith, Abraham Halsey, Vice-Presidents; J. H. Redfield, Corresponding Secretary; R. H. Browne, Secretary; J. P. Giraud, jr., Treasurer.

NEW-YORK LYCEUM.

Established in 1838, for the purpose of diffusing useful knowledge, by means of lectures, a library and reading room. During the winter season, evening lectures are delivered at the Tabernacle by distinguished scientific and literary men, invited by the Society, from different parts of the Union, to which the members and the public generally are admitted, on payment of a small sum for the course, or for each lecture. The library and reading rooms are at the corner of Broadway and Lispenard-street.

Isaac T. Smith, President; George S. Sitt, Vice-President; John L. Salisbury, Treasurer; Albert G. Zabriskie, Corresponding Secretary; Lewis G. Forman, Recording Secretary.

NEW-YORK LAW INSTITUTE.

(Established 1838. Incorporated 1830.)

The Library, which is kept in the City-Hall, contains about 3,500 volumes of select law books, including nearly the whole series of English and American Reports. The initiation fees are \$20, and annual dues \$10. Members of the bar from abroad, and the judges of the courts, are entitled to the free use of the Library.

Samuel Jones, L. L. D., President; John Anthon, Ge-

rardus Clark, James W. Gerard, Vice-Presidents ; Joshua Coit, Treasurer ; Alex. H. Dana, Secretary ; Lewis H. Sandford, Librarian.

NEW-YORK HISTORICAL SOCIETY.

This able and efficient association have their rooms in the University Building. They have a library of 12,000 volumes, and a large collection of coins and medals. Its library is open during each day. Albert Gallatin, President ; Luther Bradish and Thos. De Witt, Vice-Presidents ; J. R. Bartlett, Foreign Corresponding Secretary ; John Jay, Domestic Corresponding Secretary ; G. Gibbs, Librarian.

APPRENTICES' LIBRARY.

This library occupies a large and commodious building at 32 Crosby-street. It contains 12,000 volumes, for the exclusive use of apprentices. Eighteen hundred young mechanics avail themselves of the facilities of this valuable institution.

ETHNOLOGICAL SOCIETY,

Formed in 1842, for the purpose of inquiring into Antiquities, History, Languages, Geography, &c.

Albert Gallatin, President ; Edward Robinson, Henry R. Schoolcraft, Vice-Presidents ; John R. Bartlett, Corresponding Secretary ; A. W. Bradford, Recording Secretary and Treasurer.

Mechanics' and Tradesmen's Society and School, 32 Crosby-street—J. A. Westervelt, President.

THEOLOGICAL INSTITUTIONS.

Union Theological Seminary.—This Institution, founded in 1836, is located in University Place, between Sixth and Eighth streets, near Washington Square. The principal edifice contains four large and commodious lecture rooms, a chapel, library and study rooms, besides four large furnished rooms for the accommodation of the students. It has six professors, and generally about 100 students. The library contains over 16,000 volumes. R. T. Haines, President.

UNIVERSITY MEDICAL SCHOOL, BROADWAY.

THEOLOGICAL SEMINARY.

The General Theological Seminary of the Episcopal Church, is situated in Twentieth-street, corner of Ninth Avenue, near the Hudson, two miles from the City-Hall. There are two handsome buildings of stone, for the accommodation of professors and students. The Board of Trustees consists of all the bishops, and one trustee from each diocese in the United States. The institution is well endowed and in a flourishing condition.

MEDICAL INSTITUTIONS.

UNIVERSITY MEDICAL SCHOOL.

This institution occupies the building formerly known as the Stayvesant Institute, a splendid granite edifice, in Broadway, above Bleecker-street. The front is constructed of hewn granite, and is 75 feet long. It has a portico supported by four splendid granite columns. The building in its present state cost over one hundred thousand dollars. It contains three very spacious lecture rooms, one for anatomy, one for chemistry, and one for general purposes. It has also an extensive reading room and library. The New-York Lyceum have deposited their cabinet in this building.

The museum and apparatus belong chiefly to the professors. Their value is about \$30,000.

The number of students at the last Winter Session of 1844-5, was 378.

The Winter Session begins on the last Monday of October, and ends on the last day in February.

Valentine Mott, M. D., Prof. of the Principles and Operations of Surgery, with Surgical and Pathological Anatomy.

Granville Sharp Pattison, M. D., Prof. of General Descriptive and Surgical Anatomy.

John Revere, M. D., Prof. of the Theory and Practice of Medicine.

Martyn Paine, M. D., Prof. of Institutes of Medicine and Materia Medica.

Gunning S. Bedford, M. D., Prof. of Midwifery, and the Diseases of Women and Children.

John W. Draper, M. D., Prof. of Chemistry.

William Darling, M. D., Prosecutor to the Professor of Surgery.

John H. Whitaker, M. D., Demonstrator of Anatomy.

COLLEGE OF PHYSICIANS AND SURGEONS.

This is a handsome edifice, situated in Crosby-street. It was founded in 1807, has eight professors and about 200 students. It has a library of over 1,000 volumes. Lectures commence on the first Monday in November, and continue about four months. Attached to the college is a very extensive medical museum containing a vast number of interesting objects. It may be visited on application to the Janitor, in the building.

The institution is governed by a Board of Trustees, composed of physicians and other citizens.

Faculty.

Alexander H. Stevens, M. D., President and Emeritus, Prof. of Surgery.

Joseph M. Smith, M. D., Prof. of Theory and Practice of Medicine and Clinical Medicine.

John B. Beach, M. D., Prof. of Materia Medica and Medical Jurisprudence.

John Torrey, M. D., Prof. of Chemistry and Botany.

Robert Watts, jr., M. D. Prof. of Anatomy and Physiology.

Willard Parker, M. D. Prof. of Principles and Practice of Surgery and Surgical Anatomy.

Chandler R. Gilman, M. D., Prof. of Obstetrics and Diseases of Women and Children.

Doctor G. A. Sabine, Demonstrator of Anatomy.

Gurdon Buck, jr., M. D., Registrar.

The whole number of under graduates in 1844, was 193.

There is no classification of students. The mode of instruction is entirely by lectures.

NEW-YORK MEDICAL SOCIETY,

Meets monthly in the Court Room, Halls of Justice—E. Delafield, President; Isaac Wood, Vice-President; B. R.

Robson, Treasurer; B. Drake, Corresponding Secretary; W. P. Buel, Recording Secretary.

COLLEGE OF PHARMACY.

The object of this Institution is to prevent, as far as possible, the many fatal errors in the preparation of medicine.

Constantine Adamson, President; Oliver Hall, John Milhau, George D. Coggeshall, Vice-Presidents; James S. Aspinwall, Treasurer; John Meakim, Secretary.

MECHANIC INSTITUTIONS.

AMERICAN INSTITUTE.

(Incorporated in 1829.)

This institution was established for the purpose of encouraging domestic industry in this state and the United States, in agriculture, manufactures and the arts, by bestowing rewards and other benefits on those who shall make any improvements, or excel in any of the above branches. The Institute have a room in the building in the Park on Chambers-street, which is fitted up as a library, lecture hall and exhibition room. The library is extensive, and particularly rich in those branches relating to the objects of the institution. A large collection of models, agricultural products, &c., are deposited in the room, which, together with the library, are open to the public *free of expense*, at all seasonable hours. The stranger will do well to visit this interesting room. In connection with the Institute, there is an Annual Fair held at Niblo's Garden, which is visited by thirty thousand people. A cattle show is also held by the Institute every season.

Officers: James Tallmadge, President; A. Chandler, Wm. Inglis, Shepherd Knapp, Vice-Presidents; H. Meigs, Recording Secretary; T. B. Wakeman, Corresponding Secretary; E. T. Backhouse, Treasurer; T. B. Wakeman, Superintending Agent.

MECHANICS' INSTITUTE.

This Institute has for its object the instruction of mechanics and others in science and the arts. The Institute

has established annual courses of popular lectures. It has an excellent library, containing about twenty-five hundred volumes, together with a reading room, supplied with popular reviews, literary and scientific journals and newspapers; a museum of models of machinery, and a valuable collection of chemical and philosophical apparatus. A male school was commenced in November, 1838, and a female school in May, 1839, both of which have been eminently successful. Rooms in the basement of the City-Hall. J. J. Mapes, President; Charles L. Barritt, Actuary and Librarian.

MERCANTILE INSTITUTIONS.

Chamber of Commerce—Instituted 1768; incorporated 1770, re-incorporated 1784. *Officers*: James G. King, President; H. K. Bogert, Stewart Brown, Vice-Presidents; J. J. Palmer, Treasurer; P. M. Wetmore, Secretary; *Com. of Arbitration*: Matthew Maury, Calvin Durand, Chas. King, J. H. Brower, Robert Kermit. *Pilot Commissioners*: R. S. Taylor, C. H. Marshall. *Annual Election*: 1st Tuesday in May; meetings 1st Tuesday in each month.

New-York Stock and Exchange Board.—*Officers*: David Clarkson, President; Edward Prime, Vice-President; J. W. Bleeker, Treasurer; B. Hart, Secretary; Meetings daily at the Merchants' Exchange.

New-York Commercial Exchange Association.—*Officers*: Seixas Nathan, President; W. Borrowe, Vice-President; S. I. Josepha, Secretary; W. H. Hayes, Treasurer. Daily (public) meetings in the Rotunda of Merchants' Exchange.

Merchants' Vigilant Association, (organized to investigate and expose abuses in trade, to prevent frauds, and punish the fraudulent.) *Officers*: Thomas Tileston, President; T. C. Doremus, Vice-President; David Wesson, Treasurer; Woodward & Dusenbery, Secretaries.

Metropolitan Association, 554 Broadway—Henry Kiddle, President; J. H. Fanning, Vice-President; J. J. Anderson, T. J. Taylor, Secretaries; R. H. Cudlip, Treasurer; L. B. Hardcastle, Librarian.

Italian Benevolent Society—Felice Argenti, President; Sebastiano Dacorsi, Treasurer; C. Ferrero, Secretary.

Independent Order of Odd Fellows' Library Association: Rooms at 31 Canal-street.

PICTURE GALLERIES AND INSTITUTIONS OF THE FINE ARTS.

AMERICAN ART-UNION,

322 Broadway, near Pearl-street.

Officers: William Cullen Bryant, President; Ebenezer Platt, Treasurer; Andrew Warner, Recording Secretary; Robert F. Fraser, Corresponding Secretary.

The American Art-Union, now in the sixth year of its existence, was incorporated by the Legislature of New-York, for the promotion of the Fine Arts in the United States. It is now firmly established; its income the past year exceeded ten thousand dollars.

Each subscriber of five dollars becomes a member of the Art-Union for the year. The money thus obtained (allowing for necessary expenses) is applied first, to the production of a fine and costly engraving from a choice painting, of which every member receives a copy; second, to the purchase of paintings and sculpture by native or resident artists, which are publicly distributed by lot amongst the members at the annual meeting in December. The works of art distributed in this manner, in 1844, numbered ninety-two, (exclusive of the engravings,) and cost the Art-Union nearly seven thousand dollars.

The Room or Gallery of the Art-Union is hung with paintings, either purchased by the Institution or sent there by artists to the superintendant for sale, and is always open, free of charge, to the members and the public generally.

We most cordially recommend this institution to the New-York public, and to strangers generally. It possesses very strong claims to patronage. Some of the best pictures ever painted in this country have been distributed by the

Art-Union; and as a promoter of the interests of the fine arts in America, its facilities and efforts are unequalled.

Great impartiality in the selection of pictures, and faithfulness in disbursing the society's money have been hitherto practised by the managers.

Its exhibition rooms are very interesting, and well worthy of the attention of citizens and strangers.

NATIONAL ACADEMY OF DESIGN,

In Broadway, corner of Leonard-street.

An association of young men, artists and amateurs, under the name above given, organized and opened their first exhibition on the first of May, in 1826, at the corner of Reade-street and Broadway. They afterwards occupied successively rooms over the Arcade Baths in Chambers-street, the Clinton Hall, and the Society Library building, where they now remain. They have an exhibition of the productions of none but living artists, and open annually during the months of April, May and June. Their present accommodations consists of several large rooms, elegantly fitted up with carpets, mirrors and seats; and from the pains taken to make it attractive, it has become a very fashionable place of genteel resort. Nearly all the artists in the United States annually send contributions to this exhibition. Admission 25 cents. Season tickets 50 cents.

Connected with the institution is a gratuitous school for drawing, held three evenings a week during the winter season. The Academy has a very valuable collection of casts from the antique and modern schools—which are used by the drawing classes.

Application for admission to the school must be made to the Council, accompanied with an original drawing made from the round. Lectures on various subjects connected with the fine arts are provided for by the laws of the institution—but none are given—for reasons inextricably involved in the mysteries of the Council. A "life school," for drawing from the living figure, is also in successful operation.

The annual election for officers is held in May. *Officers:* Henry Inman, President; A. B. Durand, Vice-President.

NEW-YORK ART-RE-UNION,

Instituted in 1845, by a number of artists and amateurs, for mutual instruction and the promotion of the fine arts. Weekly meetings are held, when the objects of the society are carried out by the reading of essays and the introduction of specimens and discussions, all confined to subjects connected with the arts. The association is in a flourishing condition, and promises great usefulness for the future.

It numbers among its members some of the most talented and promising artists in the country. E. Ruggles, M. D., President; John M. Falconer, Recording Secretary; John P. Ridner, Corresponding Secretary.

NEW-YORK GALLERY OF THE FINE ARTS.

This institution was established for the purpose of forming a permanent gallery of paintings, sculpture and engravings. The society commenced by purchasing the collection of the late Leman Read, consisting of some very valuable paintings, principally by American artists. About fifteen thousand dollars were raised by private subscription, some individuals subscribing as high as one thousand dollars. This sum has been principally expended in the purchase of the above collection, and the fitting up of the old Rotunda in the Park, as an exhibition room. By a provision in the constitution, no property of the association can ever be sold, and a work of art once possessed must ever remain a part of the permanent gallery. The payment of one dollar, and the subscription of the constitution, constitutes the person making such payment a member for life—and for this small sum he is entitled to free admission for life—without any other cost. The present success of the institution has established it on a permanent basis. Among the paintings are Cole's celebrated series of the Voyage of Life; his Course of Empire; a picture by Morland, and many others equally valuable. The gallery possesses also a rich and numerous collection of Flag's paintings. Single

admission 25 cents. Strangers will find this collection worth visiting.

Jonathan Sturges, President; F. W. Edmonds, Vice-President; Thomas H. Faile, Treasurer; W. H. Johnson, Secretary.

NEW-YORK DRAWING ACADEMY,

Situated at No. 103 Canal-street.

Drawing, painting and perspective are here taught and illustrated by a very extensive apparatus, and other unequalled facilities. Prof. J. R. Smith is celebrated as one of the most successful teachers in the United States; many of our most distinguished artists have been graduates from his school. Pictorial anatomy, lithography and engraving is also taught in this institution. Separate classes for ladies and gentlemen.

Tuition, \$10 per quarter.

PLACES OF PUBLIC AMUSEMENT.

THEATRES.

We possess but slender materials for describing accurately the earliest efforts of our ancestors at theatrical performances, which were commenced nearly a century ago in a large store near the Old-slip, on a place called Cruger's Wharf; at about the same period, by the way, the first regular weekly was published in New-York, called the "Weekly Gazette." The accounts before us do not represent the persons engaged in the undertaking to have been either very serious or successful, but a mere party of frolic. some young men, rather desirous of gratifying their own love of mirth and frivolity, than of founding any permanent and well regulated dramatic establishment.

About the year one thousand seven hundred and fifty, a stone theatre was built in Nassau-street, in the rear of the Dutch Church, near Maiden Lane. It is said to have been quite well conducted by a Mr. Hallam, who principally, by the aid of players from the Provincial theatres of Great Britain, performed many of the best English plays, until

the manager, either from want of encouragement or allured by more lucrative prospects elsewhere, withdrew his company, and the building was pulled down.

In 1770, a new effort was made by a Mr. Miller, in a miserable wooden house in Beekman-street, a few doors below Nassau-street. This is described as inferior to the other. The scenery was of paper, and the wardrobe deficient both in quality and extent. This unfortunate structure was so far from being supported, that the public, not satisfied with its passing to its fate in the ordinary course of things, assembled one day, under the influence of some political excitement, and tore it to pieces.

During the Revolutionary war, and while the city was in possession of the English, the drama was once more resorted to as a source of amusement. A building was erected in John-street, and plays were represented by the British officers. Among the pieces here performed were several of a satirical character, from the pen of Burgoyne. In 1783, after the British had evacuated the city, the John-street theatre fell into the hands of a regular company, and was for a time quite successful.

A circumstance occurred at this period, which evinces the disposition of our forefathers towards theatrical performances. The winter of 1785 was unusually severe, and caused extreme suffering among the poor. The manager of the theatrical corps, offered for their assistance the proceeds of a night, amounting to one hundred pounds; the offer was declined by the Common Council on the ground that theatrical performances had an immoral tendency. This building was destroyed by fire in 1799.

PARK THEATRE.

The Park Theatre was commenced in 1795, during the alarming prevalence of the yellow fever in New-York. It was completed in 1798, at which time a petition from the proprietors for leave to erect a portico over the side-walk was rejected by the Common Council, apparently as unwilling to grant as to receive favours from a dramatic corps.

The cost of the building was one hundred and seventy-nine thousand dollars, but was afterwards purchased at auction for fifty thousand dollars, by its present owners. It was opened for public performances in 1798, under the management of the celebrated Hodgkinson, formerly of the John-street theatre. This gentleman must have been gifted with great powers as an actor, from the strong and universal praise bestowed upon him by those familiar with his personations. Since his death the theatre has passed under the direction of Dunlap, Cooper, Price, and its present manager, Simpson. In May, 1820, late one night after the performance of the evening, the building was discovered to be on fire. We are not aware that the original cause of the accident is known. The interior was wholly consumed, but the walls, which are of immense thickness, were left standing; their height also prevented the extension of the conflagration, and a heavy shower came very opportunely to the assistance of the firemen in the preservation of the surrounding buildings. Fortunately this calamity was attended by no loss of life. No one who witnessed the destruction of the Park Theatre can ever forget the grandeur and sublimity of the spectacle. The sky was completely obscured with clouds, and shrouded the scene in impenetrable gloom, which greatly heightened the intense splendour of the fire-light. The flames, ascending to the height of several hundred feet, cast a glare of lurid radiance over a circle of many miles, and illuminated the city with vivid brilliancy and beauty. Crowds of citizens, lured by the awful grandeur of the sight, thronged by thousands to the spot.

It was several months after the fire before the proprietors rebuilt the edifice. The interior was much improved; but the exterior retained its unpromising aspect. It was re-opened in August, 1821, with a prize address from the pen of Sprague.

Brunel, the celebrated planner of the Thames Tunnel, was the architect of this theatre, and at the time it was erected, the New-Yorkers regarded it as a masterpiece of taste. Its unsightly proportions have since been much

ridiculed; so much so as to induce the manager to alter it, by adding some wood-work pilasters and paint. Its appearance has been very much improved by this addition. The Park Theatre was for many years surrounded by a collection of houses, occupied by the lowest grade of human beings. It has now somewhat changed, being the centre of a nucleus of eating-houses and gambling-shops. All the great theatrical stars from Europe make their first appearance here. The fact of coming from this theatre stamps them at once with character. More attention is paid to the detail and perfection of dramatic performances in the Park Theatre than in any other house in the United States. It has a collection of scenery which has cost over two hundred thousand dollars—and its wardrobe and other stage properties are very extensive.

Its internal plan and decorations are superior to any other theatre in America. There are three tiers of boxes, each tier seating 450 persons. Besides the boxes, there is a gallery for coloured people. The pit seats 430, and the gallery 500. The whole house, when full, holds 2,500 persons, which pays the manager, at the present prices, \$1,910; but many more are often crowded into it. The house is 187 feet deep, and 76 wide. It is now owned by John Jacob Astor and the heirs of J. R. Beckman. Edward Simpson is the lessee and manager. Strangers desirous of getting seats on crowded nights, will do well to secure them during the day, or go early in the evening, as the despicable practice of selling tickets after the house is full is much practised at this theatre, in imitation of the meaner establishments about town. Prices of admission: boxes \$1; pit 50 cents; gallery 25 cents. Private boxes can be had by application at the door.

BOWERY THEATRE,

Bowery, near Chatham Square.

This building is one of the most conspicuous in the city. Three theatres have been built and burned on the ground now occupied by this building. The first stone was laid in May, 1826, with great pomp and ceremony, by Philip

Hone, then Mayor of the city. It was finished and decorated in a very superior style, and opened for theatrical representations in the October following. The management was conducted with great spirit, and its popularity soon became so great that the manager was enabled to pay Signora Garcia the enormous sum of \$600 a night for performing in the Italian and English opera.

The Bowery Theatre continued to increase in favour and prosperity until the evening of March 22d, 1829, when, like its rival, the Park, it was totally consumed; the conflagration presenting one of the grandest and most sublime spectacles ever witnessed in the city.

It was not long, however, before another magnificent building rose in renovated splendour from its ruins. It was designed by the classical taste of Mr. Tourn, from the celebrated Temple of Theseus, at Athens, and was said to be the finest specimen of doric architecture then in the United States. The entablature above the portico was ornamented with a boldly executed eagle, in bass-relief, richly gilded, which had a noble effect. Many eminent English performers have made their debut in this theatre. Messrs. Holland, Chapman, De Camp, Pearman, and Misses George and Rock; also Mr. and Mrs. Younge, with many others; likewise Mr. Forrest, an American performer.

The present building is rebuilt from the ashes of one that was burnt in the spring of 1845. It is of the same size as the former one, but with superior accommodations. It is the largest theatre in the Union. The performances are of a class inferior to the Park Theatre, and is never visited by the higher classes of New-Yorkers. It is celebrated for spectacles and patriotic pieces, sometimes lavishing very great sums in getting them up. The stock company is vastly inferior to that of the Park Theatre. Prices of admission: box, 50 cents; second and third tiers, 25 cents; pit, 12½ cents.

MITCHELL'S OLYMPIC THEATRE.

This building is situated in Broadway, just below Grand.

street. The present building was converted into a theatre in 1837, by Messrs. Willard and Blake, and after a few months of unsuccessful management, failed. For the two subsequent years it was under the management of several individuals, but was unsuccessful.

Mr. Mitchell, the present manager, took it in 1839, and by untiring industry and great skill and tact, he has converted it into the most popular theatre now established in New-York. Mr. Mitchell has, with great tact, seized upon local incidents and prevailing follies, and moulded them into most amusing pieces. This, together with an unprecedented succession of novelties, has won for its manager most unusual success. He has depended more upon the excellence of his stock company, and the general attention to stage management, than to the fashionable system of starrng. All the Olympic performances are light and amusing, calculated to excite mirth rather than seriousness. The boxes are nightly filled with a very respectable audience. The building is small, but neatly fitted up. The prices of admission are—50 cents to the first tier; 25 cents to the second and third, and 12½ cents to the pit.

NIBLO'S GARDEN.

This very popular place of entertainment is situated in Broadway, corner of Prince-street. The grounds of this establishment, which occupy nearly a whole city square, are laid out with great taste, and ornamented with the rarest of native and exotic plants. Besides the theatre there is a large saloon, for concerts and refreshments, and extensive covered walks, the whole open, during the summer months, to the outer air. The theatre is elegantly fitted up, and capable of seating three thousand persons. It has been for several years in most successful operation, commanding large and very fashionable audiences. It is open only during the summer months. Very expensive fireworks are occasionally given here, and add much to the variety of entertainment. Admission, 50 cents, to all parts of the house.

CHATHAM THEATRE.

This theatre is situated in Chatham-street, near Rosevelt, and opposite Mulberry-street. It has been very successful under its present management. The building is about half as large as the Park Theatre, and far inferior to it in beauty, character of performance, and police order. This theatre is the scene of the performances of such actors as Hill, Rice, and Booth, since his palmy days. Prices of admission: boxes, 25 cents; pit, 12½ cents. It is managed by Messrs. Duverna & De Bar.

RICHMOND HILL THEATRE.

This building was formerly the country residence of Aaron Burr. It was several years ago converted into a theatre, and after variable success was modeled into a ball room, under the name of Tivoli Saloon. It has been recently opened for a theatre, under the management of Mr. Draper, and promises to have a successful career.

VAUXHALL GARDEN.

Vauxhall Garden is situated in the Bowery, between Fourth and Eighth streets. It was formerly much more extensive than it is now, Lafayette Place having been taken from its grounds. It is conducted by Bradford Jones, and devoted to theatrical entertainments, concerts, exhibitions of fireworks, &c. Prices of admission vary, but generally are about 25 cents.

PALMO'S OPERA HOUSE

Was built for the use of an Italian Opera Company, but that failing, it has since been devoted to various kinds of theatrical entertainments. It is a small, but very beautiful house. It is situated in Chambers-street, opposite the Park. Prices of admission vary.

AMERICAN MUSEUM.

This institution was founded in 1810, by the late John Scudder, by whose arduous efforts, and the persevering exertions of its more recent proprietor, it has arisen to its present state of popularity. Scudder commenced his career as an itinerant organ-grinder, and during his wander-

ings he collected the first specimens towards the present large collection.

This museum was for many years, during his management, almost the only place of public amusement in the city. It is situated on Broadway, nearly opposite the Astor House—a very convenient place for all classes of the public. It contains several large halls, each over a hundred feet in length, filled with curiosities of every variety. The museum is peculiarly rich in natural history. It has numerous paintings, a mineralogical cabinet, and a multitude of rare curiosities, well worth visiting. In addition to this, it has a saloon capable of seating about one thousand persons, which is fitted with a stage and scenery, and is used for concerts, dancing, philosophical experiments, and a variety of other entertainments, all for the sum of 25 cents. Persons may go in during the day, examine the museum at their leisure, and visit the saloon in the evening without additional charge. The top of the museum, fitted up as a garden and promenade, commands a fine view of the city.

CASTLE GARDEN

Is situated on a mole, connected with the Battery by a bridge. It was originally erected for a fortification, and used for that purpose till 1823, when it was ceded by the United States to this city; since which it has been leased for a place of public amusement. It was built in 1807–8–9. Immense sums of money were expended on its erection, it having cost the government, at different times, several hundred thousand dollars. The felicitous situation of this spot, projecting into the bay, and commanding one of the finest views in the world, causes it to be a favourite place of resort in the summer months. In 1824, on the occasion of the visit of Gen. Lafayette, a splendid *fete* and gala were given to him at Castle Garden, which for grandeur, expense and entire effect, were never before witnessed in this country. The building has lately been altered, by the addition of a roof and outside promenade, and fitted up with a stage for concerts, operas, &c. The

effect of the interior is very grand, it being by far the largest audience room in the world. It will easily hold 15,000 people, being over six hundred feet in circumference. Admission 25 cents; during the day, 12½ cents. Refreshments always ready.

CROTON AQUEDUCT.

At the city charter election in 1835, it was voted to construct this aqueduct, the vote standing 11,367 in favour, and 5,963 against it. It was then estimated to cost five or six millions of dollars. It has, however, cost the city over twelve millions. It was commenced in 1837, and its completion celebrated on the 14th day of October, 1842. It is, perhaps, the noblest work of the kind in any country, not excepting the monuments of olden times, which have been for ages the admiration of the world. By its facilities we are supplied with the very best of water for culinary purposes, and an unfailing means for the extinguishment of fires. Excluding the grand reservoir, which is five miles long, the length of the aqueduct, from the upper dam to the distributing reservoir on Murray Hill, is 40½ miles. The dam crosses the Croton river six miles from its mouth on the Hudson. This dam gives an elevation to the water of 166 feet above the mean tide in the Hudson river. From this dam the aqueduct runs southerly through the valley of the Hudson, 32 miles to the edge of the Harlem river valley. The whole of the distance is one continuous underground canal, of stone and brick masonry. At the present time, the Harlem river and valley is crossed by iron pipes, but this mode will soon be succeeded by a bridge. From the Harlem river the conduit of masonry is resumed, but again interrupted by iron pipes in the Manhattan valley. It finally reaches the great receiving reservoir on York Hill, about five miles from the City-Hall. The receiving reservoir includes an area of 35 acres. It is 1,826 feet long, and 836 feet wide, and divided by a cross wall into two separate apartments. This reservoir is constructed of immense embankments of solid stone masonry. It will contain 20 feet

CROTON RESERVOIR.

depth of water and 150,000,000 gallons. From the receiving reservoir the aqueduct is continued with cast-iron pipes, two miles to the distributing reservoir at Murray Hill. This reservoir contains an area of more than four acres, and is 2,120 feet square; it is divided into two basins by a partition wall. Its enclosing walls have an average height of $44\frac{1}{2}$ feet. It is three miles from the City-Hall. It is constructed of solid masonry, with hollow walls, built of granite. It is in the Egyptian style of architecture, and presents a very imposing appearance. It has angular buttresses projecting from the wall, and elevated several feet above the main building. An iron railing encloses the walk or promenade which is formed on the top of the walls. In the central pilasters are doors leading to the pipe chambers in the walls, where the cocks are regulated. On the east side a door is cut and stairs constructed within the wall, which ascend to the top. The reservoir holds 30 feet depth of water, with its surface 115 feet above mean tide. The basin measures 20,000,000 of gallons. From the distributing reservoir the water is drawn through large cast-iron pipes, which lead through the central parts of the city, and from which the distribution of water is made by small lateral pipes, diminishing in size as they go from the larger ones. There are over 150 miles of these pipes, and their length is daily increasing. The country for most of the distance traversed by the aqueduct, consists of a series of transverse ridges and ravines, mostly made up of rock, all of which had to be excavated, tunnelled or embanked, at an enormous expense. There are 16 tunnels, varying in length from 100 to over 1,000 feet each. There are 114 culverts of masonry, varying in span from $1\frac{1}{2}$ feet to 25 feet each, crossing many large streams, principally in Westchester county. The canal is built of stone, brick and cement, arched over and under, 6 feet 3 inches wide at the bottom, 7 feet 8 inches at the top of the side walls, and 8 feet 5 inches high; has a descent of $13\frac{1}{4}$ inches per mile, and will discharge 60,000,000 of gallons in 24 hours. The most important structure is the high bridge over the Harlem river. The Harlem valley is a quarter of a mile wide,

and the river 620 feet; and the whole is crossed by the bridge. "There are eight arches over the river, with a span of 80 feet each, springing from piers 20 feet wide at the spring line, which is 60 feet above the surface of the river at high water." The under side of the arches are 100 feet from the river's surface. There are several other arches springing from the ground, of 50 feet span each. The whole structure is of hewn granite. The water will cross this bridge in iron pipes, and over this there will be a carriage way. The whole will cost over \$900,000, and will probably be completed in 1847.

The Croton contains, by analysis, about five grains of solid matter to the gallon. The Schuylkill, or Fairmount water, a little less. The introduction of the Croton water has had the effect of reducing the rates of insurance about 40 cents on the 100 dollars. The facilities for extinguishing fires have greatly increased, as there are fire hydrants at short intervals all over the city. There are also free hydrants at convenient intervals in the streets for public use. Fire plugs are not suffered to be opened, except by authority of certain officers.

By the annual report of the Croton Aqueduct Board for 1845, the receipts for the year ending the 30th April, 1845, were \$118,582 74. The expenditures during the same period, \$73,411 78. The increase of receipts during the present year, have been very great. It is calculated that the whole revenue for the last year will be about \$160,000, and the annual increase will be about 35 per cent. The whole number of permits issued during the year ending the first of May, 1845, was 9,110, representing 9,582 water-takers. A number of steam-boats, houses, &c., often take out but one permit, and hence the above discrepancy between water-takers and permits. The revenue is derived from the following sources: 7,171 private dwellings, \$72,123 88; 2,411 manufactories, mechanical and other miscellaneous sources, \$59,660 67.

Office of the Croton Aqueduct Board, No. 7 New City-Hall. Board; James A. Coffin, President; M. Van Schaick, Samuel B. Ruggles, Harvey Hunt, Horatio Allen.

PUBLIC SCHOOLS.

The Common Schools in this city are under the control of the Board of Education and the Public School Society. The Board of Education is composed of Commissioners elected by the people of each ward agreeably to an act of the Legislature, passed in 1842. The Public School Society was incorporated in 1805, and has for many years managed the affairs of the principal proportion of the Common Schools of the city.

According to a recent report made to the Board of Education, by a committee of the Board, the average number of schools reporting to them for the past year was as follows:

Number of Public Schools subject to the Public School Society,.....	104
Number of Ward Schools subject to Ward Trustees,.....	42
Number of Corporate Schools,.....	21
Total,	167

The average number of scholars that actually attended the several schools during the past year, compared with 1843, is as follows (excluding fractions:)

	1844.	1843.	Increase in 1844.
Public Schools,.....	15,977	15,938	39
Ward Schools,.....	6,806	2,078	4,728
Corporate Schools,.....	1,570	1,450	120
Total,.....	24,353	19,466	4,887

The increase in the average number of scholars attending the schools during the year 1844 over 1843, it will be seen, is 4,887.

MISCELLANEOUS PLACES WORTH VISITING IN NEW-YORK.

ARSENAL.

Among the places worth visiting in this city, few are more interesting than the State Arsenal, in Centre-street, next north of the City Prison. It occupies the site of the old powder magazine, "built in the woods, far out of town," by the early Dutch settlers. It can be visited at any time by the citizens or strangers. Entrance on White-street, by a small door, cut in the wooden fence near the main entrance. The Arsenal occupies a whole square, and consists of a quadrangular court, surrounded on two of its sides by sheds, covering numerous pieces of ordnance, on another side by sheds and the keeper's dwellings, and on the other side by a large building, two stories high, filled with a vast assembly of munitions of war. Over one hundred thousand stands of arms are here arranged in long columns, and present a most imposing appearance. Swords, pikes, banners and various trappings of war are ranged around the walls, in such a manner as to form very pleasing figures. But by far the most interesting objects are the various trophies, taken from the English during the Revolution and the late war. Numerous field pieces, mutilated standards, muskets and other warlike trophies are exposed to view, appropriately labelled, and carefully preserved. The "trophy room" is full of objects of this kind, besides many other objects of interest. The stranger may wander about the place unmolested, and he will be amply repaid for a visit. As it is now, the Arsenal is very poorly protected, being surrounded entirely by simple boarded fences; but, thanks to the liberal and praiseworthy efforts of Gen. Storms, its able commander, we are likely soon to have a handsome and substantial building in place of the insufficient shanty that now cumber the place.

PACKET SHIPS.

The packet ships are generally objects of interest to the stranger. Splendid packet ships are always to be found at our docks, and may be examined at all times without inconvenience. Their splendid cabins, vast size and exquisite models, excite the admiration and wonder of those unused to such things. Their cabins are often fitted up at a vast expense, and their whole build and finish render them superior to any other vessels in the commercial world.

Among the finest may be mentioned the *Ashburton*, *Garrick*, *Victoria*, *Liverpool*, *Queen of the West*, *Yorkshire*, and the *Henry Clay*.

STEAM-SHIPS.

The Atlantic steamers, *Great Britain* and *Great Western*, dock at the foot of Clinton-street, East river, and may be visited generally by requesting a written permit of their agents.

STEAM-BOATS.

The successful establishment of steam-boats in this state, by Robert Fulton, in 1806, was one of the most important events to this country, and to the world at large, that has ever occurred. Since 1806 there have been at least five hundred steam-boats, of every description, built in this city. The success of Fulton, in spite of the opinions of his friends, excited the bitterest enmity in those whose interests were affected and disturbed; but this was soon silenced by strong legislative enactments for protection, and the powerful voice of public opinion. A company was chartered, with exclusive privileges, for the purpose of running boats on the Hudson river, for a limited number of years. This monopoly became extremely lucrative, and in a few years the legality of the charter was legally contested, and Fulton's supposed rights overthrown by the United States Supreme Court. Immediately after this decision a superabundance of steam-boats were built, and the effect of opposition was manifested in the reduction of the fare from eight dollars to four, and even two dollars.

Fulton did not live to see this disastrous consummation. Our limits will not permit of a minute detail of the interesting particulars connected with the rise and progress of steam navigation in New-York. The stranger will hardly be satisfied without seeing some of the noble specimens of steam architecture which abound at our docks. The North river boats are generally more elegantly fitted up, and are lighter and more graceful than the sound-steamers, but they lack the appearance of strength which characterizes the latter. The steamers Oregon, Hendrick Hudson, Empire and Knickerbocker, are the finest on the Hudson. The three first are more than a sixteenth of a mile long each, and have accommodations for nearly a thousand passengers. They are fitted up in most superb style, and all that the arts of gilding, carpentry and furnishing can do to make them perfect specimens of naval architecture, has been lavished on them. The Oregon cost ninety thousand dollars, and has attained a speed of twenty-three miles an hour. There is but little difference between the Oregon and Hudson, either in speed or finish. Of the sound steamers, the Massachusetts and Rhode Island stand pre-eminent. The Massachusetts is over one thousand tons burthen, and is built in the most substantial and elegant manner. The sound steamers' berths are on the North river, near the Battery. The North river steam-boats can be found all along the Hudson river, from the Battery to Canal-street.

SHIP-YARDS.

The extensive ship-yards in the northeast part of the city, in the region called Dry Dock, are very interesting places of resort. Here may be found ships of the largest class, and steamers of every dimension, in progress, and a vast variety of naval operations, rendering it a scene of infinite variety and interest. Extensive machine shops, for steam engines, will be found here also.

SECTIONAL DOCK,

Foot of Pike-street.

This interesting machine attracts great attention from

mechanics and merchants, as it is yet something of a problem. It consists of a series of tanks or vessels, connected together by timber frame-work, which may be sunk by filling them with water, and floated again by pumping them dry. In the process of lifting a vessel, the tanks are filled and sunk, and the vessel is floated over the frame-work, which gradually lifts her out of water, as the tanks are emptied by pumping out their contents, by means of a steam engine. The several tanks are sufficiently buoyant to lift the heaviest vessel; and very recently the *Great Britain*, the largest hull in the world, was raised far enough to repair her propeller.

Near to the sectional dock there is another on a different plan. The vessel is raised by means of a series of pulleys, which, coming from a common point of purchase, diverge, and are attached at different points along the length of a platform, on which the vessel rests, and which lifts her out of water, as the several pulleys act. The pulleys are acted upon by the powerful influence of a hydraulic pump.

Still another plan may be found in successful operation at the ship-yards. It is built on the plan of an inclined rail-way, the vessel being pulled out of water and carried up the inclined plane on a carriage, drawn by horse power. This plan has been in successful operation many years. All these docks are competing for the honour of being introduced at the Navy Yard, at Brooklyn.

FORTS AND FORTIFICATIONS.

The national government has not been unmindful of fortifying the defences of this important city and harbour, and during the last twenty years enormous expenses have been, and still continue to be bestowed upon this important subject. Sufficient has been done to render the city safe from sudden attack by sea or land.

The principal defence consists in the strong works at the narrows. On the right this entrance is commanded by Fort Hamilton and Fort Lafayette. Fort Hamilton is situated on Long Island, and is a very complete and beautiful work. It protects Fort Lafayette, which stands on Hen-

drick's Reef, two hundred yards from the shore. Fort Lafayette has three tiers of guns, and is a very strong and efficient protection to the narrows. It has a very picturesque and castellated appearance. On the opposite side this passage is defended by Fort Tompkins and Fort Richmond. Fort Tompkins is situated on Staten Island height, and has under its protection many sea coast batteries, among which is a permanent battery on the beach, called Fort Richmond. Fort Tompkins is in a dilapidated state, and being built in a very costly manner, it now presents, in its ruinous state, a very picturesque appearance. Its numerous underground passages, which are very extensive, and the splendid prospect enjoyed from its castellated summit, render it an object of great attraction. It is about three miles from the quarantine station. All these forts may be visited at any time.

To protect the inner harbour there are Forts Columbus and Castle Williams, on Governor's Island, and the works on Bedlow's and Ellis's Islands, which unitedly mount over a hundred cannon, of the largest calibre. Vast stores of ordnance and ammunition, of every kind, are deposited in those public stores.

Castle Williams is a circular stone battery, six hundred feet in circumference, and sixty feet high. The walls are ten feet thick, and in the castle are barracks and magazines, and two curious geometrical stone staircases, leading from the lower tier to the terrace. This fort forms a very picturesque object in the harbour.

Fort Columbus, on the same island, is built in the star form, consisting of several batteries, with a covered way leading to Castle Williams. On the island are barracks, where are constantly stationed a corps of United States soldiers. There is another small battery on the island. Governor's Island was formerly covered with trees, and nuts were obtained from it for the early inhabitants. It was afterwards laid out in gardens for the English governors. It may now be visited at all times; row-boats belonging to the fort are constantly plying between the island and

Castle Garden bridge, which will take and return any passenger who is desirous of seeing the forts.

There are several other fortifications, intended for the defence of the city, but they are remote, on Long Island sound.

GRANT THORBURN'S SEED STORE.

This beautiful establishment is fitted up with great taste, and very liberally thrown open to the inspection of the public. The visitor will here find at all times a choice collection of flowers from the proprietor's gardens, and every variety of seeds and plants, often of great rarity. Besides these attractions, one of the rooms is fitted up as a picture gallery, and some of the choicest pictures and engravings of modern times adorn its walls. This store is much resorted to by ladies, and is open at all hours for the visitors' free inspection. It is situated in John-street, near Broadway.

TATTERSALL'S.

This horse market, the largest in the United States, presents a very lively scene on Mondays, the days of auction sales, and is much visited by strangers. On the day of sales, the extensive area of the building is filled with purchasers and spectators.

AGED INDIGENT FEMALES.

This praiseworthy Society was formed in 1814, by a little band of females, and it kept on increasing until 1837-8, when they built an asylum, which contains sixty of these aged females. During the last year the Society has made an extension to the original building—a substantial wing, three stories high. Of the present inmates, there are ten whose ages range from 80 to 90 years, and one of the inmates who died during the last year, was within a few days of being 110 years old. In addition to the regular inmates of the establishment, the Society has 80 pensioners depending upon it, who receive aid in their own humble dwellings. In looking at the report of the treasurer, we see that the funds of the Society are exhausted,

and that in addition to some few hundreds of dollars, for which the Society is still indebted for the erection of the addition, it will need sufficient to carry out the objects of the Society for the coming year. We need hardly say that this Society has the strongest claims for support, and that all the funds which are needed to pay off the claims that are outstanding against it, and what may be necessary for the support of its inmates, ought to be promptly furnished. Donations will be thankfully received by any one of the philanthropic ladies who compose the Board of Management—their names being: Mrs. Mowatt, 1st Directress, 144 Greene-street; Mrs. H. Gillett, 2d Directress, 20 Oliver street; Miss Maria Boyd, Treasurer, 291 Fourth-street; Miss Maynard, Secretary, 222 Vesey-street.

EATING-HOUSES IN NEW-YORK.

There are one hundred and twenty-three eating-houses or refectories in the city of New-York. Those establishments where oysters exclusively are kept are not included in this number; but we speak of those places only where breakfast, dinner and tea can be had at all hours. Of this number seventeen are in Broadway, fifteen in Nassau-street, ten in Fulton-street, seven in Catharine-street, six in West-street, six in Water-street, four in Washington-street, four in Vesey-street, two in Chambers-street, two in Chatham-street, two in South-street, two in Canal-street, two in Grand-street, two in Spring-street. There are thirteen in Fulton Market, six in Washington Market, and the remaining twenty-three are scattered in various parts of the city.

These establishments give employment to nearly a thousand persons, of whom Irish and Germans form a large portion. The waiters are paid, the men from ten to twelve dollars, and the boys from six to seven dollars a month, their board and lodging included. The cooks get about eight and ten, and the scullions or dish-washers about four and five dollars a month. In some of these eating-houses

the hands are kept at work for about fifteen and sixteen hours out of the twenty-four. These places seldom close before one and two o'clock in the morning; but, as a general rule, the cheap eating-houses close between eight and ten in the evening. We present the following brief account of those individuals who have been the pioneer caterers of the eating-houses of our city.

GEORGE W. BROWNE started his celebrated eating-house in Water-street about twenty-six years ago. It is now, and always has been, a great resort for the merchants down town.

STEPHEN HOLT commenced an eating establishment about twenty years ago on the corner of Fulton and Water-streets. He kept what is called a "Shilling Plate and Two Shilling Ordinary." He built the splendid Hotel formerly called "Holt's Hotel," but now known as the "United States Hotel." Holt has lately started a new eating-house on the corner of Fulton and Nassau streets, up stairs.

DELMONICO opened his capacious and splendid establishment on the corner of South William and Beaver streets, in 1827. His place was burnt in the great conflagration of 1835, and came very near being again destroyed during the late fire of July, 1845. This is a very fashionable resort for the French and Germans.

HUGH PATTERSON started an eating establishment about fifteen years since, on the corner of Ann and Nassau streets, now occupied by Green & Mercer.

DANIEL SWEENEY, whose fame has extended far and wide, and who is looked upon as the father of the cheap eating establishments, started his business about ten years ago in Ann-street, where he still continues.

GOSLING commenced in Fulton-street about six years since. He remained there about two years, and then removed to Nassau-street, where he now is. His is an American and French Restaurant. It is an immense establish-

ment. He dines over a thousand people every day. Open Sundays. The establishment is on the cheap plan. The house now occupied by Gosling was formerly the German church.

JOHN FLORENCE, Jr., opened his establishment about five years ago, next door to the corner of Park Place and Broadway. Three years since he enlarged his place, and fitted it up in the most magnificent style. He is doing an immense business; and his place is the resort of those who delight in the rarer luxuries of life. No place in the city is so celebrated for game.

EPHRAIM SWEENEY has opened an establishment in Chatham-street, near Chambers.

THOMAS DOWNING—at the mention of whose name one thinks of *oysters served up in Downing's inimitable style*—opened his ancient and celebrated establishment about thirty years since in Broad-street. His establishment in Broadway was opened about three years ago. He has another oyster saloon in the upper part of Broadway. Downing is a coloured man, and has realized a large fortune in his business. His oyster establishment is the most popular in the city.

ALEXANDER WELSH, more familiarly known as "Sandy Welsh," has in his day occupied quite a prominent position among those who are fond of the luxuries of the table. Welsh kept a popular establishment under the American Museum, where game and other rarities were to be found in abundance. It is now called Terrapin Lunch, and kept by Peter R. Steile.

There are two principal classes of eating houses in New-York—the cheap and the dear. At Sweeney's and similar establishments, the usual prices are six cents for a plate of meats, and three cents for a plate of vegetables. The more pretending ask twice or three times these prices. Among those not before enumerated, it may be well for the stranger to name Johnson's, in Fulton, near Broadway,

Tammany Hall, Lovejoy's Hotel, Gunter's, in Fulton, near Broadway, Parker's John-street Coffee House, 18 John-street, and Brown's, 51 Nassau-street.

PUBLIC SQUARES.

BATTERY.

This is the most delightful promenade in the city, and one of the finest in the world. The view from this spot embraces the whole of the bay, its islands and fortifications, and the shore of New-Jersey. The intense heat of summer, which compels most people to keep within doors, is here moderated by the fresh sea breezes from the ocean below. Originally this point of land was fortified by the Dutch, who threw up embankments, upon which they placed some pieces of cannon. In process of time it became overgrown with grass, and lofty sycamores, and became a favourite resort of the old burghers, who repaired to its grateful shade to smoke and gossip. It became the favourite walk of declining age; the healthful resort of the feeble invalid; the Sunday refreshment of the dusty tradesman; the scene of many a boyish gambol, the comfort of the citizen, and the pride and ornament of Manhattan. Some years since the city government expended \$150,000 in beautifying the ground—embanking and fencing its front, grading its walks, and surrounding it with costly iron railing. Originally its present site was a bristling mass of rocks, but this appearance has long since vanished. The Battery is in the form of a crescent, and contains about eleven acres.

THE PARK

Was, in early times, called the *Commons*, being then unappropriated ground in the outskirts of the city. It contains about ten acres and a half. Rows of trees are planted here, and on many places in the Park, which is interspersed with walks, that afford a cool and shady retreat in summer weather. The whole is surrounded with an iron railing that cost the city \$15,000. It contains the City-Hall,

Alms-House buildings, Rotunda and Hall of Records. On the south end there is a marble gateway, beautifully finished, which was founded with great pomp, the Mayor presiding at the ceremonies, and depositing in one of the vases various coins, papers and memorials of present times. Two of the stone balls surmounting the posts were presented to the city by Com. Perry, they having come into his possession as gifts from the Turkish Government;—they are used by the Turks as cannon balls.

The Park contains the largest fountain in the city. The basin is one hundred feet in diameter, and the circumference is sometimes entirely filled by the various jets of the "Holiday fountain." The machinery of the fountain is so arranged as to supply a variety of forms in the jets, and they may be changed in a few minutes. When the water is thrown up in a single stream, it ascends to the height of about seventy feet. It is in contemplation to ornament the basin with marble work, statues, &c.

BOWLING GREEN.

The Bowling Green, at the southern end of Broadway, occupies ground immediately in front of the site of the old Dutch fort and church, and was used during the revolution, by the British, for a bowling alley. It contained before the revolution a leaden equestrian statue of George III, which was pulled down by the populace, and converted into musket balls. It contains a fountain, built at the expense of the owners of the surrounding property. The fountain emerges from an uncouth pile of stone, which was intended to have a rural aspect, but does not have the desired effect. In the summer season the fountain is occasionally illuminated with coloured lights, which gives it a magnificent effect. The enclosure is now made to hold some deer, geese and other live animals. It is said that the balls which have been broken off the iron fence posts were used as cannon balls during the last war.

HUDSON SQUARE,

Or St. John's Park, between Beach, Laight, Varick and Hudson streets, was formerly a low sandy beach, partly

covered with water at high tide. It belongs to the Vestry of Trinity Church, but has been reserved as a permanent square. It is accessible to the people in its neighbourhood, who have keys. Any person may hire a key of the keeper for a small annual sum. It is beautifully laid out with walks, shaded with a lofty growth of trees, with numerous beds of rare flowers, and surrounded with an iron fence, which cost \$26,000. It contains a very tasty fountain, and is by far the most beautiful public square in the city. It contains about four acres of land.

WASHINGTON SQUARE.

Another great and most effective ornament to the city was formed by laying out the ground formerly occupied as a Potter's Field. The bones were collected in a vast trench, one on each side of the square, which were enclosed with fences, and planted with trees. For many years this was used for burial purposes, and it is computed that over a hundred thousand bodies have been buried where now assemble for pleasure multitudes of living beings. The square is surrounded with splendid private houses, and on one side is the University building and a splendid church. One third of the ground comprising the square was purchased for \$80,000, making a gross value of \$240,000 devoted to the improvement of this quarter of the city. The square contains a little over nine acres.

UNION PLACE

Is an oval enclosure at the head of Broadway, between Fourteenth and Seventeenth streets. It is enclosed with an iron fence, of great beauty and cost, and has besides a beautiful fountain with ornamental jets.

TOMPEINS' SQUARE,

Which is used for a parade ground, is one of the largest squares in the city. It is not yet much frequented, as the trees are young, and the place not finished. It is between Avenue A and B, and between Sixth and Tenth streets.

Farther up the city are other public squares, viz : Madison square, Hamilton square, and others not yet regulated.

Bellevue square is not yet fully laid out, but will be when finished one of the finest in the city.

NEW-YORK AND HARLEM RAIL-ROAD.

This Company was incorporated in 1831, and has since been so amended, that its capital, originally \$350,000, is now \$1,150,000. The road cost \$1,159,323 66. The route traversed by this road, is from the City-Hall, through Centre-street, Broome-street and the Bowery, twenty-seven miles, to White Plains, passing through Yorkville and Harlem. The receipts of the road from January 1st, 1844, to January 1st, 1845, amounted to \$140,684 90 : from January 1st, 1845, to November 1st, of the same year, \$133,548 01. The first running of cars on this road was in November, 1832, when they travelled no farther than Fourteenth-street. The road has gradually lengthened from that time, and it is now expected that it will soon reach Albany, through the inland counties. The road to Harlem is laid on a heavy H rail. The Tunnel, (an engraving of which will accompany this article,) is an excavation in the solid rock, a quarter of a mile long, handsomely finished at both ends, and approached through a long deep cut of more than a mile in length. It is one of the most extensive excavations of this kind in the world, and is much visited by the curious. This road furnishes the means of a delightful journey into the country. In the spring and summer, when the weather is favourable, it is traversed by immense numbers of New-York citizens.

Cars leave the Depot, City-Hall, for Twenty-seventh-street, every six minutes, from half-past seven, A. M., to eight, P. M. Cars leave City-Hall, (night line) every twenty minutes, from eight to twelve. Cars leave the City-Hall every hour during the day for Harlem, and return as often. Cars leave the City-Hall for White Plains at half-past seven, and half-past ten, A. M., and one, and half-past three, P. M.

Fare to Twenty-seventh-street, two miles and a half, 6½ cents ; to Receiving Reservoir, three miles and a quarter, 12½ cents ; to Harlem, eight miles, 12½ cents ; and to

HARLEM RAILROAD TUNNEL.

White Plains, twenty-seven miles, 50 cents; intermediate places in proportion. Persons desirous of visiting the Reservoir, and other places along the Croton Aqueduct, would do well to travel on this Rail-Road.

MARKETS IN NEW-YORK.

A market place for the accommodation of the butchers and the country people, was anciently *under the trees in front of the fort*, near the corner of Water and Whitehall streets. As the city enlarged, the market places were removed to the east and north, first at the foot of Broad-street, then to Coenties Slip, and subsequently to Old Slip, and to the Vlie, (a Dutch word, indicating a valley, a rural spot, formed by a river which formerly run up Maiden Lane,) or Fly Market, foot of Maiden Lane, and to Fulton and Catharine streets.

The market houses of this city are now judiciously distributed in various quarters of the town, to suit the wants and convenience of the citizens; the two principal ones being situated close to the water, one on the Hudson, and one on the East river, at the extremity of Fulton-street on each side, and adjacent to the two most important ferries, which render them very accessible to the country people and the fishermen.

Fulton Market.—The Fulton market was built in 1821, on ground formerly occupied by unsightly wooden build-ings, which were destroyed by fire.

When the Fulton market was completed, and the stalls put up at auction, the whole number, amounting to eighty-six, were disposed of for \$19,015, an average of \$216 each. This number was found to be greater than could be profitably occupied, as the victuallers could not pay their rents; consequently, the number was reduced, and twenty-seven of the stalls in the southeast wing were allotted to fishermen, and the residue of the stalls were re-let at a diminished price. The first sale of the *same number* producing \$15,000, and the present receipts being only \$6,445. In the same manner, the rooms in the basement, only twenty-

one of which were let at auction for \$7,775 per annum, now let for \$6,805. The purchase of the ground, and cost of erecting the market was \$220,000. The building is of one story, with a basement, from which round stone pillars rise, connected with each other by arches, and supporting the roof. The interior ceiling is arched from one extremity to the other, plastered and white-washed. The buildings containing the stalls occupy three sides of a square, with double ranges of stalls on each side, the first beginning at South-street, extending up Fulton-street to Front-street; the second, or main front, to Beekman-street; the third, thence to South-street. Over the centre of each of the front entrances are rooms of one story, and from the middle one, on Front-street, occupied by the clerk of the market, rises a small neat cupola, containing a bell to notify the close of the market. A separate building for country people occupies the centre of the block, but entirely insulated from the rest of the edifice, and surrounded with an open paved area, with two pumps. The hucksters' vegetable stalls, with cellars under each, are adjacent to the inside eaves of the building on Fulton and Front streets. As the other markets are somewhat on the same model, this description will suffice for all. The fish cars are in the adjacent slip, and constantly filled with live fish, the smacks arriving hourly from the fishing grounds, a few miles out in the Atlantic Ocean, and near Sandy Hook.

There is no official account taken in New-York of the vast amount of pork and provisions that arrive coast-wise, and down the Hudson, and sold at the docks to consumers in the city, and which constitutes the chief source of supply of many articles of importance, such as butter, cheese, beef and pork, both fresh and salted, fish, &c.

The vast amount of business done at this market in selling, eating, &c., will astonish the attentive observer. It is a place well worth a visit from those curious in such matters. The morning is perhaps the most interesting time to visit it.

The revenue of the Fulton market in 1844, was \$18,775 69.

Washington Market.—The next principal market is the Washington market, in Washington-street, corner of Vesey and Fulton streets, near the water's edge. It occupies a whole square, and is very similar to the Fulton market in its construction and internal arrangements. This market was formerly called the Bear market, from the fact that bear meat was there exposed for sale. The amount of business done here is less than at the Fulton, but the whole south and west population of the city frequent it. The products of the North river country find their principal sale in this market.

Its revenue in 1844 was \$18,775 20—its cost \$130,000.

Catharine Market, Catharine Slip, occupies a small square between Cherry and South streets.

Centre Market, Centre-street, between Grand and Broome. This market occupies a large building, two stories high, and substantially built of brick. The market rooms run its whole length, with stalls on each side, similar to the Boston markets, and it presents a neat and comfortable appearance, free from the bustle and confusion that is so conspicuous in the other markets. The halls in the second story are occupied by certain military companies as armories and drill-rooms—and for various other purposes by the city police.

Chelsea Market—In Ninth Avenue, near Eighteenth-street.

Clinton Market—Between Washington and West streets, and between Spring and Canal streets.

Essex Market—In Grand-street, between Essex and Ludlow.

Franklin Market—A small building in Old Slip, East River.

Gouverneur Market—Gouverneur-street, corner of Water-street.

Greenwich Market—In Weehawken-street, corner of Christopher and West.

Jefferson Market—Sixth Avenue, corner of Greenwich-street.

Monroe Market—Cor|cars-street, between Monroe and Grand.

Manhattan Market—Houston-street, corner of First.

Tompkins Market—Third Avenue, between Sixth and Seventh streets.

Union Market—Second-street, corner of Houston.

All the markets are required by law to close every day, except Saturdays, at 12 o'clock; after which they are thoroughly washed. On Saturdays they keep open till 12 o'clock at night. Each market has a clerk appointed by the city, who attends to the general conduct of its affairs.

The idea has been entertained by many gentlemen of taste in the city, of transforming the new City-Hall in the Park into an elegant flower and fruit market. It would be a very great acquisition to the city if properly carried out.

FERRIES.

All the Ferries in New-York are supplied with large and safe boats, well fitted up for the accommodation of passengers in inclement weather. The Fulton Ferry, in particular, has some very fine boats. They are sources of large revenue to the city, being leased by the Corporation to separate companies.

Fulton Ferry—From Fulton-street, New-York, to Fulton-street, Brooklyn, is 731 yards wide. Boats leave every five minutes during the day and evening, till nine o'clock, after which, till twelve o'clock, they leave every half hour till morning. [*For particulars, see Brooklyn.*]

South Ferry—From Whitehall-street, near the Battery, East river, to Atlantic-street, Brooklyn. Same regulations as the Fulton Ferry. This Ferry is 1300 yards wide.

Catharine Ferry—From Catharine-street, New-York, to Main-street, Brooklyn, is 736 yards wide. Boats run every fifteen minutes during the day, and all night, same as at the Fulton Ferry.

Navy Yard Ferry—From Walnut-street, New-York, to Jackson-street, Brooklyn, is 707 yards wide. Boats run every fifteen minutes.

Astoria, called *Hell-Gate Ferry*, from the foot of Eighty-sixth-street, East river.

Elizabethport.—This Ferry lands at Port Richmond and Staten Island once a day. It starts from Battery Place.

Fort Lee.—From the foot of Canal-street.

Hoboken Ferries.—Barclay-street Ferry to Hoboken, every fifteen minutes during the day. This Ferry is two miles long, and has admirable boats—Ferryage 6½ cents.

Canal-street Ferry, from the foot of Canal-street, one mile and a half long; and Christopher-street Ferry, from the foot of Christopher-street, Chelsea, one mile long—runs every fifteen minutes to Hoboken—Ferryage 6½ cents.

Jersey City Ferry.—From the foot of Courtlandt-street, one mile long; runs every fifteen minutes during the day, and every half hour during the night, till twelve o'clock—Ferryage 6½ cents.

Staten Island Ferry.—This Ferry lands at the Quarantine, and at the lower landing. Starts from Whitehall-street every hour during the day, subject, however, to some change in different seasons—Fare 6½ cents in summer, and 12½ cents in winter.

Williamsburgh has three Ferries—one from the foot of Peck Slip (2800 yards,) every half hour; also, from the foot of Grand-street, (950 yards,) and from the foot of Houston-street.

STEAM-BOATS, TOW-BOATS AND PACKETS WHICH LEAVE NEW-YORK, WITH THEIR PLACES OF STARTING.

Albany and Boston steam-boat, via Bridgeport and Housatonic Rail-Road, foot of Market-street.

Albany tow-boat, Broad-street, E. R., and Courtlandt-street, N. R.

Albany, People's Line, steam-boat, (evening,) Pier 14, between Courtlandt and Liberty streets.

Albany steam-boat, Pier 18, N. R., foot of Courtlandt-street.

Albany steam-boat, Pier 24, N. R., West, between Barclay and Robinson streets.

Albany and Troy steam-boat, (morning and evening,) foot of Barclay-street and foot of Courtlandt-street.

Alexandria packet, Pier 14, E. R.

Amboy, Pier 2, N. R.

Apalachicola packet, Burling Slip, E. R.

Astoria, Flushing and Ravenswood steam-boat, Fulton Slip, E. R.

Boston—See Norwich, Providence and Stonington.

Boston, packet, Coenties Slip and Maiden Lane, Pier 18, E. R.

Bridgeport steam-boat, foot of Market Slip, E. R.

Bridgeport packet, James' Slip, E. R.

Bristol, Eng., steam-ship, Clinton-street, E. R.

Caldwell's, West Point and Cold Spring steam-boat, foot of Warren-street, N. R.

Castleton steam-boat, foot of Battery Place.

Catskill steam-boat, Albany Basin, Pier 13, N. R., foot of Cedar-street.

Charleston packet, Burling Slip and Wall-street, E. R.

Cold Spring, West Point and Caldwell's steam-boat, foot of Warren-street, N. R.

Darien packet, Beekman-street, E. R.

Dobbs' Ferry steam-boat, Pier 27, N. R., foot of Chambers-street.

East Haddam packet, James' Slip, E. R.

Eastport packet, Pier 2, E. R.

Elizabethtown Point steam-boat, Pier 1, N. R., foot of Battery Place.

Fall River packet, Maiden Lane and Coenties Slip, E. R.

Fishkill tow-boat, Liberty-street, N. R.

Flushing, Astoria and Ravenswood steam-boat, Fulton Slip, E. R.

Fort Lee steam-boat, foot of Hoboken-street, N. R.

Georgetown, D. C., packet, Pier 14, E. R.

Georgetown, S. C., packet, Coenties Slip, east side, E. R.

Grassy Point steam-boat, Pier 27, N. R., foot of Chambers-street.

Hartford, Ct., steam-boat, Peck Slip, E. R.

Hartford packet, James' and Coenties Slips, E. R.

- Hudson* steam-boat, Albany Basin, foot of Cedar-street, N. R.
Hudson tow-boat, Cedar-street, N. R.
Key West packet, Pier 11, E. R.
London packet, Maiden Lane, Piers 19 and 20, E. R.
do. do. Beekman-street, E. R.
Liverpool, do. Maiden Lane, E. R.
do. do. Beekman-street, E. R.
do. do. Wall-street, E. R.
Middletown, Ct., packet, James' Slip, E. R.
Mobile packet, Burling Slip and Wall-street, E. R.
Nantucket packet, Stevens' wharf, E. R.
Newark steam-boat, foot of Barclay-street, N. R.
Newark, N. J., packet, Whitchall, E. R.
New-Bedford packet, Peck Slip, E. R.
New-Brighton steam-boat, foot of Battery Place.
New-Brunswick steam-boat, Pier 23, N. R., between Barclay and Robinson streets.
New-Brunswick packet, Broad-street, E. R.
Newburgh steam-boat, Pier 26, N. R., between Murray and Warren streets.
Newburgh packet, Warren-street, N. R.
New-Hamburgh and Marlborough steam-boat, foot of Robinson street.
New-Haven, Ct., steam-boat, (morning and evening,) Peck Slip, E. R.
New-Haven packet, Peck Slip, E. R.
New-London packet, Burling Slip, E. R.
New-Orleans packet, Wall-street, E. R.
Newport and Providence steam-boat, Pier 3, N. R., office 19 West.
New-Rochelle steam-boat, Fulton-street, N. R.
Norfolk packet, James' Slip, E. R.
Norwalk, Ct., steam-boat, Catharine Slip, E. R.
Norwich packet, Burling Slip, E. R.
Norwich, Ct., Worcester and Boston, by steam-boat, from Pier 1, N. R., foot of Battery Place; for Boston, by Long Island Rail-Road, from the South Ferry to Brooklyn, at the foot of Whitchall-street.

Peekskill steam-boat, Pier 27, N. R., foot of Chambers-street.

Petersburgh packet, Wall-street.

Philadelphia and Comden steam-boat, via Amboy, Pier 2, N. R.

Philadelphia, by the New-Jersey Rail-Road, from the foot of Courtlandt-street.

Philadelphia packet, Old and Coenties Slips, E. R.

Philadelphia tow-boat, Coenties Slip, Pier 2, N. R.

Port Chester, Rocky Neck, Stamford and Norwalk steam-boat, from Catharine Market Slip.

Portland packet, Coenties Slip, E. R.

Portsmouth, N. H., packet, Coenties Slip, E. R.

Port Richmond steam-boat, foot of Battery Place.

Poughkeepsie steam-boat, Pier foot of Barclay-street.

Poughkeepsie tow-boat, Liberty-street, N. R.

Providence and Boston, via Stonington, by steam-boat, from Pier 1, N. R., foot of Battery Place; and by the Long Island Rail-Road, from the South Ferry to Brooklyn, at the foot of Whitehall-street.

Providence packet, Maiden Lane, E. R.

Rensselaer, Flushing and Astoria steam-boat, Fulton Slip, E. R.

Rhinebeck steam-boat, foot of Robinson-street.

Richmond packet, Wall-street, E. R.

Sag Harbour packet, Peck Slip, E. R.

Salem, Mass., packet, Coenties Slip, E. R.

Savannah packet, Wall and Maiden Lane.

Shrewsbury, N. J., packet, Coenties Slip.

Sing Sing steam-boat, Pier 27, N. R., foot of Chambers-street.

Steam Navigation Company, 82 Courtlandt-street.

Stonington, Providence and Boston, by steam-boat, from Pier 1, N. R., foot of Battery Place; and by Long Island Rail-Road, from the South Ferry to Brooklyn, at the foot of Whitehall.

Tarrytown, Pier 27, N. R., foot of Chambers-street.

Trenton, by New-Jersey Rail-Road, Pier 16, N. R., foot of Courtlandt-street.

Troy steam-boat, (morning and evening,) foot of Barclay-street, N. R., and Pier 18, N. R., foot of Courtlandt-street.

Troy tow-boat, Broad-street, E. R.

Troy and Albany steam-boat, (evening,) from Pier 18, N. R., foot of Courtlandt-street.

Washington City packet, Pier 14, E. R.

West Point, Caldwell's and Cold Spring steam-boat, foot of Warren-street, N. R.

Wilmington, N. C., packet, Central Wharf, Roosevelt-street, E. R.

Yonkers steam-boat, Pier 21, N. R., foot of Chambers-street.

STAGE LINES.

Time of departure varies with the seasons.

Harlem and Yorkville, every half hour, from 23 Chatham-street.

Astoria and Yorkville, every hour, from 23 Chatham-street.

Dover, New-Jersey, leaves 73 Courtlandt-street daily.

Bloomington and Manhattanville, leaves every 40 minutes, from Tryon's Row, corner of Chatham-street.

Jamaica, L. I., leaves 340 Pearl-street.

Morristown, N. J., leaves 73 Courtlandt-street.

Newtown and Flushing, 340 Pearl-street.

Yorkville and Harlem, every half hour, from 23 Chatham-street.

Yorkville and Astoria, every hour, from 23 Chatham-street.

Roslin, Manhasset, Great Neck and Little Neck, from 340 Pearl-street.

Powerville, N. J., from 73 Courtlandt-street.

Morristown, N. J., from 73 Courtlandt-street.

From the following statement it appears that there are 258 regular Omnibuses in New-York. Besides these, there are 19 other stages; 2,989 drays; 201 hackney-coaches, and 231 cabs.

BROADWAY LINES OF OMNIBUSES.

	Distances traversed.	No. trips up and down.	No. Horses.	No. Stages.
EMPIRE LINE.—<i>Lent & Andrews.</i>				
<i>Route</i> —From South Ferry, through Whitehall, up Broadway, through Ninth, up Av. 6th to 14th-street,	2½	20	140	20
CHELSEA LINE.—<i>Kipp & Brown.</i>				
<i>Route</i> —From Av. 9, cor. 27th-street, down Av. 9, through Hudson, Canal and Broadway, to Bowling Green,	3½	18	206	22
FULTON FERRY LINE.—<i>Slocum, Reynolds & Co.</i>				
<i>Route</i> —From Av. 7, cor. 21st-street, down Av. 7, through Greenwich Av., Av. 6, Amity, Broadway and Fulton, to Fulton Ferry,	3	20	120	51
GREENWICH LINE.—<i>Kipp & Brown.</i>				
<i>Route</i> —From Hudson, cor. Charles, down Hudson, through Chambers, Greenwich, Battery Place and Whitehall, to South Ferry,	3	20	14	8
KNICKERBOCKER LINE.—<i>Palmer & Peters.</i>				
<i>Route</i> —From Av. 8, cor. 23d, down Av. 8, through Bleecker, Broadway and Whitehall, to South Ferry,	3½	16	222	38
MADISON LINE.—<i>Slocum, Reynolds & Co.</i>				
<i>Route</i> —From Av. 4, cor. 23d, down Av. 4, through Broadway and Whitehall, to South Ferry,	3	20	132	23
MERCHANTS' LINE.				
<i>Route</i> —From Av. 6, cor. 23d, down Av. 6, through Eleventh, Broadway, Wall and Pearl, to Hanover Square,	3½	20	120	20

MURPHY & Co's LINE.—Murphy & Co.

<i>Route</i> —From Av. 3, cor. 28th, down Av. 3, through the Bowery, Chatham, Broad- way, Whitehall, to South Ferry, . . .	3½ 16 120 20
--	--------------

TOMPKINS' SQUARE LINE.—Murphy & Co.

<i>Route</i> —From Tompkins Square, through 8th and the Bowery, Chatham, Broad- way, Whitehall, to South Ferry, . . .	2½ 16 65 11
---	-------------

UNION LINE.—Hatfields & Bertine.

<i>Route</i> —Commencing at Av. D, in 10th, down Av. D, through Columbia, Grand, Bowery, Chatham, Broadway, White- hall, to S. Ferry,	3 16 175 27
--	-------------

**EAST BROADWAY LINE.—Hatfields & Ber-
tine.**

<i>Route</i> —From Av. D, cor. 10th, down Av. D, through Columbia, East Broadway, Chatham, Broadway, Whitehall, to South Ferry,	3 16 178 25
--	-------------

WAVERLY LINE.—Slocum, Reynolds & Co.

<i>Route</i> —Commencing at Av. 6, cor. 23d, down Av. 6, Waverly Place, Broadway and Whitehall, to South Ferry, . . .	3 20 120 20
---	-------------

The Knickerbocker Line connects at Av. 8, 25th-street,
with the Bloomingdale stages.

The whole number of miles traversed per day is 671 ;
number of horses, 1,598 ; and there are 258 stages.

EXPRESSES.

Adams & Co., 17 Wall-street, Boston, Worcester, Norwich, Philadelphia, Baltimore, Washington, Pittsburgh and Foreign.

Baldwin, 6 Wall-street, Newark, New-Haven and Hartford.

Carman, Brooklyn, 20 Liberty-street.

Godfrey & Co., 6 Wall-street, Taunton, New-Bedford and Nantucket.

Gorton, 17 Wall-street, Stonington, Providence, Newport and Fall River.

Harnden & Co., 6 Wall-street, Boston, Providence, Philadelphia, Baltimore, Washington, Pittsburgh and Foreign.

Mathews, 10 Wall-street, Oswego, (N. Y.) Kingston and Toronto, (Canada.)

Livingston & Co., 6 Wall-street, Philadelphia, Baltimore, Washington, Pittsburgh and South.

Livingston & Wells, 10 Wall-street, Albany, Buffalo, Cleveland, Detroit, Chicago and Canada.

Pullen & Co., 10 Wall-street, Troy and Northern Express.

Virgil & Co., 10 Wall-street, Montreal and Quebec.

HACKNEY COACH STANDS.

1. On the south side of the Park.
2. In Broadway, near Wall-street.
3. In Broadway, around the Bowling Green.
4. In Pearl-street, at Hanover square.
5. In Hudson-street, along St. John's Park.
6. In Hudson-street, near Duane.
7. In Chatham square.
8. On the north side of Canal-street, near Broadway.
9. Near all the principal steam-boat landings.

RATES OF FARE OF HACKNEY COACHES, CARRIAGES OR CABS.

(Established by City Ordinance.)

For conveying a passenger any distance not exceeding one mile, twenty-five cents; for conveying two passengers the same distance, fifty cents, or twenty-five cents each, and every additional passenger twenty-five cents.

For conveying a passenger any distance exceeding a mile, and within two miles, fifty-cents; and for every additional passenger, twenty-five cents.

For conveying one passenger to the New Alma-House, fifty cents, and for returning, fifty cents; for conveying two passengers the same distance, seventy-five cents for the two, and twenty-five cents going, and twenty-five cents returning, for every additional passenger.

For conveying any passenger to Forty-second-street, and remaining half an hour, and returning, one dollar; and for every additional passenger, twenty-five cents.

For conveying one passenger to Sixty-first-street, and remaining three-quarters of an hour, and returning, one dollar and fifty cents; and for every additional passenger, thirty-seven and a half cents.

For conveying one passenger to Eighty-sixth-street, and remaining an hour, and returning, two dollars; and for every additional passenger, fifty cents.

For conveying one or more passengers to Harlem, and returning, with the privilege of remaining three hours, four dollars.

For conveying one or more passengers to King's bridge, and returning, with the privilege of keeping the carriage or cab all day, five dollars.

For the use of a hackney coach, carriage or cab, by the day, with one or more passengers, five dollars.

For the use of a hackney coach, carriage or cab, by the hour, with one or more passengers, with the privilege of going from place to place, and stopping as often as may be required, as follows:—for the first hour, one dollar; for the second hour, seventy-five cents; and for every succeeding hour, fifty cents.

For children between two and fourteen years of age, half price only is to be charged; and for children under two years of age, no charge is to be made.

Whenever a hackney coach, carriage or cab shall be detained, except as aforesaid, the owner or driver shall be allowed after the rate of seventy-five cents an hour, and thirty-seven and a half cents for each and every subsequent hour, and so on in proportion for any part of the first and subsequent hour which the same may be so detained.

For attending a funeral within the Lamp and Watch District, two dollars, and the Potter's Field, three dollars; which charge shall include the necessary detention and returning with passengers.

Every driver or owner of a hackney coach, carriage or cab, shall carry, transport, and convey in and upon his coach, carriage or cab, in addition to the person or persons therein, one trunk, valise, saddle-bag, carpet-bag, portmanteau or box, if he be requested so to do, for each passenger, without charge or compensation therefor; but for every trunk or other such article above named, more than one for each passenger, he shall be entitled to demand and receive the sum of six cents.

In case of disagreement as to distance or price, the same shall be determined by the Mayor, or Superintendent of hackney coaches and cabs.

The owner of any hackney coach, carriage or cab, shall not demand or receive any pay for the conveyance of any passenger, unless the number of the carriage, and the rates

and prices of fare, shall be fixed and placed in a manner hereinafter directed in second section of title fourth of this law, at the time such passenger may be conveyed in such coach, carriage or cab.

The owner or driver of any hackney coach, carriage or cab, shall not be entitled to recover or receive any pay from any person from whom he shall have demanded any greater price of rates than he may be authorized to receive as aforesaid.

Upon the trial of any cause commenced for the recovery of any of the aforesaid prices or rates, it shall be incumbent upon the plaintiff or plaintiffs in such action, to prove that the number and prices or rates were placed and fixed in pursuance of the provisions of this law, at the time the services were rendered for which the suit may be brought.

No owner or driver of any hackney coach, carriage or cab, in the city of New-York, shall ask, demand or receive any larger sum than he or they may be entitled to receive as aforesaid, under the penalty of ten dollars for every such offence, to be sued for and recovered from the owner or owners, or drivers, of any such hackney coach, carriage or cab, severally and respectively.

Complaints of any violation of the hackney coach or cab law, can be made at the Mayor's office, City-Hall, or at the office of the Chief of Police, in the Park.

PUBLIC PORTERS AND HAND-CART MEN—RATES OF FARE.

For carrying a load upon a wheelbarrow—

1. For any distance not exceeding half a mile, 12½ cents.
2. For any distance over half a mile, and not exceeding a mile, 25 cents; and in that proportion for any greater distance.

For carrying a load upon a hand-barrow—

1. For any distance not exceeding half a mile, 25 cents.
2. For any distance over half a mile, and not exceeding a mile, 44 cents; and in that proportion for any greater distance.

For carting a load in a hand-cart—

1. For any distance not exceeding half a mile, 18 cents.
2. For any distance over half a mile, and not exceeding a mile, 31 cents; and in that proportion for any greater distance.

HUDSON RIVER STEAM-BOATS.

The following list embraces all the *Passage Boats* built and running on the Hudson river, between New-York, Albany and Troy, since their first introduction by Robert Fulton, in the fall of 1807.

When built.	Names.	Tons.	Remarks.
1807	Clermont,		Name changed to N. River
1808	North River,	166,	Broken up
1809	Car of Neptune,	295,	" "
1811	Hope,	280,	" "
1811	Perseverance,	280,	" "
1811	Paragon,	331,	Sunk, 1825.
1813	Richmond,	370,	Broken up,
1815	Olive Branch,	295,	" "
1816	Chanc'r Livingston,	495,	" "
1823	James Kent,	364,	Coal barge.
1824	Hudson,	170,	Broken up.
1825	Sandusky,	289,	Tow boat.
1825	Constitution,	276,	Now Indiana.
1825	Constellation,	276,	Tow barge.
1825	Ch. Just'e Marshall,	300,	Lost in Long Isl'd Sound.
1825	Saratoga,	250,	Tow barge.
1826	Sun,	280,	Burnt, 1831.
1826	New Philadelphia,	300,	Runs on Delaware river.
1827	Albany,	298,	Runs to Troy.
1827	Independence,	368,	On Philadelphia route.
1827	North America,	497,	Destroyed by ice, 1839.
1827	Victory,	290,	Sunk in 1845.
1828	De Witt Clinton,	571,	Engine in Knickerbocker,
1829	Ohio,	412,	Tow barge.
1830	Novelty,	477,	Broken up.
1832	Champlain,	471,	Tow barge.
1832	Erie,	472,	Tow barge.

Built.	Names.	Tons.	Remarks.
1833	Helen,	—	Destroyed, 1834.
1835	Robert L. Stevens,	298,	Runs to Saugerties.
1836	Rochester,	491,	Runs to Albany.
1836	Swallow,	326,	Destroyed April 7, 1845.
1837	Utica,	340,	Runs to Albany.
1838	Diamond,	398,	Laid up.
1839	Balloon,	204,	Runs to Newark.
1839	North America,	494,	Runs to Albany.
1840	South America,	638,	" "
1840	Troy,	724,	Runs to Troy.
1841	Columbia,	391,	Runs to Albany.
1841	Rainbow,	230,	On Delaware river.
1842	Curtis Peck,		On James river, Va.
1843	Empire,	936,	Runs to Troy.
1842	Knickerbocker,	858,	Runs to Albany.
	Belle,	430,	" "
	Express,	288,	" "
1845	Niagara,	730,	Runs to Troy.
1845	Rip Van Winkle,	540,	Runs to Albany.
1845	Hendrick Hudson,	1170,	" "

Extract from the Picturesque Tourist, published by J. Disturnell, in 1844.

"PASSENGER BARGES.—In 1826, the steam-boat Commerce, Captain George E. Seymour, towed the passenger barge, Lady Clinton, and the steam-boat Swiftsure, Capt. Cowden, towed the passenger barge, Lady Van Rensselaer."

Extract from the Albany Gazette, dated Oct. 5, 1807.

"Friday, Oct. 2, 1807, the steam-boat (Clermont) left New-York at 10 o'clock, A. M., against a stormy tide, very rough water, and a violent gale from the north. She made a headway beyond the most sanguine expectations, and without being rocked by the waves.

"Arrived at Albany, Oct. 4, at 10 o'clock, P. M., being detained by being obliged to come to anchor, owing to a gale, and having one of her paddle wheels torn away by running foul of a sloop."

Copy of an Advertisement taken from the Albany Gazette, dated September, 1807.

"The North river steam-boat will leave Pauler's Hook Ferry [now Jersey City] on Friday, the 4th of September, at 9 in the morning, and arrive at Albany on Saturday, at 9 in the afternoon. Provisions, good berths and accommodations are provided.

"The charge to each passenger is as follows:

To Newburgh,	dolls.	3,	time,	14 hours.
" Poughkeepsie,	"	4	"	17 "
" Esopus,	"	5	"	20 "
" Hudson,	"	5½	"	30 "
" Albany,	"	7	"	36 "

"For places apply to Wm. Vandervoort, No. 48 Courtlandt-street, on the corner of Greenwich-street.

"Sept. 2, 1807."

Extract from the New-York Evening Post, dated Oct. 2, 1807.

"Mr. Fulton's newly invented *steam-boat*, which is fitted up in a neat style for passengers, and is intended to run from New-York to Albany as a packet, left here this morning with ninety passengers, against a strong head wind. Notwithstanding which, it was judged she moved through the water at the rate of six miles an hour."

NOTICE.—It is stated on the authority of Captain E. S. Bunker, that the CLERMONT, or *experiment boat*, as sometimes called, the first steam-boat constructed under the direction and superintendence of Robert Fulton, in 1807, was 100 feet long, 12 feet wide and 7 feet deep. In 1808 she was lengthened to 150 feet, widened to 18 feet, and had her name changed to NORTH RIVER. The engine was constructed in England, by Watt & Bolton, and brought to New-York in Dec., 1806, by Mr. Fulton. The hull of the boat was constructed by Charles Brown, an eminent ship-builder in New-York. In August, 1807, the boat was propelled by steam from the East river to the Jersey shore, and on the 2d of Oct. following, she started on her first trip to Albany.

POPULATION.

A general census of the population of the United States is taken every ten years by the general government, and a state census of this state in the intermediate five years. By that of 1800, it appears that New-York city contained 60,489 inhabitants. In 1805, immediately after the disappearance of the epidemic disease which had previously ravaged the city, an enumeration was made by the common council, when it was found the population had increased to 75,570 ; viz :

Whites males,	35,384	
White females,	36,378	
	<hr/>	71,762
Coloured males, free,	664	
Coloured females, free,	1,096	
	<hr/>	1,760
Coloured males, slaves,	818	
Coloured females, slaves	1,230	
	<hr/>	2,048
		<hr/>
Total population, 1805,		75,570

During the last twenty years the population has doubled itself; and if the same increase continue to the year 1868, there will be 764,000, and in 1888, 1,620,000. On the supposition that the population will double every 25 years, the following would be the result, beginning with the census of 1825 :

In 1825 there would be	166,000
" 1850 " "	332,000
" 1875 " "	664,000
" 1900 " "	1,328,000

The ratio of increase for the city of New-York appears to be as follows :

From 1805 to 1830,	25 years,	160 per cent.
From 1830 to 1835,	5 years,	33 "
From 1835 to 1840,	5 years,	15 "
From 1840 to 1845,	5 years,	20 "

We give the census of 1830, '35 and '40, together with that recently completed for 1845.

“ Blacks,.....	11,831
----------------	--------

“ Native whites,.....	213,069
-----------------------	---------

Total,.....	371,102
-------------	---------

Of those born abroad, 61,961 are not naturalized.

ALMS-HOUSE.

The very extensive enclosure and buildings occupied by the Alms-House department, stand on the eastern shore of the island, three miles from the City-Hall, on the immediate bank of the East river. The premises, consisting of 26 or 30 acres, are enclosed by a stone wall ten feet in height. The main edifice is expensively constructed of stone, three stories in height, 325 feet in length, and 55 in width, with two large wings at each end. It contains 60 apartments, a chapel, and two large dining-rooms. Well behaved persons may visit the Alms-House at all hours. Able bodied paupers are provided with work. A school for the children is connected with the establishment. There is a resident physician and several assistants constantly in attendance. The following statement of the condition of the establishment in November, 1845, has been given to us by the gentlemanly Commissioner, Mr. Anderson :

The number of persons in the several departments connected with the Alms-House department, is 4,628. In the Alms House at Bellevue, there are 1,409 persons : 575 males, 455 females, 144 boys, and 135 girls. In the Hospital there are 510 patients, of whom 313 are females, and 197 are males. In the Nursery on Long Island, opposite the site of the Alms-House, there are 556 patients, and in the hospital adjoining, there are 90 patients. In the Penitentiary, Blackwell's Island, there are 1,095 convicts, of whom 569 are males, and 528 are females. In the hospital of the Penitentiary there are 250 patients. In the Lunatic Asylum, Blackwell's Island, there are 384 inmates. In the City Prison there are 172 inmates, of whom 118 are males, and 54 are females.

Connected with the Alms-House there is an out-door establishment, consisting of paupers, foundlings and illegitimates, 4,628 of whom receive a stipulated sum every week. There are 1,250 out-door paupers receiving weekly relief from the Commissioner of this department. The whole

PENITENTIARY,

Blackwell's Island.

expenses of the Alms-House department for the year ending January 1st, 1845, was \$255,275 85.

CLIMATE AND DISEASES OF NEW-YORK.

The average temperature of our climate throughout the year is 55° of Fahrenheit's thermometer; and that is also the temperature of the deepest wells. The greatest degree of cold ever experienced is 6 or 10° below zero; but that is very rare—having occurred in 1780 and in 1820, when persons went between this city and Staten Island on the ice. In winter the thermometer rarely sinks lower than 10° or 20° below the freezing point, and in a few hours the cold always moderates. The vicinity of the ocean and the gulf stream produces a perceptible influence on our atmosphere, and conduces to ameliorate the severity of the winter. The snow seldom lasts more than two weeks, in January or February, and early in March the winter usually terminates.

The highest temperature of our summer is about 80° or 90 , and is very rarely of long continuance. From the middle of September to about the last of October, the atmosphere will generally vie with any in the world for serenity and beauty. Winter generally sets in about Christmas, and continues for about two months.

The following table will give an idea of the weather from day to day, during the year. The first frosts appear about the middle of October, and the last are usually seen in April, and occasionally in May. Gardening in the vicinity begins in March, and the forests are usually in full leaf in the latter part of April or beginning of May. Sudden changes of temperature frequently occur in summer and winter, which, unless guarded against, will cause severe colds and other diseases;—but New-York, generally speaking, is as healthy a spot as any city in the world.

DAGUERRIAN GALLERIES.

The most extensive establishment of the kind is Plumbe's, at 251 Broadway. The free gallery attached to it is much frequented by persons interested in Daguerrian pictures, as it contains a very extensive collection of choice specimens of the art. Several rooms are attached to the establishment for the various purposes connected with the making of pictures. Mr. Plumbé is esteemed one of the very best Daguerreotypists in the world.

Anthony, Edwards & Co., have also an extensive gallery, possessing portraits of most of the distinguished men of the country. These productions are equally as good as Plumbé's.

Chilton's gallery is also worthy of attention, as his miniatures are very excellent.

Parkinson, an able Daguerreotypist, is celebrated for the beauty and perfection of out-door scenes, buildings, &c. A very splendid view of Niagara Falls, and views of most of the public buildings in New-York, may be seen at his rooms. In this department of the business he is unequalled—his miniatures are very perfect.

The prices for miniatures in the various Daguerreotype establishments, vary from one dollar to five dollars, but none that are really good can be obtained for less than three or four dollars.

ARTISTS.

In this city there are over three hundred artists in the various branches of portrait, miniature, landscape and historical painting. The most distinguished painters in America find in New-York a liberal appreciation of, and remuneration for their talents.

In portrait painting, Messrs. Page, Inman, Elliott, Ingham, Huntington, Mooney, and some others, rank among the highest in America. Their rooms generally have specimens of their work, and the lovers of art will be generally received in them with kindness and hospitality.

Mr. Elliott's rooms, which are in the Granite Building, corner of Broadway and Chambers-street, can be visited

SIR HENRY CLINTON'S HOUSE,

Broadway.

at all hours by the stranger, who will find among his pictures many well worth attention. Mr. Elliott's portraits are very much admired for their truth to nature, freedom of handling and beauty of colouring—particularly his female heads.

Mr. May's rooms, 44 Vesey-street, are also well worth visiting. His portraits are highly valued, and few painters have more promise for the future.

Among the landscape painters of New-York, the most conspicuous are Cole, Durand and Cropsey.

Mr. Cropsey, whose rooms are in the Granite Building, is a young artist, and is destined to take a high rank in this department of art.

Mr. Matteson, historical painter, is beginning to take high rank, and has already produced some very excellent works. Boyle, May, Chapman and Hicks have also produced pictures which place them high in the estimation of the lovers of art.

Kneeland, Frazee and Launitz, are names well known among the admirers of sculpture. Mr. Kneeland's busts are among the finest ever modelled in this country. No American, except Powers, has ever surpassed them. He has also acquired great celebrity for his equestrian statue of Washington,—one of the most perfect works of the kind produced in modern times. It is destined for the national capitol.

Miniature painters abound in New-York. Among the most conspicuous are Cummings, Fanshaw, Hite, Shumway and McDougal. Mr. McDougal's rooms contain many interesting specimens of this department of art, and will well repay the visiter for a call on the gentlemanly artist.

SIR HENRY CLINTON'S HOUSE,

Foot of Broadway.

This is one of the curious relics of the style of building in New-York during the last century. This house is now occupied as a private dwelling by one of the merchants of New-York.

There are numerous other houses of old standing in different parts of the city, remarkable for their appearance, but our limits will not allow us to describe them.

BANKS OF NEW-YORK.

Among these are some of the most costly and elaborately constructed public buildings of the city. The engraving on the opposite page is a view of the Union Bank and the National Bank, in Wall-street. There are several very elegant buildings occupied by some of the banks of Wall-street, among which we can name the Bank of America; the Merchants' Bank; the Bank of the State of New-York; the American Exchange Bank, and the new Phoenix Bank. The last two mentioned, occupy large rooms in the rear; the front rooms being used for insurance offices. There are now twenty-four banks in the city of New-York, and three in Brooklyn. The New-York banks are located as follows:

Thirteen in Wall-street, two in Greenwich-street, one in Broadway, one in the Bowery, one in Chatham-street, one in William-street, two in Pearl-street, one in Grand-street, one in Hudson-street, and one in Avenue D.

GAS WORKS,

In Canal-street, corner of Centre-street. This is a very interesting place, for here the visiter can see the manner in which the gas that lights the city is made. The machinery is very interesting, and perfectly accessible at the usual business hours.

GYMNASIUMS.

The principal establishment of this kind is situated in a large and very commodious building, at Nos. 159 and 161 Crosby-street. Fencing, sparring, wrestling, reading, dressing and bathing rooms are found in this establishment and accommodations for all the exercises practised in European gymnasia. The institution is very complete in all its departments, and forms one of the most interesting objects for visitors in the city. Terms—one year, \$12;

UNION BANK AND NATIONAL BANK,

Wall Street.

six months, \$8; three months, \$5. J. T. Hatfield, proprietor; H. T. Swiggs, director. This establishment has the patronage of some of the most distinguished members of the medical profession in this city. As a means of preserving health, developing the physical faculties, and giving ease, strength and grace to the body—gymnastic exercises are of vast importance. Thousands of persons in this city, of sedentary habits, are now suffering, and laying the seeds of disease and death in their constitutions, who might gain relief and prolong their lives by a timely resort to the manly exercises above mentioned. It is strange that with the vast amount of medical and scientific testimony that exists in their favour, they should be so much neglected. These rooms are most used in the evening, when the visitor can gain admission on application at the door.

FANCY STORE.

The fancy store at No. 259 Broadway, is stocked with an immense variety of fancy articles, of rare and curious workmanship, and numerous articles of luxury and taste—presenting a very beautiful melange, which is well worth visiting.

LOOKING GLASS STORE.

Messrs. Williams & Stevens, 343 Broadway, have a very elegant establishment, got up with great taste, for the sale and manufacture of picture-frames and mirrors, of every size and price, from one thousand dollars down to ordinary prices; and frames of the most elaborate and costly workmanship may be seen here.

PUBLIC BATHS.

There are three principal bathing establishments in New-York, besides many smaller ones—the latter are, however, inferior to the larger establishments in comfort, neatness, and general accommodations. Stoppani's rooms, corner of Walker-street and Broadway, are very sumptuously finished, with marble baths and other elegant and useful accompaniments. The establishment is well worth

visiting, as it is constructed with great taste and elegance. Single baths, 25 cents. A set of ladies' baths are attached to the establishment, with a separate entrance in Walker-street, which deserve patronage. Warm, cold and shower baths may be enjoyed in this establishment from 6 A. M. till 11 P. M.

Palmo's baths, in Chambers-street, opposite the Park, are much frequented, and are in some particulars superior to Stoppani's. The visiter will always be treated with polite attention, and in all except decoration, these baths are superior to their Broadway rivals. Price of baths, 25 cts.

Rabineau's baths, in the Astor House, entrance on Vesey-street, is a very neat and popular establishment, and is entitled to patronage. Medicinal baths are prepared here, under the care of the proprietor, who is a physician.

There are several other establishments about town of an inferior class, but very much frequented by the public, and open at low prices.

Floating Baths.—There are several establishments of this kind. The principal ones are stationed at Castle Garden, and are open only during the summer months. The salt water of the bay is used, and persons may be accommodated with a public bath basin, or small private rooms. Price 25 cents for each bath. There is also a ladies' department, elegantly fitted up.

There are several other minor floating baths; one at the foot of Canal-street, one at the foot of Christopher-street, and several on the East river.

OLD BUILDINGS IN NEW-YORK.

THE "WALTON HOUSE,"

No. 326 Pearl-street.

The "Walton House" was built in 1754, by William Walton, a prosperous English gentleman, who resided in Hanover square. This then splendid dwelling was built *out of town*, as a kind of country seat. It was bequeathed

WALTON HOUSE.

Pearl Street.

OLD HOUSE

by the founder to his nephew William, who was one of His Majesty's council before the revolution. It was built of bricks brought from Holland, ornamented with brown stone water tables, lintels, &c.

The hall is an ample room, and the staircase of large carved work, gives the whole a most imposing air of aristocratic grandeur. It is now a boarding-house, but well worth the attention of the curious.

DUTCH HOUSES IN 1630.

The annexed cut exhibits the fashion of most of the Dutch buildings in the early settlement of New-York.

The building here represented stood in Broad-street, and was built by Peter Minuit, the first governor of New-Amsterdam. This house was built in 1629, and was a famous house in its time. The greater part of Broad-street was originally built up in the same manner. The houses were all built of bricks brought from Holland, and were constructed with the gable end to the street, and usually with a sharp and pointed roof. There is scarce a building of the kind now left in the city.

BILL OF MORTALITY FOR THE YEAR 1844.

Abstract of the Annual Report of ELI LEAVITT, City Inspector, of the deaths in the city of New-York, for the year 1844.

The whole number of deaths reported during the year 1844, amounts to 8,955, being 262 more than the number registered in the preceding year, and 221 less than in the year 1842.

Of these there were :—	Males.	Females.	Total.
Whites,.....	4,534	3,983	8,517
Coloured,.....	219	220	438
	<hr/> 4,753	<hr/> 4,202	<hr/> 8,955

Of this number, the premature and still births amounted to 828, viz :—whites, 786; coloured, 42. Total deaths, exclusive of still-born, &c., 8,127.

The number of the deaths of white males exceeded that of the females 631. Returns are ordered by law, and weekly statements of deaths and diseases are published in all the papers, and at the end of the year a minute annual report is made by the City Inspector.

The interments during the year 1844, were in the following cemeteries :

African,	190
Associate Reformed,	24
Baptist,	139
Catholic,	3,043
Dutch Reformed,	214
Friends,	52
German,	325
Hebrew,	60
Methodist,	1,388
Presbyterian,	753
Marble Cemeteries,	143
Moravian,	1
Potter's Field,	408
Randall's Island,	840
Removed from the city,	983
Not stated,	392
Total,	8,955

Of the above there died at—

Alms-House, Bellevue,	86
Hospital,	402
Penitentiary, Blackwell's Island,	72
Penitentiary Hospital,	5
Lunatic Asylum, Blackwell's Island,	44
House of Refuge,	1
City Hospital,	119
City Prison,	13
Long Island Farms,	55
Home for aged coloured females,	1
Orphan Asylum, Prince-street,	1
Total,	798

Deaths by the principal diseases in 1844, compared with the two previous years:—

11th Class.				
Old age,.....		110	108	104
12th Class.				
Intemperance,.....		31	41	46

Of the first class of diseases, the deaths by small pox, measles, and cholera infantum, were 213 less in 1844 than in 1843.

Of the third class, the deaths by five of the diseases above stated have each increased; of those reported of convulsions, 471 were under the age of two years. *Hydrocephalus* has taken the precedence of *Cholera Infantum*, and has become the most formidable disease to which infants are exposed.

CHURCHES IN NEW-YORK.

TRINITY CHURCH—(EPISCOPAL,)

BROADWAY, OPPOSITE WALL-STREET.

Erected in 1841-1845.

This is the principal church building belonging to the Episcopalians in the city, and is the mother of all the others. The first place of worship in the city was the "Chapel in the Fort," which was originally the Dutch Church; but after the city was surrendered to the English, in 1664, it became the Episcopal Church, and was called "The King's Chapel." In 1696, a small square building called "Trinity Church," was erected on the site of the present elegant building, on Broadway, at the head of Wall-street. In 1735, the church edifice was enlarged, and a farther enlargement took place in 1737, until it was 140 feet long, and 70 feet wide. In 1776, the edifice was destroyed by fire. In 1788, a new building was erected on the same site, of nearly the same dimensions, which

was taken down in 1839, and preparations made for the new edifice, now nearly completed. The corner stone of the present building was laid June 3, 1841. When completed, it will probably be the most elegant church edifice in the city, and undoubtedly the most costly one. The amount of its cost has never been publicly stated. The material of the building is a fine, reddish sandstone, nicely dressed. It covers a large space of ground, measuring, when we include the tower, buttresses, &c., not much short of 200 feet long, and more than 80 feet wide; and yet so much of the space is occupied by the tower at the east end, and vestry at the west end, and space for the chancel, &c., and having no galleries, it is not computed to accommodate in the pews more than about 800 persons. Externally the building has a most imposing appearance.

The walls of the house are about 40 feet high, and are highly ornamented, having large buttresses between the windows, terminating in tall pinnacles. The tower and steeple at the east end of the house is the principal object which engages the eye of the beholder: and whether we consider its comely proportions, or its style of finish, or its immense height, towering as it does 264 feet into the air, it must be considered a noble specimen of architecture, and a fine ornament to that part of the city.

ST. MARK'S CHURCH—(EPISCOPAL,)

STUYVESANT-STREET, EAST OF THE BOWERY.

Erected in 1799.

St. Mark's Church is built of smooth stone, of a dark gray colour. It measures about 100 feet by 66. A school room and vestry are attached to the rear, occupying about a third of the width of the building, and running out some thirty or forty feet. The steeple is on the front of the building facing the south, and is very lofty. It was not built in its present form until 1826. The exterior of the church is plain, and has, at first view, rather an antique look; but it has a very venerable appearance, and as a whole, is in good keeping with the purposes for which it is

ST. MARK'S CHURCH

occupied. It stands on the former estate of Petrus Stuyvesant, the last of the Dutch governors, and his remains lie in a vault under the church: a brown tablet on the east side of the church, outside, marks the place. The remains of Col. Henry Sloughter, one of the English governors, lie in the same vault, and those of Gov. Daniel D. Tompkins, in another near by. The heads of three dynasties, Dutch, English and American, are thus reposing in peace together. This church is in a very flourishing condition. The Rev. Dr. Anthon is the present minister.

ST. GEORGE'S CHURCH—(EPISCOPAL,)

CORNER OF BEEHMAN AND CLIFF STREETS.

Erected in 1752.

This building was originally a chapel of Trinity Church, and continued in this relation until the year 1811. Hence the spot it occupies was formerly called "Chapel Hill," and the street in front, "Chapel-street." The vicinity was, at that time, a crowded and badly built part of the city. The church is built of brown stone, and is 104 feet long and 72 feet wide. It had originally a tall steeple, but being destroyed by fire in 1814, it was rebuilt with the same walls, with a round blunt turret, some 30 feet high above the top of the building, containing a bell and a clock. It is a very substantial building, though externally quite plain. The interior of the church is finished in a style much more rich and imposing, and strikes the beholder at once, on entering a place so unpretending in its exterior.

A former minister of this church, the Rev. John Ogilvie, D. D., was struck with apoplexy while reading the service in the church, and died in a few days after. This happened in the year 1774. The late Rev. Dr. Milnor, the lamented rector of this church, died more suddenly, with scarce a moment's warning, in the early part of 1845.

The Rev. Stephen H. Tyng, D. D., is the present minister.

CHRIST'S CHURCH—(EPISCOPAL,)**ANTHONY-STREET, NEAR BROADWAY.***Erected in 1823.*

This church was founded in the year 1794, and then occupied a wooden building in Ann-street, near Nassau. But in 1823, this house was erected, and the congregation removed to it. The rear and side walls are of very rough small stones, but the front is very beautiful smooth red stone. The structure measures 90 feet by 64. In each side there are five large pointed windows, containing 90 panes each, of common-sized plain glass, beside the points. The front presents three doors, of a common size, all alike, with a large pointed window over each. The middle section of the front presents a small projection, with flat columns on each side. On the centre of the roof in front there is a tower of stone of about 15 feet square, and perhaps 20 feet high, with pinnacles on the four corners. The present minister of this church is the Rev. Dr. Lyell.

FRENCH CHURCH—(EPISCOPAL,)**FRANKLIN-STREET, CORNER OF CHURCH-STREET.***Erected in 1834.*

This is a rich looking building, of fine hammered white marble, measuring 100 feet by 50, and built at a cost of \$60,000. It has neither tower nor spire, but on the front a deep pediment of between 20 and 30 feet in depth, supported by four massive pillars in front, raised on a platform six steps from the sidewalk, and two others far under the pediment, one on each side of the main entrance. The front of the main building is plain, with one large door and no window. On each side there are three long windows, square at the top. The whole building, though not ornamented, has about it an air of silent grandeur. The congregation now worshipping in this church, for

L'EGLISE DU SAINT ESPRIT,

Corner of Church and Franklin Streets.

merly occupied a large stone building standing on Pine-street, near Nassau-street, which was erected in 1704, by some French Protestants, who founded their church upon the principles and model of that in Geneva. During the war of the revolution, the interior of this church was nearly destroyed by the British soldiery. In 1794, it underwent a thorough repair; and in 1803, the members, with their minister, joined the Episcopal church, and from that time have been known as the church *Du St. Esprit*. Like many of the other churches, the business of the merchants drove the families into the upper part of the city, and the result was the sale of their property in Pine-street, and the building of a new church.

ST. PAUL'S CHAPEL—(EPISCOPAL.)

BROADWAY, BETWEEN FULTON AND VESBY STREETS.

Erected in 1766.

This is the third Episcopal church erected in the city. It is a venerable looking building, of dark gray stone, with a tower of stone and pointed steeple of wood on the western end, opposite to the main entrance, different in this respect from any other church in the city.

The total length of the edifice, including the portico in front and tower in the rear, is 151 feet, and the width is 73 feet. The height of the steeple is 203 feet. There are two bells hanging in the belfry, which once belonged to the chime in Trinity church.

On the front, facing Broadway, a large pediment, 18 feet in depth, is displayed, supported by four Ionic columns. In a niche, in the centre of the pediment, is a carved figure of St. Paul leaning on a sword. There is also in the front a slab of white marble inserted, bearing an inscription in remembrance of General Montgomery, who fell at Quebec, during the revolutionary war, and whose remains were removed to New-York by order of the state, in July, 1818.

The sides of the building are not ornamented, and excepting the portico in front, the whole exterior of the

building presents a plain and sober appearance. When St. Paul's Chapel was built it was quite at the outskirts of the city; and the year in which the foundation was laid, the lot on which it stands, near the cemetery, was ploughed up and sowed with wheat. The cemetery is a large plot of ground, extending from Broadway to Church-street, and from Fulton to Vesey streets. It is now filled with tombs and single graves, and contains some elegant monuments. At the side of the church, and near Broadway, a tall column of white marble has been erected in memory of Thomas Addis Emmet, the celebrated Irish barrister and patriot, who died here in 1827. Inscriptions are made on three sides, one in English, one in Latin, and one in Irish.

ST. JOHN'S CHAPEL—(EPISCOPAL.)

VARICK-STREET, ON THE EAST SIDE OF ST. JOHN'S PARK.

Erected in 1807.

The situation of this church is not surpassed by any church in the city, and the building itself presents altogether an imposing appearance. The material of which the walls are composed is a brownish sand stone; and the Corinthian order is generally followed in the architecture. It covers a large space of ground, being from outside to outside, 132 feet in length and 80 feet in width. The portico in front is about 20 feet deep, and the pediment is supported by four large columns, which stand on a platform raised five or six feet from the ground, to a level with the floor of the main building. The edifice being thus raised from the ground, presents a more sightly appearance.

The spire of the church is very lofty, being, as it is stated, 214 feet and six inches from the ground, and with the exception of the spire of Trinity Church, is the highest in the city. The side walls of the church are considerably ornamented, and a heavy ballustrade passes around the roof.

At the eastern end of the main building, and adjoining

BAPTIST CHURCH,

Broome Street

it, the Sabbath school room was erected in 1826. This is considerably narrower than the church, and consequently not seen much from the front, but is a long building, containing three Sunday school rooms, a vestry room, and other rooms for various societies and committees connected with the church.

Hudson Square, better known at this day as St. John's Park, is a fine large square in front of the church, extending from Varick to Hudson-street, east and west, and from Beach to Laight-street, north and south. It is not like most of the other squares in the city, a public promenade; but the gates are kept locked, it being considered private property.

FIRST BAPTIST CHURCH,

CORNER OF BROOME AND ELIZABETH STREETS.

Erected in 1841.

The former church edifice had been in Gold-street, near Fulton, but in 1841 this building was erected, and the congregation removed here. The building was designed by Mr. Lefevre, of this city, and does him much credit as an architect. The following particulars are copied, in part, from a description given of the building in the appendix to the Report of the American and Foreign Bible Society, for the year 1842: The walls are of a blueish stone, principally from Blackwell's Island, and from the old meeting house in Gold-street. The window lintels, cornices and battlements are of brown sandstone. The dimensions of the house are 90 feet by 75—the side walls 42 feet high, and the apex of the battlements 71 feet. The heads of the windows in the side walls, six in each side, are square-head designs, executed with tasteful tracery-work. The front of the house presents two octangular towers at the two extremities, and a slight projection in the middle portion, with buttresses raised to the top of the building. In the projecting portion of the front are three doors of moderate size, and immediately over them is a grand, pointed win-

dow, 22 feet wide, and 41 feet high. There are two other pointed, and two square-headed windows placed in the receding portions of the front. The interior of the church is well finished, but not gaudy. It has a gallery on three sides, and a second gallery in front, for the Sabbath school children. The floor of the basement is but about three or four steps down, which brings the basement rooms, for lecture room, Sabbath school room, &c., nearly above the ground, which of course elevates the whole building. The front of the building, except the main entrance to the church, is divided into rooms for the accommodation of the Baptist Home Missionary Society, and the American and Foreign Bible Society. These rooms are very conveniently arranged. The entrance to each is through the octagons on the corners. Rev. Dr. Cone is the present minister.

ST. PATRICK'S CATHEDRAL—(ROMAN CATHOLIC.)

CORNER OF PRINCE AND MOTT STREETS.

Erected in 1815.

This building is very spacious. When first erected it measured 120 feet by 80; since which, 36 feet more have been added to the length, making it now 156 feet long, standing on Prince-street, and covering in its length the whole space from Mott-street to Mulberry-street, fronting on Mott-street. The side walls and rear are built of rather rough gray stone. The front is of nicely-smoothed red free-stone. The height of the walls is perhaps 45 feet; no buttresses on the sides, but two tall pinnacles are raised from the two corners of the building in the rear. The front presents a surface nearly smooth, with three doors, but no windows. From the top of the roof, at each of the two front corners, rises a square tower of stone, to the height of about 15 feet; and directly on the apex, between the towers, there is a small, and rather awkward looking wooden steeple, terminating in a cross. In the front of the building, over the side doors, are two niches, fitted to receive some images, and there are three such in the rear of

ST. PATRICK'S CATHEDRAL.

Corner of Prince and Mott Streets.

the building, but at present they are empty. The rear of the church is rather more ornamented than the front. There are eight large windows in each side. The interior of the church presents quite an imposing appearance. There are no galleries, except an organ loft on the eastern end. The roof is supported by 12 large pillars, standing each alone, and running from the floor to the high ceiling, and on each pillar, far above the pews, four large globular lamps are suspended. The windows are of plain common glass, with painted blinds inside. There are few ornaments except around the altar. The floor contains about 200 pews, and the whole house will probably accommodate 2,000 persons.

FIRST CHURCH—(PRESBYTERIAN,)

Erected in 1845.

This church stands on the west side of the Fifth avenue, between Eleventh and Twelfth streets, and presents a majestic appearance. It is of reddish hewn stone. The extreme length of the building is 119 feet, and the breadth 80 feet. The height of the walls is 40 feet, and it is 64 feet from the ground to the peak of the roof. The height of the tower is 130 feet to the top of the cornice, and thence is an octagon spire of stone, 30 feet to the pinnacle. Large buttresses between the windows, seven on each side, are built, surmounted by a pinnacle of eight feet in height. The top of the corner pinnacles are 75 feet from the ground. A battlement of stone passes around the roof. Such is the outside. The inside of the building presents a grave and dignified appearance, very becoming a house of worship. The pulpit and pews are built of solid black-walnut. The ceiling is rather plain, and there are no large columns in front of the gallery. The height from the floor to the ceiling is fifty feet. There are 124 pews on the lower floor, and the house will accommodate from 1,200 to 1,500 persons. The estimated cost is \$75,000. The lecture room and the Sabbath school room, are both in a separate building, 50 feet by 30, and two stories high, built

of stone like the church, on the same lot, but fronting on Eleventh-street. Rev. Dr. Phillips is the minister of this congregation. This church formerly worshipped in Wall-street, on the spot where the first Presbyterian church in New-York was built, in the year 1719.

GRACE CHURCH—(EPISCOPAL,)

BROADWAY, ABOVE TENTH-STREET.

Erected in 1845.

This is one of the most splendid buildings in the city. The material of which it is constructed is of white marble, hewn, but not hammered. It is built in the form of a cross. As viewed from Broadway, we are first presented with a lofty tower of about 24 feet square, and of about 110 feet elevation from the ground to the cornice; and from thence an octagon spire of wood, running up nearly as much higher, and terminating in a cross. Attached to the tower is a building with its end to the street, of the same width as the tower, and extending inward about 54 feet, where it joins the centre of the large structure, 87 feet long and 54 wide, standing side to the street. Large, deep buttresses are built up between the windows and on the corners of the building all around, with lofty pinnacles on their tops, highly finished and ornamented. There are three doors in front, two of moderate size and one very large. Over this main entrance is a large, circular window, of stained glass, and two tall, oblong windows in each side of the upper section of the tower. Such is a "bird's eye view" of the outside. Now let us enter the building: and here we are, standing at once amid pillars and carved work, and have all the colours of the rainbow brought to our vision through more than forty windows of stained glass, each one giving some different hues. On a line with the sides of the gallery are 16 massive columns, eight on a side. The windows are all gothic, three very large—one back of the pulpit, and one in each end of the main building, on the right and left of the pul-

pit. On each side of the pulpit are two circular windows; and 36 others, large and small, are scattered above and below in the two sides. The estimated cost of the building is \$145,000. The interior of the church is not yet quite finished. The congregation who are to occupy it, once worshipped at the corner of Rector-street and Broadway, near Trinity Church. Rev. Dr. Taylor is the present minister.

DUTCH REFORMED CHURCH,

ON LAFAYETTE PLACE.

Erected in 1839.

Lafayette Place is a short but rather elegant street, parallel to Broadway, on the eastern side of it. Toward the southern end of it it is crossed by Fourth-street, and on the corner of Fourth-street, and fronting Lafayette Place, stands one of the collegiate Dutch churches. It is a very substantial building, of very nice hammered granite. It is 110 feet long, and 75 feet wide. It was erected in 1839, at a cost of about \$160,000.

A pediment of about 20 feet deep is displayed in front, supported by eight massive granite columns, in a range with the outside, and four shorter ones nearer the main body of the building. A round tower rises from the pediment to the height of about 25 or 30 feet. Thus far all is stone, and in a high state of finish. From the tower a tall octagon steeple of wood ascends, surmounted by a ball and vane, making the total height from the ground to the top of the spire 215 feet. The sides of the building are plain, having five windows without ornaments, and square at the top. An area is opened all around the building, making a light and dry basement, finished into good rooms for the accommodation of the Sabbath schools and lecture room. The inside of the church is very handsomely finished, in a style of what may expressively be termed *plain elegance*. The pulpit is of solid marble.

The Collegiate Reformed Dutch Church is the oldest

religious establishment in the city. At the present they occupy three houses of worship, viz.—The “North Church,” at the corner of Fulton and William streets, the Ninth-street Church, and the church on Lafayette Place. The church is considered as one, though assembling for worship in three places, and is governed by one Consistory. At the present time they have four pastors, viz.—Rev. Drs. Knox, Browalee, De Witt and Vermilye.

DUTCH REFORMED CHURCH,

WASHINGTON SQUARE.

Erected in 1840.

The great fire in New-York, which took place Dec. 16, 1835, destroyed, among other buildings, the “South Dutch Church,” which stood on “Garden-street,” now Exchange Place. After this the congregation divided, a part of them building a church on Murray-street, while those who had removed far “up town,” commenced worship in the chapel of the New-York University, proposing to build in that vicinity. A lot was purchased on the corner of Washington Place and Wooster-street, fronting Washington Square, and here has been erected a most superb edifice. The building is of dark coloured granite, rather roughly hewn, and measuring 80 feet from the rear to the tower, and 62 feet wide. On each of the two front corners there is a tower 24 feet square, and running up some 20 feet above the extreme point of the roof. A front view of the building presents you with a large middle door and two smaller ones, one being in each tower. The gothic architecture in which the edifice was designed to be built appears more prominently inside than outside. Inside are eight large pillars supporting the roof, and attached to the front of the gallery, which is handsomely ornamented with carved work. The organ is very elegant; and the organ loft is raised some eight feet above the back of the gallery, appearing somewhat like a second gallery. The height of the ceiling from the floor is 63 feet, and for so

DUTCH REFORMED CHURCH,

Washington Square.

ENTRANCE TO THE FIRST UNITARIAN CHURCH,

Broadway.

high a ceiling the pulpit appears rather low. There are 10 large gothic windows below, of ground glass, and 10 smaller ones in the roof. These all admit a very clear yet soft light; and the walls being painted a light drab colour, and the wood work being painted light oak, give the whole interior of the house a cheerful appearance. Taken as a whole, the edifice is in good taste. The cost is said to be \$80,000, and the ground on which it stands \$44,000. It was dedicated Oct. 1, 1840. Dr. Hutton is the present minister.

FIRST UNITARIAN CHURCH,

BROADWAY, BETWEEN SPRING AND PRINCE STREETS.

Erected in 1845.

The First Unitarian Church in the city of New-York, was built in Chambers-street. In 1844, that building was sold, and a new and splendid one erected on Broadway. The lot occupied by the church runs through from Broadway to Crosby-street, and the main building is placed on the rear of the lot, which removes it from the noise of the great street to a place of comparative quiet. It is built of brick, and is 130 feet long and 75 feet wide. It cost \$82,000. It is a very lofty building, being about 70 feet from the floor to the apex; but standing back from the main street, and having large buildings all around it, it is scarcely seen from Broadway. The entrance is all that would be noticed in passing it. The front of the entrance is 27 feet wide, of elegantly carved reddish free stone, with one large gothic door, with pillars on each side, running up some forty feet. Entering the front door there is a long passage-way of the same width as the front, and about 200 feet long, which brings us to the main body of the church. Over this covered passage-way is a suite of rooms, intended to be leased as offices. The interior of the church is finished in more complete gothic style, probably, than any other building in the city. The material used for the pews is pine, with black walnut capping; and the

pulpit, organ case, and all the other fine carved work is pine, painted a beautiful dark oak colour. There are 140 pews on the lower floor, and about 60 in the gallery. There are six windows on each side, of ground glass, admitting a soft and pleasant light. The walls are painted drab colour. The side galleries are rather narrow, so that the large pillars supporting the roof stand off about five feet from the front of the gallery, which has a very fine effect. The gas lights are attached to these pillars. Taken as a whole, the house is beautiful, and well worthy of attention. Rev. Mr. Bellows is the present minister.

CHURCH OF THE MESSIAH—(UNITARIAN,)

Erected in 1838.

The "Church of the Messiah," is the second Unitarian Church in the city of New-York. It was commenced in the year 1828, and was under the pastoral care of the Rev. Mr. Lunt. A house of worship was built in Prince-street, near Broadway, on the west side. This building was consumed by fire in the year 1837, and in the following year a new edifice was built on Broadway, nearly opposite Washington Square. Rev. Orville Dewey, D. D., is the present minister. This building is a very substantial one. It is built of rough granite, measuring on the ground 100 feet by 74, and was built at a cost of \$97,000. It is a plain looking building, with a square front. The tower is not high, not more perhaps than 20 feet above the walls, and has no pointed spire. The roof is rather flat. The front presents three doors, with a square window over the side doors, and a large round window over the main entrance, and circular windows in three sides of the tower above the roof.

The finish of the interior is rich, being mostly of the Corinthian order. The walls and ceiling are elaborate in finish, but richly painted, and said to represent very nearly the interior of Westminster Abbey.

PRESBYTERIAN CHURCH,

University Place.

PRESBYTERIAN CHURCH,

UNIVERSITY PLACE.

Erected in 1845.

This building is of a reddish gray stone, well smoothed, having but few ornaments, and for so costly a building presenting a rather plain appearance. It stands at the corner of Tenth-street and University Place. The extreme length of the edifice is 116 feet, and the width 65 feet, having a lecture room, 25 feet wide, taken off at the rear, which room is lengthened by a projection on the south side of the house of about 10 feet, giving the lecture room a space of 75 feet by 25. This leaves the interior of the church at about 91 feet by 65. A side view of the building from Tenth-street, presents us with six large gothic windows and three small windows over the lecture room, all of stained glass. Between the windows are buttresses, built to the height of the walls, and terminating in small pinnacles. As we look at the front from University Place, we perceive three gothic doors, the main entrance being in the tower, and one on each side in the body of the church. A large gothic window is placed over the main entrance, and smaller ones over the side doors. The tower, which is about 24 feet square, is wholly in front of the main building, and not partly on the roof, as is rather more common, and is built up square to the belfry, which is the first section above the apex of the roof; above which it gradually tapers to the summit, being entirely of stone, and terminates without a vane, at the height of 184 feet from the ground. The building stands low, being raised but three steps from the sidewalk, so that it does not look as lofty as many others which are really not higher than this.

The interior of the church is divided into 124 pews on the lower floor, and 64 in the gallery; and the space over the lecture room, in the rear of the pulpit, is open for the accommodation of the Sabbath school. It is said that 1,200 persons can be accommodated in the house. The pulpit and pews are built of solid black walnut, exhibiting

much richness, but it renders the house rather more dark and gloomy than would be desirable. The total cost of the building was \$56,000. The present minister is the Rev. Dr. Potts.

PRESBYTERIAN CHURCH,

CARMINE-STREET.

Erected in 1832.

This edifice is of brick, but plastered to resemble white stone. It is a heavy looking building, especially in front. It stands on a high basement of stone, so that the main floor of the church is eight or nine feet above the sidewalk, which gives the building quite a lofty appearance. There are five large windows, with square tops, in each side of the house, with thick, flat columns between them, but no windows in front. The front of the house presents two large fluted pillars, one each side of the main entrance, supporting the pediment, and outside of these pillars four large square pillars, two on each corner, in front of a turret 15 feet square, built to the roof. In each of these turrets are doors facing each other toward the centre of the house, the main entrance being in a deep recess under the pediment, and fronting the street. The trimmings of the pediment are of wood, and on the top of it there is built a wooden square turret with heavy mouldings, about 30 feet high.

The dimensions of the building are 84 feet by 62. The interior is finished in a plain style, having 136 pews on the lower floor. It was first opened for worship May 27, 1832. Rev. Mr. Holt is the present minister.

ST. THOMAS' CHURCH—(EPISCOPAL,)

CORNER BROADWAY AND HOUSTON-STREET.

Erected in 1826.

This is a stately edifice, measuring 113 feet by 62, standing on the corner of Houston-street, fronting on Broadway. It is built of very rough small stones, and was

PRESBYTERIAN CHURCH,

Carmine Street.

ST. THOMAS'S CHURCH,

Corner of Houston Street and Broadway.

FLOATING CHAPEL.

more than two years building, being commenced in 1823, and finished in the early part of 1826. When erected it was considered as the most pure gothic structure of any in the city, but probably now some others exceed it. "Its distinguishing features are two large angular projecting towers at the northeast and southeast corners, which rise in undiminished proportions to a height of 80 feet, and end in pointed turrets of a dwarf size; also the immense gothic window in front between the towers, and occupying a large portion of the surface; beneath this, and in each tower, are the entrance doors." In the front of these towers there are niches to receive figures, but none are placed there.

The interior of the church is very handsomely finished, and painted oak colour. The windows are plain glass without, but inside have elegantly painted transparent shades, in frames. The house will accommodate a large congregation, having large galleries on three sides, and 238 pews, above and below. Rev. Dr. Whitehouse is the present minister.

FLOATING CHAPEL—(EPISCOPAL.)

Built in 1844.

It has always been considered that sailors needed something a little peculiar, and hence the idea of building a house of worship for them, not only distinct from other people, but, if practicable, to have it a floating temple, moored in some dock, so that "Jack in his roundabout" should feel perfectly at home. This *desideratum* was accomplished in this city in 1844, when the "Floating Chapel" for seamen was built, and the Episcopal "Church of the Saviour" organized therein. The chapel is built on a dock 76 feet long, and 36 feet wide, covering two boats of 80 tons each, and 10 feet apart. The length of the chapel is 70 feet, and its breadth 30 feet. It is not a very high building. It has four plain oblong windows on each side, with buttresses between, terminating in pinnacles above the walls. In the front is one large door, with a

circular window over it, and a plain spire, rising above the peak of the roof.

The interior presents one middle aisle, with a row of seats on each side. It is a plain room, ornamented a little around the pulpit and altar. It was built by the Young Men's Missionary Society of the Episcopal Church, and was opened for religious worship February 15th, 1844. The present minister is the Rev. Mr. Parker. The chapel is now moored in the East river, at the foot of Pike-street.

There is another Floating Chapel in the city, under the direction of the Methodists, and the present ministry of Rev. O. G. Hedstrom, which was put into operation in June, 1845. It is an old ship of 300 tons, which is well fitted up, and moored at the foot of Rector-street, on the North river. It will accommodate about 500 persons. The pastor of the church is a native of Sweden, and preaches in Swedish every Sabbath morning, and in English on Sabbath afternoons and evenings. There are three other meetings for seamen held in this city, viz: the "*Seamen's Bethel*," Methodist, Cherry-street, the "*Seamen's Bethel*," Baptist, Catharine-street, and the old "*Mariner's Church*," Roosevelt-street.

THE "SWAMP CHURCH,"

FRANKFORT-STREET, CORNER OF WILLIAM-STREET.

Erected in 1767.

This is one of the oldest church edifices in the city. St. George's Church, in Beekman-street, was built in 1752, nine years before it, but in 1814 was burnt, all but the walls, and built up in modern style. St. Paul's Chapel, near the Park, was built in 1766, but the interior is in modern style. The Brick Church was built the same year, but that too has been remodelled, while the old "*Swamp Church*," retains its ancient appearance, inside and out. The land east of it was originally a marsh or swamp, and hence its name. It is built of stone, and is a very strong building. It is not large, measuring about 60 feet by 34.

FRANKFORT STREET CHURCH.

CHURCH OF THE HOLY COMMUNION.

Twentieth Street.

This building was erected by the German Lutherans, and was the only place of worship in the city which was not abused and torn in pieces by the British army in the time of the revolution; for it was here that the Hessian troops, who were generally Lutherans, attended worship; and it is not unlikely that this circumstance saved it. After the peace, the Rev. Dr. Kunze officiated here for more than twenty years. In the year 1830, it was sold to the coloured Presbyterian congregation, who now occupy it. The Rev. Mr. Wright is the present minister.

CHURCH OF THE HOLY COMMUNION,

CORNER OF SIXTH AVENUE AND TWENTIETH-STREET.

Erected in 1845.

This is altogether one of the most singular buildings in the city. The material of which it is built is well dressed red granite. It is built in the form of a cross, having a projection in the rear of about 30 feet wide and 18 deep, containing the pulpit, reading desk, &c. The total length of the building, from the front door to the extreme rear of the projection, is 104 feet, and the breadth 66 feet. As you stand in the pulpit, on the right hand is a deep recess in the wing, which is the organ loft. This is the only gallery in the house. In the wing on the left hand is a large door opening directly into the street, with a large circular window over it. This is shown in the annexed cut, on the right hand of the tower. Another principal entrance is shown on the cut at the left of the tower, and like the other door, opens directly into the street. The walls are not very high, but the roof is high and very sharp, and being arched within, it gives 52 feet as the extreme height of the ceiling. The turret is on the south corner of the building, and is about 15 feet square within the buttresses, and 70 feet high. There are few windows in the house, and no ornaments either within or without. The whole floor is occupied with plain oak seats, which are all free. The cost of the building was about \$35,000.

CITY OF BROOKLYN.

THIS town, the whole of which is now included within the corporation of the city of Brooklyn, lies upon the extreme western part of Long Island, opposite the southern portion of the city of New-York, and separated therefrom by the East river, which is here about three quarters of a mile in width. Its length from northeast to southwest is six, and its greatest breadth four miles. The population in 1810 was 4,402; in 1820, 7,175; in 1830, 15,396; in 1840, 36,233; of whom 1,673 were employed in commerce; 4,666 in manufactures and trades; 978 in navigating the ocean; 302 ditto rivers and canals; 307 in the learned professions and engineers. It is the second place in population in the State, and the seventh in the United States. The pure air and delightful prospects of Brooklyn render it a favourite place of residence to persons doing business in New-York, and it is nearer to the business centres of the latter than residences in the upper part of the city; and these things have contributed to give it a very rapid growth. The increase of population from 1830 to 1840 was 20,837. Its present population is about 60,000.

"The name conferred upon this town by the Dutch was Breocklen, (or broken land;) and in the act for dividing the province into counties and towns, passed November 1, 1685, it is called *Breucklyn*; nor does the present appellation appear to have been generally adopted until after the revolution. Many changes have doubtless taken place upon the shore, and it is believed that Governor's Island was formerly connected with Red Hook Point. It is well known, that a short period previous to the war of independence, cattle were driven across what is called Buttermilk Channel, now sufficiently deep to afford passage to vessels of the largest class. The first European settler in this town is supposed to have been George Jansen de Rapelje, at the Waalboght, or Waaloons Bay, during the

Directorship of Peter Minuit, under the charter of the West India Company. In a family record in the possession of Jeremiah Johnson, Esq., it is stated that the first child of Rapelje was Sarah, born in 1625, unquestionably the first white child born upon Long Island. Watson says she was born on the 9th of June, and honoured as the first-born child of the Dutch settlers; also that, in consideration of such distinction, and of her widowhood, she was afterward presented with a tract of land at the Wallabout. In the journal of the Dutch Council in 1656, it is related that "the widow Hans Hansen, the first-born Christian daughter in New-Netherlands, burdened with seven children, petitions for a grant of a piece of meadow, in addition to the twenty morgen granted to her at the Waale-Boght." A few of the other associates of De Rapelje were Le Escuyer, Duryee, La Sillier, Cershow, Conscillair, Musserol; these, with some changes in the mode of spelling, are still found among us. It appears by the Dutch records, that in 1634, a part of the land at Red Hook was the property of Wouter Van Twiller, being one of the oldest titles in the town. The earliest deed for land was from Governor Kieft to Abraham Rycken, in 1638.

The city is regularly laid out, and the streets, with the exception of Fulton-street, the oldest in the city, are generally straight, crossing each other at right angles, and are from 50 to 60 feet wide, and a number of them have greater width. A large number of the streets, including all within the thickly settled parts, are paved and lighted. Many of the streets are bordered with trees, giving the place a peculiarly rural aspect. Fulton-street, originally narrow in its lower portion, has been amply widened, and is bordered with ranges of lofty brick stores, and presents a commanding entrance to the city. No city in the country, of its extent, is better built than Brooklyn, and many of its houses are distinguished for a chaste elegance, and some of them are splendid. Brooklyn, as laid out by the commissioners appointed by the State Legislature, is sufficiently large to become another London; and if the spirit of speculation could have been quiet, it is questionable whether it would not have been better to have left many of its origi-

nal farms for the present undisturbed. Many of the streets are not opened and regulated, though this has been done to quite as great an extent as the present necessities of the city require. The thickly settled parts have no public squares or open grounds; and, though some have been laid out within the city bounds, they are not in such locations as to add, at present, to its beauty or its comfort. Many of its principal avenues, however, have a commanding width, and its whole appearance is open and airy; and its great extent, and the many fine situations presented in its outer parts, will probably long prevent it from being uncomfortably crowded in the portions now most thickly settled.

A city-hall was projected a number of years since, on a magnificent plan, to be built of white marble. A substantial and durable foundation was laid, and the basement story erected, at a great expense. But the location was unhappy, and the plan altogether beyond the present wants of the city. A new plan has been drawn, but nothing is yet determined on.

Brooklyn was incorporated as a village in 1816, and as a city, with greatly extended limits, in 1834. It is divided into nine wards, and is governed by a mayor and a board of eighteen aldermen, two from each ward, all elected by the people.

Brooklyn was first settled in 1636, but it did not choose regular magistrates until 1746, though some kind of authority was previously established. The first house for public worship, which was a Dutch church, was erected in 1666. Six years previous to this, the Rev. Henricus Selwyn had been installed in Brooklyn, with a salary of 600 guilders, or \$240, one half of which was paid by the inhabitants, and the other half by Fatherland, or Holland.

FORTIFICATIONS.

There are some remains of fortifications which were thrown up by both armies during the revolutionary war, which may still be traced on the hills in the back parts of Brooklyn. The principal of these is Fort Greene. This was originally a large fort. Many of the embankments were repaired during the war of 1812, and the whole may

still be distinctly traced. It is one of the most interesting spots in the vicinity of New-York.

OLD JERSEY PRISON SHIP.

For a description of this, the reader is referred to pages 12—15 of this volume.

The place where this ship, and the other hospital ships were moored, was near the present Navy Yard.

REVOLUTIONARY SOLDIERS' TOMB.

Those who died on board the prison ships were generally buried in the sand on the Long Island shore. In the year 1808 the bones of those who had died, and which were washed out from the bank where they had been slightly buried, and were bleaching in the sun, were collected and deposited in thirteen coffins, inscribed with the names of the thirteen original states, and placed in a vault beneath a suitable building, erected for the purpose, in Jackson-street, opposite to Front-street, near the Navy Yard. On the point of the roof of the building, which is a small, square edifice, is an American eagle. On a row of posts and rails in front of the tomb, are inscribed the names of the thirteen original states, and the tomb is surrounded by a fence. Over the entrance of the enclosure in which the building is situated is the following inscription: "Portal to the tomb of 11,500 patriot prisoners, who died in dungeons and prison ships, in and about the city of New-York during the revolution." An imposing ceremony took place when the bones were deposited; and 15,000 persons were supposed to have been present on the occasion. These remains deserve a removal to the Greenwood Cemetery, in a conspicuous place, and a national monument commemorating the important battle of Flatbush, the interesting localities of which are in view from its more elevated portions.

Connected with the ancient history of Brooklyn, and the scenes of the revolution, already sketched, it will not be inappropriate to give some account of

THE BATTLE OF LONG ISLAND.

After the commencement of hostilities in 1776, New-York being situated near the centre of the colonial sea-

board, and consequently readily accessible from the sea, was selected by the British as the principal point for their future operations. With this view, the first division of their army arrived at Staten Island in the latter part of June that year, followed, about the middle of July, by the grand armament under Lord Howe, consisting of six ships of the line, thirty frigates, with smaller armed vessels, and a great number of transports, victuallers, and ships with ordnance stores.

The Americans, anticipating the invasion of Long Island, had fortified Brooklyn before the arrival of the British at Staten Island. A line of intrenchment was formed from a ditch near the late toll-house of the bridge at the Navy Yard to Fort Greene, and from thence to Freck's mill-pond. A strong work was erected on the lands of Johannis Debevoise and Van Brunt; a redoubt was thrown up on Bæmus' Hill, opposite Brown's Mill, west of Fort Greene. Ponkiesberg, now Fort Swift, was fortified, and a fort built on Brooklyn Heights. Such were the defences of Brooklyn in 1776, while *chevaux de frise* were sunk in the main channel of the river below New-York. It was not until the middle of August, that a first landing on Long Island was made by them, which was effected at New-Utrecht, or Bath. Here they were joined by many royalists, who, it was supposed, acted the part of guides and informers to the enemy. General Sir Henry Clinton also arrived about the same time, and Commodore Hotham soon after appeared with his escort; so that in a short time, the hostile army amounted to about twenty-four thousand men, consisting of English, Hessians and Waldeckers. Several regiments of Hessian infantry were expected to arrive shortly, when the army would be swelled to the number of thirty-five thousand, of the best troops of Europe, all abundantly supplied with arms and ammunition, and manifesting extreme ardor for the service of their king. Their plan of operations was, first to get possession of New-York, which was deemed of the most paramount importance. The American troops being divided, and their generals surprised and pressed on all sides, it was not doubted but the British arms would soon obtain a complete triumph.

To resist this impending storm, Congress had ordered the construction of rafts, gun-boats, galleys and floating batteries, for the defence of the port of New-York, and the mouth of the Hudson. They had also decreed, that thirteen thousand of the provincial militia should join the army of General Washington, who, being seasonably apprized of the danger of New-York, had made a movement into that quarter; they also directed the organization of a corps of ten thousand men, to serve as a reserve in the central provinces. All the weakest posts had been carefully intrenched, and furnished with artillery. A strong detachment occupied Long Island, to prevent the English from landing there, if possible, or to repulse them, should they effect a debarkation. But the army of Congress was very far from being able to bear the brunt of so terrible a war. It wanted arms, and was wasted by diseases. The reiterated calls of the commander-in-chief for reinforcements, had brought into his camp the militia of the neighbouring provinces, and some regular regiments from Maryland, Pennsylvania and New-England, which had swelled his army to twenty-seven thousand men in number; but one fourth of these troops were invalids, and scarcely another fourth of them were furnished with arms.

The American army, such as it was, occupied the positions that were best adapted to cover the menaced points. The corps which had been stationed on Long Island was commanded by General Sullivan. The main body of the army was encamped on the island of New-York, which it appeared was likely to receive the first attack of the English.

Two feeble detachments guarded Governor's Island and the point of Paulus' Hook. The militia of the province, commanded by the American General Clinton, were posted upon the banks of the sound, where they occupied East and West Chester, and New-Rochelle; for it was to be feared that the enemy, landing in force upon the north shore of the sound, might penetrate as far as King's bridge, and thus entirely lock up all the American troops on the island of New-York. Lord Howe, the commander-in-chief of the British forces, made some overtures of peace, upon terms of sub-

mission to the royal clemency, which resulting in nothing, decided him in making an attack on Long Island; and on the 22d of August, the British troops landed, without opposition, near Gravesend.

A large part of the American army was at this time stationed on Brooklyn heights, under General Putnam. The right wing was covered by a marsh, near Gowanus cove, and having Governor's Island in the rear, he could in this way communicate with the army in New-York, under Washington.

The English having effected their landing, marched rapidly forward. The two armies were separated by a chain of hills, covered with woods, called the heights, which running from west to east, divide the island, as it were, into two parts. They are only practicable upon three points; one of which is near the Narrows, the second, the road leading to the centre through the village of Flatbush, and the third is approached far to the right, by the village of Flatlands. Upon the summit of the hills there is a road which continues along the whole length of the range, and leads from Bedford to Jamaica, which is intersected by the two roads last described: these ways are interrupted by precipices, and exceedingly difficult and narrow defiles.

The American general, wishing to arrest the enemy in his progress, had carefully furnished the heights with troops, so that, if all had done their duty, the English would not have been able to force the passes without the greatest difficulty and danger. The posts were so frequent upon the road from Bedford to Jamaica, that it was easy to transmit the most prompt intelligence of what passed upon these three routes, from one point to another. Col. Miles, with his battalion, was appointed to guard the road to Flatlands, and scour it continually with his scouts, as well as the road to Jamaica, in order to reconnoitre the movements of the enemy. Meanwhile the British army pressed forward, its left wing being to the north, and its right to the south; the village of Flatbush being in the centre. The Hessians, commanded by General de Heister, formed the main body; the English, under Major General Grant, the left; and other corps, conducted by General Clinton and the two Lords,

Percy and Cornwallis, composed the right. In this wing the British generals placed their principal hope of success, and directed it upon Flatlands. Their plan was, that while the corps of General Grant and the Hessians of General Heister should distress and annoy the enemy upon the two first defiles, the left wing, taking a circuitous route, should march through Flatlands, and endeavour to seize the point of intersection of this road with that of Jamaica; and then, rapidly descending into the plain which extends at the foot of the heights upon the other side, should fall upon the Americans in flank and rear. The English hoped, as this point was the farthest from the centre of the army, the advanced guards would be found more feeble there, and perhaps more negligent; finally, they calculated that the Americans would not be able to defend it against so superior a force. The right wing of the English was the most numerous, and entirely composed of the best and most select troops.

On the evening of the 26th of August, the British army took up their march in admirable silence and order, and, passing Col. Miles, who had relaxed in his duty, arrived two hours before day break within half a mile of the road leading to Jamaica upon the heights. Here General Clinton halted and prepared for the attack. General Sullivan had no advices of their movements, having neglected to send out scouts.

General Clinton, learning that the road to Jamaica was not guarded, hastened to avail himself of the circumstance, and occupied it by a rapid movement. Without loss of time, he immediately bore on his left towards Bedford, and seized an important defile, which the American generals had left unguarded. From that moment the success of the day was decided in favour of the English. Lord Percy came up with his corps, and the entire column descended by the village of Bedford, from the heights, into the plain which lay between the hills and the camp of the Americans. During this time General Grant, in order to amuse the enemy, and direct his attention from the events which had taken place upon the route of Flatlands, endeavoured to disquiet him upon his right; accordingly, as if he intended to force

the defile which led to it, he put himself in motion about midnight, and attacked the militia of New-York and Pennsylvania, who guarded it. At first they gave ground; but General Parsons being arrived, and having occupied an eminence, he renewed the combat, and maintained his position till Brigadier General Lord Sterling came to his assistance with about fifteen hundred men. The action now became general and extremely animated upon both sides, fortune favouring neither one or the other. The Hessians had attacked the centre at break of day; and the Americans, commanded by General Sullivan in person, fought valiantly. At the same time the English ships, after making several movements, opened a brisk cannonade against a battery established at Red Hook Point, upon the right flank of the Americans, who combatted against General Grant. This, also, was a diversion, the object of which was to prevent them from attending to what passed in the centre and on the left. The Americans, however, defended themselves with great bravery, ignorant, as they were, that so much valour was exerted in vain, as the victory was already in the hands of the enemy. General Clinton having descended into the plain, fell upon the left flank of the centre, which was engaged with the Hessians. He had also previously detached a small corps in order to intercept the Americans.

As soon as the appearance of the English light infantry apprized the Americans of their danger, they sounded the retreat, and retired in good order towards their camp, bringing off their artillery. But they fell in with a party of royal troops which had occupied the ground in their rear, who charged them with fury; and they were compelled to throw themselves into the neighbouring woods, where they again met with the Hessians, who repulsed them back upon the English; thus the Americans were driven several times against one or the other with great loss. They continued for some time in this desperate situation, till at length several regiments, animated by an heroic valour, forced their way through the midst of the enemy, and gained the camp of General Putnam; others escaped through the woods. The inequality of the ground, the great number of posi-

tions which it offered, and the disorder that prevailed throughout the line, were the cause for many hours of several partial combats taking place, in which numbers of the Americans fell.

Their left wing and centre being discomfited, the English, desirous of having a complete victory, made a rapid movement against the rear of the right wing, which being ignorant of the misfortune that had befallen the other corps, was engaged with Gen. Grant. Finally, having received the intelligence, they retired from so unequal a contest. But, again encountering the English, who had cut off their retreat, part of them took shelter in the woods, others endeavoured to make their way through the marshes of Gowanus's cove, but many were drowned in the waters or perished in the mud; a very small number only escaped the hot pursuit of the victors, and reached the camp in safety.

The total loss of the Americans in this battle was estimated at more than three thousand men, in killed, wounded and prisoners. Among the latter was General Sullivan and Brigadier General Lord Stirling. Almost the entire regiment of Maryland, consisting of young men of the best families in that province, was cut to pieces. Six pieces of cannon fell into the hands of the victors. The loss of the English was very inconsiderable; it did not amount to four hundred men, in killed, wounded and prisoners.

The enemy encamped in front of the American lines; and on the succeeding night broke ground within six hundred yards of a redoubt on the left, and having thrown up a breastwork on the Wallabout heights, upon the Debevoise farm, commenced firing on Fort Putnam, and reconnoitred the American forces.

The Americans were here prepared to receive them; and orders were issued to the men to reserve their fire till they could see the eyes of the enemy. A few of the British officers reconnoitred the position; and one, on coming too near, was shot by William Van Cotts, of Bushwick. The same afternoon, Captain Rutgers, brother of the late Col. Rutgers, also fell. Several other British troops were killed, and the column which had incautiously advanced, fell back beyond the range of the American fire.

In this critical state of the American army on Long Island, having a numerous and victorious enemy in front, with a formidable train of artillery, the fleet indicating an intention of forcing a passage up the East river, the troops lying without shelter from heavy rains, fatigued and dispirited, General Washington determined to withdraw the army from the island; and this difficult movement was effected, not only with great skill and judgment, but with complete success. The retreat was to have commenced at eight o'clock in the evening of the 29th, but a strong north-east wind and a rapid tide caused a delay of several hours; a southwest wind, however, springing up at eleven o'clock, greatly facilitated the passage of the army from the island to New-York city; and a thick fog hanging over Long Island towards morning, covered its movements from the enemy, who were so near, that the sound of their pick-axes and shovels were distinctly heard by the Americans. General Washington, as far as it was possible, inspected every thing himself, from the commencement of the action on the morning of the 27th, till all the troops had crossed the river in safety; he never closed his eyes, and was almost constantly on horseback. After the American army had evacuated Long Island, and the British troops and their allies, the Tories and refugees, had taken possession of it, many distressing occurrences and heart-rending scenes of persecution took place. Those Whigs who had been at all active in behalf of the cause of independence, were exiled from their homes, and their dwellings subjected to indiscriminate plunder. Such as could be taken, were incarcerated in the churches of New-Utrecht and Flatlands; while royalists, wearing a red badge in their hats, were encouraged and protected. It is believed that had Lord Howe availed himself of the advantage he possessed, by passing his ships up the river between New-York and Brooklyn, he would have cut off their retreat, and the whole of the American army must have been captured. Washington saw this, and wisely abandoned the island. The unfortunate issue of the battle was altogether owing to the misconduct of Col. Miles and the unfortunate ignorance of Gen. Putnam, who had just taken the command.

Gen. Greene being sick, Putnam could give no order about the lines and positions, for he had not had time to understand them.

NAVY YARD.

This naval depot is situated on the south side of the Wallabout Bay, in the northeastern part of the city, and is well worthy the notice of strangers visiting Brooklyn. The government possess about forty acres of land, including the site of the old mill-pond. There is a spacious yard, public store houses, machine shops, and two immense edifices, built of wood, in which ships of war of the largest class are protected from the weather while they are building. On the opposite side of the bay the "*Naval Hospital*," which is a splendid and magnificent building, has been lately erected, and the site on which it is built is very beautiful and picturesque.

"*United States Naval Lyceum*," is also in the Navy Yard. This institution was organized by the officers of the Navy and Marine Corps, in order to promote the diffusion of useful knowledge, and to foster a spirit of harmony, and a community of interest in the service.

It contains a splendid collection of curiosities and scientific specimens. Its mineralogical and geological cabinets are not surpassed by any in New-York. A fine collection of Egyptian antiquities may be found here. The walls of the room are adorned by collections of fine paintings. Trophies of war, rare and curious weapons of war, and an extensive library, are among the objects of interest here collected. The whole forms a very interesting place of resort.

Ships of war of all classes are always stationed at this yard, either undergoing repairs, being built, or laying up in ordinary. Several vessels of a large class are now, and have been for many years, on the stocks. Immense stores of lumber, cannon, ammunition, and other naval stores, are here in preparation for any emergency.

LONG ISLAND RAIL-ROAD.

The length of the road, from Brooklyn to Greenport, is 96 miles.

NAVY YARD, BROOKLYN.

The rail used in the construction is what is known as the heavy H rail, and weighs 56 pounds per lineal yard.

The whole cost of construction of the rail-road, including the tunnel, was \$1,746,000.

The tunnel under Atlantic-street is 2,750 feet long, and cost \$96,000.

The termination of the Long Island Rail-Road is at the South Ferry, in Brooklyn, through Atlantic-street. The land being somewhat elevated, it became necessary either to cut down the street, or construct a tunnel. This last was done. The depth at the highest part of the street is about 30 feet.

A line of cars start from this place to Boston daily, and accommodation trains for the intermediate places on the island, at several times in the day.

BROOKLYN LYCEUM.

One of the principal public buildings in the city is the "*Lyceum*," which is a fine specimen of architecture, built of granite, and every way adapted to the purpose of its projection. It is situated in Washington-street, near Concord.

The institution was organized in October, 1833. The "*City Library*" has been lately established here, which contains a great number of valuable literary works, and is highly deserving of the general patronage and support of the citizens.

THE SAVINGS BANK

Is also located in the Lyceum building; an excellent institution, managed by careful men, and in a prosperous condition.

GREENWOOD CEMETERY.

This rural depository for the dead attracts much attention at the present time, and therefore claims somewhat of an extended notice.

These grounds comprise about 185 acres, and are more extensive than the grounds of any similar institution in this country. They are situated in Brooklyn, at Gowanus, on a high ridge of hills, commanding beautiful and extensive views of the bay and cities of New-York and Brooklyn, the Narrows, Jersey shore, and the Atlantic Ocean; and are distant from the South Ferry, at Brooklyn, two and a half miles.

Persons wishing to visit the Cemetery can take the stages which leave the Fulton Ferry, in Brooklyn, every hour during the day, and return by the same as often.—Fare 12½ cts.

The charter authorizes the land belonging to the corporation to be used exclusively for the burial of the dead; exempts the lands for ever from assessment and public taxes, and requires that the proceeds of all sales shall be applied to the improvement of the Cemetery. It also authorizes every proprietor of 300 square feet or more of land, to vote at any election of Trustees. Persons buying lots acquire the *fee simple* of the ground which they purchase. They control the government of the institution, and, by legislative acts, can never be *forcibly* deprived of the ground. The price of an ordinary burial lot is one hundred dollars. Four lots in a group may be bought for eighty dollars each.

The beautiful grounds of Greenwood have already become the scene of much resort. They will be visited by in-

SHIELDS' MONUMENT, GREEN-WOOD.

creasing numbers, as they become more known, and especially as the circle widens which connects by ties of mournful interest its silent occupants with the living multitudes in the adjacent cities. To such they should present all that becomes a *Christian Cemetery*, situated in a wealthy neighbourhood, and commenced in an age of refinement and of art. In the variety and beauty of these grounds—so open and sunny in some parts—so shaded and secluded in others—so near to a vast city, yet so retired and still—nature has left us nothing to desire. Art has but just commenced its great work of improvement here. The work has been well begun. Several of the monuments and tombs are strictly original, and if not perfect, are pioneers to a better taste. From the happy and fertile inventions which produce these, as well as from other kindred sources, it is hoped we shall obtain many more of equal if not superior merit. The gate of the Cemetery is constructed of timber, in the rustic style, and presents a very picturesque appearance. There is also a chapel, constructed in the same style, with a bell, which tolls during the time of funerals.

The circumference of one lot is 82 feet, or 12 by 25 square. A receiving tomb is provided at the Cemetery, in which interments may be made by proprietors of lots, or those intending to become such. This tomb is situated in Willow Avenue.

A receiving tomb is also provided in Brooklyn, for the convenience of those who may wish the funeral procession to terminate there.

A receiving tomb is also provided in New-York, in the Carmine-street Cemetery, where temporary interments may be made, subject to the charge of three dollars for the use of the tomb, and one dollar each time for the opening of the same. The key of this tomb is in charge of Mr. John Mace, No. 75 Carmine-street.

Graves.—Single graves may be procured in grounds appropriated for that purpose and enclosed by a hedge, at ten dollars each. Children's graves, under twelve years of age, at five dollars each.

Rules concerning Visitors.—Visitors will obtain the best general view of the Cemetery, and reach the entrance again

without difficulty, by keeping the main Avenue, called The Tomb, as indicated by the *guide boards*. A little familiarity, however, with the grounds, will enable them to take the other avenues, many of which pass through grounds of peculiar interest and beauty.

Each proprietor of a lot will be entitled to a ticket of admission into the Cemetery with a vehicle, under the following regulations, the violation of which, or a *loan of the ticket*, involves a forfeiture of the privilege.

No vehicle will be admitted unless accompanied by a proprietor, or a member of his or her household, or unless presenting a special ticket of admission.

On Sundays and Holidays the gates will be closed. Proprietors of lots, however, will be admitted *on foot*.

No person or party having refreshments will be permitted to come within the grounds, nor will any smoking be allowed.

Children will not be admitted without their parents or guardians. Persons having dogs must leave them fastened at the gate.

No horse may be left by the driver in the grounds, unfastened.

All persons are prohibited from picking any flowers, *either wild or cultivated*, or breaking any tree, shrub or plant.

Any person disturbing the quiet and good order of the place by noise or other improper conduct, will be compelled instantly to leave the grounds.

The gates will be opened at sunrise, and closed (for entrance) at sunset.

No money may be paid to the Porter.

The *Keeper* of the grounds, appointed by the Mayor of Brooklyn a special Marshal, with a view to the preservation of the grounds, is authorized and directed to remove all who violate these ordinances or commit trespasses. Trespassers are also liable to criminal prosecutions and a fine of *Fifty Dollars*.

ATLANTIC DOCK.

The company who are prosecuting this extensive work was incorporated in May, 1840, with a capital of

\$1,000,000. The shares are one hundred dollars each. It is situated on the water front of the Sixth Ward of Brooklyn, below the South Ferry, within "Red Hook Point," the outside pier extending 3,000 feet on "Buttermilk Channel." The basin within the piers will contain about forty-two acres, with a sufficient depth of water to accommodate the largest ships. On the piers there are to be built large warehouses, many of which are already erected. Some improvement of this kind was needed, by the crowded state of the docks around New-York city, and the difficulty of finding suitable berths to unload vessels with heavy cargoes. When this improvement is completed, it will throw into the market more than five hundred valuable building lots, valuable, especially for stores and large warehouses, all of which are now below high water mark, but which must be filled in when the piers are built. A new ferry is projected from the north corner of the basin to the Battery in New-York. The whole work is immense, and is well worthy the attention of a stranger.

BROOKLYN UNION FERRY COMPANY.

The distance across the South Ferry, from Atlantic-street to Whitehall, New-York, is 1,472 yards.

The distance across the Fulton Ferry, from Fulton-street, Brooklyn, to Fulton-street, New-York, is 731 yards.

The Union Ferry Company own eight boats, six of which are kept running. The average cost of each boat is about \$30,000.

Three boats are run on each ferry throughout the year.

The hours of running at the South Ferry are from 4 A. M. to 11 P. M.

At the Fulton Ferry a boat is kept running all the time, with the exception of one hour at night, viz., from 2 to 3 o'clock.

The price of passage at both ferries is two cents for foot passengers; small children half price.

The ferriage for a carriage and two horses is 25 cents.

do. do. and one horse is 18½ "

The price of commutation for males over 21 is \$10 per annum.

For males under 21 is from \$4 to \$6.

The price of commutation for females, \$5.

Commuters have the privilege of crossing both ferries.

The whole number of persons employed at both ferries is about 100.

The improvements at the ferry landings recently made have cost \$50,000; the buildings at all the four points being substantial and convenient.

The commutation at the two ferries for the year 1845 was \$30,000. By articles of agreement, the dividend to stockholders is limited to seven per cent. per annum; the surplus profit to be applied to the improvements of the ferries and the extinguishment of the stock.

PRIVATE SCHOOLS.

Of these there are many, both for males and females, and many of them of a high order. Without instituting any invidious comparisons, the stranger will feel richly compensated by visiting two of them, the oldest it is believed of the whole, viz.: Mr. Putnam's school for boys, and Mr. Greenleaf's school for girls. Mr. Putnam has been teaching in Brooklyn for fifteen years, with an average of 40 pupils a year. Some of the boys have been with him for several years, and he has thus had the instruction of about 600 boys. The most thorough foundation is here laid for a complete English education. The school is in Henry-street, corner of Love-lane.

Mr. Greenleaf's school has been in operation ten years, with an average of 40 pupils a year, comprising in the whole length of time 250 individuals. Here is taught every branch of solid study comprised in a thorough female education. At least \$20,000 is here invested in library, text-books, apparatus, &c. &c. This school is located in Pierrepont-street, corner of Clinton-street.

BROOKLYN FEMALE ACADEMY.

Such is the name of an institution projected, but not yet in operation. A very spacious building is in progress of erection on Joralemon-street, near Clinton.

PUBLIC SCHOOLS.

The public schools are under the control and management of a *Board of Education*, composed of three representatives from each of the ten school districts, together with the county Superintendent and Mayor of the city, who are *ex officio* members.

The representatives are appointed by the Common Council, (who are the commissioners of common schools,) and hold their office for three years, and are divided into three classes, one class being appointed annually on the first Monday in February.

The Board of Education appoint from among their own body a President, Vice-President and Secretary, (the city Treasurer being *ex officio* Treasurer.) The present officers are Theo. Earnes, *President*; Stephen Haynes, *Vice-President*; and Alfred G. Stevens, *Secretary*.

The number of children comprised within the ten districts, which includes the whole city, between the ages of five and sixteen, and upon which is based the apportionment of school money, is about *twelve thousand white*, and *four hundred coloured*. The number which attends the schools is about *two thousand and five hundred white*, and *one hundred and fifty coloured*.

The number of teachers and monitors engaged in the various schools is about *sixty*, and the amount of compensation annually paid for teaching amounts to about fourteen thousand dollars.

The course of instruction embraces all the various branches of English education. Vocal music also forms a prominent feature of instruction, a competent teacher being engaged expressly for that purpose.

In each district there is a valuable library, free not only to the scholars but also to every inhabitant, male and female, in the district. The number of volumes in some exceeds 2,500.

The school houses in the inner or compact part of the city are handsome brick buildings, three stories in height, costing about six thousand dollars each, exclusive of the ground. The others, in the outer sections, are substantial frame buildings.

ORPHAN ASYLUM.

This institution has been in operation for about twelve years. Some eight or ten years ago a spacious brick edifice was erected near Myrtle Avenue. A large number of children are here provided for. It is patronized by all denominations.

CITY BUILDINGS.

The "*City Buildings*" are situated at the corner of Henry and Cranberry streets; there is nothing in the architecture of the exterior of them worthy of notice; they are used as courts and offices of the corporation for the transaction of the public business of the city.

The "*King's County Courts*" are held in the large building called the "*Exchange*," situated at the corner of Cranberry and Fulton streets; it is a plain brick building, without any extraordinary architectural beauty.

The "*King's County Jail or Prison*," is situated in Raymond-street, at the foot of Fort Greene; it is a dark, heavy-looking, castellated gothic edifice, in front built of red sandstone, with gothic windows at each side, and a large yard at the back; the site where it is located is not a very favourable one for the display of its architectural front; had it been erected on the summit of Fort Greene, it would have had a more commanding appearance, and have been a much more healthy location for the prisoners.

CHURCHES IN BROOKLYN.

There are nearly forty church buildings in Brooklyn, and some of them elegant structures. Our limits allow us to describe only a few of them.

CHURCH OF THE SAVIOUR,

(FIRST UNITARIAN CONGREGATIONAL,)

Pierrepoint-street, corner of Monroe Place.

This church is built in the perpendicular gothic style, of red sandstone: the walls, which are *rubble*, from the quar-

UNITARIAN CHURCH.

Brooklyn.

ries at Nyack, N. J., and the ornamental portions, which are finely hammered, from those of Connecticut. The entire length of the building, exclusive of the front towers, which project eight feet, is eighty feet; and its width, exclusive of the buttresses on the corners, which project four feet, is sixty-five feet. The front central towers are about sixteen feet at the base, and rise one hundred and eighteen feet, being terminated by pinnacles fully enriched. The corner towers rise sixty-five feet, terminated like the others. The walls are crowned by a battlement of hammered stone. The doors are deeply recessed; the central one opening fourteen feet high and ten feet wide, being recessed four feet six inches. Above this door are shields of hammered stone on the wall, bearing the name of the church and the date of its erection. Over these is the front window, twelve feet wide and twenty-eight feet high; and windows of less size, but of like character and proportions, are above the side doors. Over the central window is a large stone cross in *basse-relievo* on the wall.

The approach to the church is by stone steps, through gothic gateways attached to a substantial paling of wrought iron. The outer doors, of elaborate tracery, open into the vestibule, ten feet in width, extending across the entire church, with stairs to the basement, and galleries at either end. The nave is seventy-five feet long, opened through of equal width, thirty-five feet, to the great window in front; and on either side the additional width of thirteen feet for the galleries. The roof of the nave is elegantly vaulted and groined, the extreme height being fifty-seven feet; that of the galleries is of the same style, the height being thirty feet from the floor of the church.

The entire cost of the building, land, furniture, organ and external items, may be stated at about thirty-six thousand dollars.

The church was consecrated on the 24th of April, 1844, and the present pastor, the Rev. Frederick A. Farley, was installed on the following day.

CHRIST'S CHURCH,

CLINTON-STREET.

Erected in 1842.

This is a gothic building of a reddish stone, about 100 feet long and 60 feet wide. The height of the walls is about 36 feet, and the extreme height of the tower about 100 feet. The tower in front is about 24 feet square, having heavy buttresses on each corner, built to the top of the roof, and then becoming octagons to the top, ending in four large pinnacles. The main entrance is in the tower, and smaller doors on each side in the body of the church. There is a large gothic window over the main entrance. In the tower is a bell and clock. The body of the house is lighted by 15 windows, seven on each side and one in the rear, with buttresses between them, running to the eaves, and there terminating without pinnacles. In the rear of the building is a lecture room of one story, with a flat roof, showing above it the large pulpit window of ground glass,—all the other windows being stained glass. On the apex of the roof in the rear there is a short stone cross. The cost of the edifice was about \$28,000. Rev. John S. Stone, D. D., is the present minister.

FIRST REFORMED DUTCH CHURCH,

JORALEMON-STREET.

Erected in 1834.

This church is built of brick, stuccoed to represent clear white marble. The extreme length of the building is 111 feet, and its width 66 feet, and was erected at a cost of about \$26,000. It is a noble looking structure, and presents probably one of the best specimens of a Grecian temple which can be found in this region. Viewing the building in front we are presented with a deep pediment, supported by eight Ionic massive fluted pillars, standing

on a platform raised about four feet from the ground, and two similar pillars within these, and nearer to the body of the house. A lighter pediment projects in the rear of the building, supported also by one row of pillars. The house is lighted on the sides only with eight long windows, four on a side, with square heads. The building is unornamented, exhibiting a plain grandeur, well becoming the purpose for which it was erected. The interior is also plain. Instead of a close pulpit there is a table or reading desk, on a raised platform, with a sofa seat. In the rear of this is a fine perspective, representing a recess, with a profusion of pillars. It is well executed, and the illusion very perfect. Rev. M. W. Dwight, D. D., is the present pastor of the church.

SECOND PRESBYTERIAN CHURCH,

FULTON-STREET, CORNER OF CLINTON.

Erected in 1834.

This is one of the largest and most commodious church edifices in Brooklyn. It is built of brick and stuccoed, and after the Grecian model, with six heavy Doric pillars supporting the pediment, standing on a platform raised six steps from the sidewalk. The front presents three large uniform doors. In each side of the building there are six tall windows with square tops, having flat pilasters between them. On the roof, back of the pediment, there is built a wooden turret about forty feet high, divided into three sections; the first being square, the second an octagon, and the third round; the upper section having several windows. This turret is not in very good keeping with the building, as an imitation of a Grecian temple, though the effect is not bad on the whole. The steeple contains a fine toned bell, altogether the best in the city. The interior of the house is plain. It contains about one hundred and forty pews on the lower floor, and has a deep gallery on three sides. The cost of the building was about \$24,000. Rev. Ichabod S. Spencer, D. D., is the present minister.

CHURCH OF THE PILGRIMS,

HENRY-STREET, CORNER OF REMSEN-STREET.

Erected in 1845.

The Church of the Pilgrims is a congregational body, formed after the pattern of the churches in New-England. The church edifice is a very singular one, and altogether different from any other in this region. It is a very large building, being in extreme length 135 feet, and its breadth 80 feet. The height of the walls is 38 feet. It is built of granite, hewn, but not hammered. The front of the edifice, on Henry-street, presents us with two towers, one at each corner; that on the north corner being small, not over twelve feet square, and being built to about the height of the roof of the church, and there terminating in a small pointed wooden roof. The tower on the west corner is 20 feet square, and built up of stone 100 feet from the ground, and thence there ascends a gradually tapering spire 70 feet farther, where it terminates in a large gilded ball. There is one large door in front, between the towers, having over it a large window; and a profusion of small, narrow windows are scattered about in the towers. In the centre of the main tower, about six feet from the ground, a piece of the "forefather's rock," from Plymouth, Mass., is inserted in the wall, and projecting clearly in view. In each side of the house there are three large arched windows, that being the style in which all the windows are made. The lecture room is cut off from the rear of the building, and is a very large and commodious room. The rear of the building presents four short windows below, and one large one above, and a small circular window in the gable, near the apex. The cost of the building is about \$30,000. There is as yet no stated pastor.

LIST OF CHURCHES IN BROOKLYN, 1846.

PRESBYTERIANS.

Name.	Location.	Year of erection.	Dimensions.	Cost.	Present Minister.
First Church, (Old School.)	Fulton-street,	1839,	85 ft. by 65,	\$17,000.	M. W. Jacobus.

NOTICE.

The Publishers of this little volume have in preparation a History of the Churches of New-York, accompanied by engravings, which will render the work highly interesting to citizens and strangers, and particularly to members of the churches.

The volume will contain about two hundred pages, uniform in size and appearance with the "Picture of New-York;" and will furnish particulars from authentic sources of every church in this city, prepared by the writer of the short notices of the churches contained in this volume.

Engravings will be given from original designs of the following buildings, viz., First Presbyterian Church, Christ's Church, Second Unitarian Church, and various others of the Presbyterian, Catholic, Episcopal and other societies.

The Publishers will be glad to receive, until the 1st of March, communications in reference to the date of erection, dimensions, cost and construction of the churches throughout the city. The tabular list of the churches in this volume will be found curious and valuable by those who take much interest in the subject. The facts have been ascertained by diligent inquiry and personal application or examination by the compiler.

GYMNASIUM.

No. 29 Ann-street, New-York.

WILLIAM FULLER respectfully informs the gentlemen of New-York and vicinity, that his Gymnasium is now open for the reception of pupils. W. F. respectfully calls the attention of the faculty, parents and guardians, towards this establishment, which he assures will be conducted in the strictest manner. Sparring taught as usual.

W. F. has made arrangements with Mr. Hamilton, teacher of the American and French Broad Sword, also the Small Sword and Musket exercise. Terms moderate,
